

RAMYA RAVIPATI

JAVA FULL STACK DEVELOPER

EMAIL: ravipatiramya14@gmail.com

CONTACT: 913-762-3893

LINKEDIN: [Ramya Ravipati](#)

SUMMARY OF QUALIFICATIONS:

- Over 4+ years of experience in full-stack development, modernizing legacy systems, and managing the complete software development life cycle.
- Proficient in front-end technologies like HTML5, CSS3, JavaScript, Angular, React.js, Bootstrap, JSTL, and MEAN stack (MongoDB, Express.js, AngularJS, Node.js) for building responsive and dynamic user interfaces.
- Expertise in back-end development using Java, Spring Boot, Microservices, Hibernate, and RESTful APIs for scalable and high-performance enterprise applications.
- Skilled in implementing Spring Security Framework with OAuth 2.0 and JWT for secure user authentication, and applying design patterns like Singleton, Factory, DAO, and Observer to ensure code scalability and maintainability.
- Strong database management experience with MySQL, PostgreSQL, MongoDB, Oracle, SQL Server, Cassandra, and DynamoDB, including optimization using complex queries and stored procedures.
- Skilled in cloud technologies such as AWS, Azure, Google Cloud Platform (GCP), Docker, and Kubernetes for containerization and deployment. Leveraged GCP services like Google Kubernetes Engine (GKE) and Cloud Storage for scalable cloud-native applications.
- Designed and created highly scalable, highly available, fault tolerant, highly secured, distributed infrastructure (IaaS) using AWS EC2 instances, S3, EBS, ELB, API Gateway, Route 53, Cloud Front, Auto Scaling, Elastic Bean Stalk, VPC, Cloud Watch, Cloud Trial, RDS, SNS, SQS.
- Experienced in DevOps practices, including CI/CD pipelines, using tools like Jenkins, Maven, Terraform, Docker, and Kubernetes for efficient deployments and automation.
- Adept in monitoring and logging using ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, and Grafana for real-time application and system performance tracking.
- Hands-on experience in TDD and BDD using JUnit, Mockito, Jasmine, and Selenium, with a strong background in Agile methodologies and mentoring junior developers.
- Proficient in integration frameworks like Spring Integration, Apache Camel, and Apache CXF; experienced in message queueing systems like Apache Kafka, RabbitMQ, and ActiveMQ for real-time communication.
- Skilled in build automation with Maven and Gradle, version control using Git and SVN, along with unit testing frameworks like JUnit, Karma, and Jasmine. Expertise in build automation tools such as Maven and Ant.
- Managed the platform over the years through Agile, Scrum and Waterfall practices.
- Mentored junior developers, troubleshooting advanced issues like memory leaks and deadlocks in multi-threaded applications while promoting continuous learning and code quality.

AREAS OF EXPERTISE:

- **Front-End Development:** HTML5, CSS3, JavaScript, jQuery, Bootstrap, AJAX, Angular 10, Angular 12, React.js, JSTL, XML, Responsive Web Design.
- **Back-End Development:** Java, Spring Boot, Spring Cloud, Spring Batch, Spring MVC, Hibernate, Microservices, Rest API, SOAP Web Services, Python, Node.js, Express.js, Apache Kafka, Spring Security, OAuth 2.0, Tomcat, IBM WebSphere, JBoss.
- **Database Management:** MySQL, PostgreSQL, SQL Server, Oracle, MongoDB, Cassandra, Complex SQL queries, stored procedures, triggers, views, Hibernate ORM, Redis.
- **Monitoring & Logging:** ELK Stack (Elasticsearch, Logstash, Kibana), Splunk, Prometheus, Grafana, Sleuth, Zipkin.

- **Data Integration:** Apache Kafka, Google Pub/Sub, GraphQL.
- **Version Control:** Git, GitHub, SVN, Bitbucket.
- **Testing:** JUnit, Mockito, Jasmine, Karma (for Angular), Jest (for React), Swagger, Postman (API testing), JMeter (performance testing).
- **IDEs:** IntelliJ IDEA, Eclipse, Visual Studio Code, Spring Tool Suite.
- **Authentication and Authorization:** Spring Security, OAuth 2.0, JWT.
- **Containerization and Orchestration:** Docker, Kubernetes (GKE).
- **CI/CD:** Jenkins, Maven, Terraform, SonarQube.
- **Cloud Services:** AWS (EC2, S3, RDS, SNS, SQS, Lambda, Elastic Beanstalk), Google Cloud Platform (GKE, Cloud Storage), Azure.
- **Operating Systems:** Windows, Linux.
- **Soft Skills:** Agile methodologies (Scrum), JIRA, Communication skills, Team Collaboration, Leadership, Problem-solving, Mentoring.

EDUCATION:

- Master's degree in computer science from University of Missouri - Kansas City, MO
- Bachelor's Degree at Vignan's Foundation for Science, Technology and Research – Guntur India

PROFESSIONAL EXPERIENCE:

Allstate, Remote

Oct 2023– current

Full Stack Java Developer

Responsibilities:

- Collaborated with stakeholders to gather requirements and designed modular architectures using Spring Boot, ensuring scalability and fault tolerance with service registration (Eureka) and Hystrix Circuit Breaker.
- Defined data models and designed GraphQL schemas, enabling a 50% reduction in API payloads and improving response times by 40%.
- Proposed scalable architectures for MongoDB and Cassandra, implementing sharding techniques to support large-scale data operations.
- Built RESTful APIs using Java 8/11, incorporating Lambda expressions and Streams to improve data processing efficiency by 30%.
- Developed responsive Single Page Applications (SPAs) with React.js and Angular 12, implementing Lazy Loading and Tree Shaking to reduce page load times by 40%.
- Created dynamic UIs using HTML5, CSS3, Bootstrap, and jQuery, ensuring cross-browser compatibility and accessibility.
- Integrated Redis for caching, reducing database query latency by 45% and improving overall application performance.
- Conducted unit testing with JUnit and integration testing with Mockito, ensuring high code coverage and robust application reliability.
- Performed load and performance testing using JMeter, identifying bottlenecks and improving application throughput.
- Deployed applications on AWS using EC2, S3, Elastic Beanstalk, and Lambda, reducing infrastructure costs by 20% through serverless architecture.
- Automated CI/CD pipelines with Jenkins, Maven, Docker, and Terraform, improving deployment speed.
- Deployed containerized applications using Docker and orchestrated microservices architecture, ensuring scalability and resilience.

- Utilized ELK Stack for centralized logging and monitoring, ensuring quick identification and resolution of issues.
- Integrated Sleuth and Zipkin for distributed tracing, enabling end-to-end visibility of microservices.
- Performed dump analysis to resolve complex issues such as deadlocks, memory leaks, and infinite loops in multi-threaded applications.
- Secured RESTful APIs and web applications with Spring Security, OAuth 2.0, and JWT, providing robust authentication and authorization.
- Implemented role-based access control (RBAC) and encrypted sensitive data, adhering to security compliance standards.
- Participated in Agile methodologies, including sprint planning and retrospectives, ensuring on-time delivery of sprint goals.
- Mentored junior developers, promoting best practices in coding standards and design patterns like Singleton and Factory.
- Conducted code reviews to ensure maintainability and adherence to quality standards.

Technologies: : The technologies include Spring Boot, Eureka (Service Registration), Hystrix (Circuit Breaker), GraphQL, MongoDB, Cassandra, Java 8/11, Lambda Expressions, Streams, React.js, Angular 12, HTML5, CSS3, Bootstrap, jQuery, Redis, JUnit, Mockito, JMeter, AWS (EC2, S3, Elastic Beanstalk, Lambda), Jenkins, Maven, Docker, Terraform, ELK Stack, Sleuth, Zipkin, Spring Security, OAuth 2.0, JWT, Role-Based Access Control (RBAC), Agile Methodologies, and Design Patterns (Singleton, Factory)

Optum, India
Java Developer

Dec 2019 – Oct 2022

Responsibilities:

- Designed and implemented microservices using Spring Boot, Spring Cloud (Eureka, Ribbon, Feign, Hystrix), ensuring modularity, scalability, and seamless system integration.
- Migrated legacy systems to microservices architecture using Docker and Kubernetes, improving system reliability, scalability, and maintainability.
- Developed RESTful APIs and SOAP web services with Spring MVC, JAX-WS, and OAuth 2.0, ensuring secure data exchange between client and server applications.
- Integrated third-party services using RESTful APIs, enhancing system interoperability and functionality, and utilizing Postman for automated API testing.
- Designed dynamic, responsive UIs with Angular 12, React.js, HTML5, CSS3, JavaScript, and jQuery, improving user experience and engagement.
- Utilized Spring Batch for batch processing large datasets, optimizing processing times and reducing resource consumption.
- Implemented distributed logging with ELK Stack (Elasticsearch, Logstash, Kibana) for real-time monitoring and troubleshooting, improving issue resolution by 30%.
- Prometheus and Grafana used to monitor application performance, providing detailed insights into system observability and enabling performance tuning.
- Developed and consumed GraphQL queries to improve data retrieval efficiency, reducing API payload size by 50%.
- Integrated AWS services like EC2, S3, RDS, Lambda, and CloudFormation, optimizing infrastructure and reducing operational costs by 20%.
- Applied TDD/BDD practices using JUnit, Mockito, Jasmine, and Karma for unit and integration testing, ensuring high code coverage and system reliability.
- Utilized Redis for caching to enhance performance and reduce database load by 40%.
- Managed source code using GIT for version control, ensuring efficient collaboration and streamlined development across cross-functional teams.

Technologies: Spring Boot, Spring Cloud (Eureka, Ribbon, Feign, Hystrix), Docker, Kubernetes, RESTful APIs, SOAP, Spring MVC, JAX-WS, OAuth 2.0, Postman, Angular 12, React.js, HTML5, CSS3, JavaScript, jQuery, Spring Batch, ELK Stack (Elasticsearch, Logstash, Kibana), Apache Kafka, RabbitMQ, Prometheus, Grafana, GraphQL, AWS (EC2, S3, RDS, Lambda, CloudFormation), JUnit, Mockito, Jasmine, Karma, Redis, GIT.
