

RAMYA SRI BOBBILLA

FULL STACK ENGINEER | PYTHON DEVELOPER

(203) 640-1718 | ramyasribobbilla1@gmail.com | WATERBURY, CT

PROFESSIONAL SUMMARY

Experienced Python Developer with over 2+ years of hands-on expertise in designing and delivering scalable web applications and microservices. Skilled in Python frameworks (Django, Flask, FastAPI), RESTful API development, and database optimization, driving measurable improvements in system performance and operational efficiency. Proven track record in automating workflows, mentoring teams, and accelerating Agile project delivery while maintaining high code quality and deployment consistency.

EDUCATION

Masters In Computer Science - University of Bridgeport, Bridgeport, CT, USA

Computer Science Engineering - Simats Engineering Saveetha Nagar, Chennai, India

SKILLS

Methodologies: Agile (Scrum), Waterfall, Kanban

Programming Languages: Python, JavaScript/TypeScript (React.js, Node.js, Next.js), SQL (PostgreSQL, MySQL)

Backend Development: Python frameworks: Django, Flask, FastAPI, RESTful API design and integration, Database design, optimization, and ORM usage (SQLAlchemy, Django ORM), Ajax, Json

Frontend Development: React.js, Next.js, Tailwind CSS

Database: SQLite, PostgreSQL, MySQL, MongoDB, Redis

DevOps & Tools: Git and GitHub, Docker, CI/CD pipelines (GitHub Actions), AWS services (S3, EC2, Lambda)

Data Handling & Automation: Pandas, NumPy, PyTest

Development & Project Management: IDEs: Visual Studio Code, PyCharm, Agile workflows using Jira, Trello

EXPERIENCE

Python Developer | AIG, New York, USA

Jan 2025 – Present

- Drive process improvements within Agile teams, reduce sprint cycle time by 15%, and accelerate project delivery across three key initiatives.
- Utilize Python Integrated Development Environments like Visual Studio Code, PyCharm, and Jupyter Notebook to streamline development and debugging processes.
- Migrate legacy systems to Python-based microservices, improving scalability and reducing server downtime by 40%, ensuring higher system availability and performance.
- Design and maintain SQLite databases for high-traffic applications, ensuring data integrity and maintaining compliance with security standards and policies.
- Fetch and process JSON data from REST APIs, normalizing and transforming it into structured datasets that boost data analysis accuracy and decision-making.
- Mentor junior developers on unit testing with PyTest and Git workflows, increasing team productivity and code quality by 25%.

Web Developer | Tvish Infotech, INDIA

Apr 2022 – Jul 2023

- Developed and maintained scalable web applications using Python frameworks such as Django, which significantly enhanced user experience, improved loading times, and increased application reliability.
- Built and integrated RESTful APIs and third-party services, enabling seamless and secure data exchange between systems, which improved overall system interoperability and reduced integration issues.
- Automated critical back-end processes using Python scripts, which reduced manual intervention by 30%, enhanced operational efficiency, and minimized human errors in routine workflows.
- Collaborated closely with front-end developers to design and deliver responsive, dynamic user interfaces using React.js and modern JavaScript, ensuring consistent performance across devices and browsers.
- Leveraged Git version control and implemented CI/CD pipelines to streamline development workflows, accelerate deployment cycles, and maintain consistency and stability in production releases.
- Executed comprehensive unit and integration testing using PyTest frameworks, which improved code quality, identified bugs early, and decreased post-release defects by 25%.
