

Ramya Sri Bobbilla
Full Stack Engineer | Python Developer
2038057660 | ramyasribobbilla1@gmail.com | Waterbury, CT

SUMMARY

Python Developer with 4+ years of experience building web applications, APIs, and backend services using Python, Django, Flask, and FastAPI. Skilled in designing databases, improving application performance, and delivering stable, maintainable code. Comfortable working across backend and frontend and collaborating closely with teams to support reliable product development.

EDUCATION

- Masters In Computer Science - University of Bridgeport, Bridgeport, CT, USA

SKILLS

- **Languages:** Python, JavaScript, TypeScript, SQL
- **Backend:** Django, Flask, FastAPI, REST APIs, SQLAlchemy, Django ORM
- **Frontend:** React.js, Next.js, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, SQLite, MongoDB, Redis
- **Tools & DevOps:** Git, GitHub, Docker, GitHub Actions, AWS (S3, EC2, Lambda)
- **Testing & Automation:** PyTest, Pandas, NumPy
- **Project Management:** Jira, Trello, Agile/Scrum

EXPERIENCE

AIG, New York, USA

Jan 2025 – Present

Python Developer

- Broke down development tasks with the team to reduce rework and shorten sprint cycle time by around 15%.
- Migrated parts of a legacy application into small Python services, improving stability and reducing outages by about 40%.
- Designed and maintained PostgreSQL and SQLite schemas for internal tools, keeping structures simple and dependable.
- Worked on REST API integrations, organizing and cleaning incoming JSON data for internal use.
- Helped junior developers understand Git workflows and basic testing practices, which reduced merge issues.
- Wrote practical unit tests with PyTest that caught early issues and improved release quality.
- Tech: Python, FastAPI, Django, REST APIs, PostgreSQL, SQLite, GitHub Actions, Docker.

Tvish Infotech

Apr 2022 – Jul 2023

Web Developer

- Developed backend features in Django and helped improve page load performance during high user activity.
- Built and connected REST APIs that supported key business operations and reduced manual data updates.
- Wrote Python scripts to automate small tasks and reduce repetitive manual work.
- Worked with the frontend team to ensure smooth API usage and consistent behavior across views.
- Managed updates with Git and supported deployments using a simple CI/CD pipeline.
- Added small unit tests using PyTest to catch common issues before release.
- Tech: Python, Django, REST APIs, MySQL, Git, CI/CD, React.js

KPIT

Oct 2020 – Mar 2022

Python Developer

- Developed small backend features using Python and Flask to support internal tools and simplify data handling for different teams.
- Wrote and maintained REST API endpoints that connected the frontend with MySQL and improved how data was retrieved and updated.
- Worked on data processing scripts in Python to clean, validate, and organize information used by internal applications.
- Helped move older scripts into more structured Python modules, making them easier to maintain and reuse.
- Assisted in debugging issues across backend and database layers by reviewing logs, checking queries, and reproducing errors.
- Collaborated with frontend developers to ensure APIs returned consistent data and supported planned UI changes.
- Tech: Python, Flask, REST APIs, MySQL, Git, HTML/CSS.
