SUMMARY

Data Engineer with **3** years of experience in building and optimizing ETL pipelines, big data processing, and cloud-based data solutions. Proficient in PySpark, Apache Spark, Databricks, Snowflake, and AWS EMR, with expertise in data pipeline automation, real-time streaming, and large-scale data migration.

EDUCATION

Master of Science in Data Science

Wichita State University

Wichita, KS

Aug 2023 - May 2025

Bachelor of Technology

Gandhi Institute of Technology And Management

AP, India

Jun 2016 - May 2020

EXPERIENCE

DXC Technology

Data Analyst

Bengaluru, India

Sep 2022 – Aug 2023

- Designed and implemented ETL pipelines using the **PySpark** API of **Apache Spark** on **AWS EMR**, streamlining data processing tasks.
- Developed and optimized **Spark jobs** in Python and PySpark for efficient data cleaning and preprocessing, improving overall data quality and processing speed.
- Automated the deployment process by creating an AWS **CodePipeline** to deploy **Docker containers** on AWS ECS, using S3 for smooth, seamless deployments.
- Built and maintained **Spark Streaming** pipelines for real-time data processing, applying business logic to detect anomalies and storing results in an HBase table.
- Created **PySpark User Defined Functions (UDFs)** to apply complex business logic during the ETL process, ensuring accurate and efficient data transformation.

Accenture

Application Development Associate

Bengaluru, India

Aug 2020 – Dec 2021

- Migrated **13TB** of critical data to **Snowflake** for a major US pharmacy retailer, ensuring compatibility, improved efficiency, and enhanced performance in the Azure environment
- Developed **ADF pipelines** to automate ETL workflows, reducing data processing time by **50%** and improving efficiency in data transformations.
- Executed comprehensive ETL operations on diverse datasets leveraging Azure Data Factory, Azure Databricks, Snowflake, Azure SQL Database, Teradata, Azure Data Lake Storage, Azure Synapse, and Abinitio.
- Translated **PIG Scripts** and **Hive** Queries into **PySpark** code for improved performance and compatibility with Azure environment.
- Worked on **Databricks** to apply transformation logic before data warehouse load using the power of distributed computing via **PySpark** for a very high volume of data and created workflow to schedule it.
- Used Snowflake's time travel and **Zero-Copy** Cloning features, enabling rapid data recovery and duplication with **0% impact on storage costs**.
- Created and maintained **DDL/DML** scripts for **Synapse** Data Warehouse, managing external tables and optimizing data storage by reducing query processing times by **30%**.
- Defined **partitions** and indexes on Synapse tables, improving overall performance and reducing query runtime by **40%** for high-volume tables.
- Conducted testing for the File Ingestion Framework, facilitating secure file transfers from Unix to the cloud with encryption and achieving **99% accuracy** in data migration.
- Created complete mockup datasets for **100% CCPA compliance** (California Consumer Privacy Act) to facilitate compliance testing and verification

Application Development Analyst

Dec 2021 – Sep 2022

- Utilized **PySpark**, **Delta tables**, and **Databricks Spark Streaming** for efficient processing of data from ADLS, ensuring robust handling of both human and machine messages from multiple sources.
- Implemented **checkpointing** mechanisms to ensure **fault tolerance** and prevent redundant data processing, optimizing the efficiency and reliability of the data pipeline.
- Extracted data from ADLS, applied necessary filters, and stored it in Delta tables for further processing. Created intermediate tables for aggregation and transformation, feeding final tables used in **Power BI**.
- Collaborated closely with German stakeholders to gather **requirements**, implement changes in **Databricks**, and **optimize** data workflows based on their feedback.
- Delivered analytical solutions post-analysis, enabling the identification of **downtimes** and other critical metrics for **operational improvement**.

SKILLS

Big Data: Pig, Hive, Apache Spark, HBase Delta Lake

Data warehouse: Snowflake, Teradata, Synapse Analytics.

Data Storage: ADLS Gen2, S3.

ETL Tools: Azure Data Factory, Databricks, Abinitio, DataStage.

Data Analytics: Python, Spark SQL, PySpark, Excel, SQL, Power BI.

Azure Services: Azure Data Factory, Azure Databricks, Azure Functions, Azure Synapse.

AWS Services: AWS ECS, S3, AWS EMR, AWS CodePipeline.

Orchestration: Airflow, Databricks Workflow, AWS CodePipeline.

Project Management: JIRA, ADO, Agile Methodology.

AWARDS & CERTIFICATIONS

Bravo Award | Accenture | Awarded in recognition of outstanding performance

Hands - on Essentials by Snowflake

Microsoft Certified: Azure Data Engineer Associate | DP-203

Microsoft Certified: Azure Data Fundamentals | DP-900

Microsoft Certified: Azure Fundamentals | Az-900
