

Rangaswamy Yagateela | Full Stack Java Developer

TX, USA | +1(682) 268-0759 | yranga539@gmail.com | [LinkedIn](#)

SUMMARY

Full Stack Java Developer with 3 years of experience in designing, developing, and deploying scalable, high-performance web applications using Java, Spring Boot, React.js, and Angular. Specialized in building microservices-based architectures, integrating secure RESTful APIs, and optimizing both front-end and back-end performance. Proficient in cloud and DevOps technologies including AWS, Docker, Jenkins, CI/CD pipelines for automated, consistent deployments. Proficient in database management with MySQL, PostgreSQL, and MongoDB, applying strong knowledge of data modeling and query optimization. Collaborative & precise developer with a focus on clean architecture, code quality, delivering efficient, maintainable software solutions aligned with enterprise standards.

SKILLS

Programming & Frameworks: Core Java (8+), Spring Boot, Spring MVC, Spring Security, Hibernate, RESTful & Microservices Architecture, JavaScript (ES6+), TypeScript, React.js, and Angular for scalable full-stack development.

Database Management: Proficient in MySQL, PostgreSQL, MongoDB, and Oracle with hands-on experience in query optimization, stored procedures, and relational/noSQL data modeling.

Cloud & DevOps: Competent in AWS (EC2, S3, Lambda), Docker, Jenkins, Kubernetes (basics), and CI/CD pipelines for Orchestrated deployments and containerized applications.

Software Development Practices: Strong in Agile/Scrum, Test-Driven Development (JUnit, Mockito), API Integration, Code Review, and secure authentication using JWT & OAuth 2.0.

Tools & Utilities: Experienced with IntelliJ IDEA, Eclipse, Postman, Maven, Gradle, Git, GitHub, GitLab, SonarQube, and Jira for efficient development and collaboration.

Architecture & Design: Skilled in Object-Oriented Programming (OOP), MVC Pattern, API design, performance tuning, and building scalable, maintainable backend systems.

EXPERIENCE

Full Stack Java Developer | Dell Technologies | TX, USA **Dec 2024 - Present**

- Architected and deployed enterprise-grade web applications using Java, Spring Boot, and ReactJS, improving application responsiveness and system reliability across distributed environments.
- Enhanced cross-platform performance by optimizing front-end components and implementing efficient RESTful APIs, reducing page load time by 28% and boosting user engagement metrics.
- Integrated scalable microservices within Dell's cloud ecosystem on AWS, ensuring secure communication, improved fault tolerance, and seamless data exchange between applications.
- Systematized CI/CD pipelines through Jenkins, Docker, and Git, accelerating deployment frequency and cutting release turnaround time by 35%.
- Strengthened application integrity through implementation of Spring Security and rigorous code validation, reducing production issues and vulnerabilities during audits.
- Worked closely with product owners, QA, and DevOps teams in an agile setup to refine requirements, conduct peer reviews, and ensure delivery of high-quality, enterprise-grade applications.

Full Stack Java Developer | Cybage Software | India **Jun 2022 - Jul 2023**

- Designed, coded, and refined Java-based full-stack solutions using Spring Boot and Angular, achieving a 25% performance improvement through code optimization and component reusability.
- Refined and optimized SQL queries and restructured relational data models in MySQL/PostgreSQL, reducing query latency by 30% and enhancing system scalability for growing datasets.
- Coordinated cross-functional efforts within Agile sprints, partnering with UI/UX designers, QA analysts, and DevOps engineers to streamline feature development, testing, and deployment processes.
- Implemented and mechanized CI/CD pipelines using Jenkins, Docker, and Git, ensuring faster, error-free deployments and minimizing production downtime during frequent releases.
- Strengthened system reliability and security by integrating JWT-based API authentication, input validation, and caching mechanisms, leading to improved application stability and user trust.
- Participated actively in architectural discussions, evaluating design patterns, scalability options, and microservices integration to enhance long-term maintainability and cloud scalability.

Java Developer | Maruti Techlabs | India **Aug 2021 - May 2022**

- Engineered and deployed scalable web applications using Java, Spring Boot, and RESTful APIs, improving performance and reliability across multiple client projects.
- Designed and implemented microservices architecture that enhanced modularity and reduced system downtime by 25%, supporting smoother integration with third-party tools.
- Collaborated with UI teams to connect React- and Angular-based frontends with backend services, improving response times and overall user satisfaction.
- Optimized SQL queries and computerized workflows, reducing manual processing time by 35% and improving reporting accuracy.
- Supported AWS deployments using Docker and Kubernetes, streamlining CI/CD and accelerating release cycle
- Participated in Agile sprint planning, peer code reviews, and performance tuning, ensuring consistent delivery of high-quality, production-ready code.

EDUCATION

Master's in Computer and Information Science **May 2025**

Southern Arkansas University | AR, USA

Bachelor's in Computer Science and Engineering **May 2022**

Malla Reddy Institute of Engineering and Technology | India
