

Ranjitha Sukesh Kallur

Software Engineer / Python Developer

442-944-8126 | kallursukeshranjitha@gmail.com | San Marcos, CA | [LinkedIn](#)

SUMMARY

Python Full Stack Developer with 5 years of experience designing and deploying cloud-native applications using Python (FastAPI, Flask, Django), React/Angular, and scalable microservices. Skilled in multi-cloud environments (AWS, Azure, GCP), building APIs, CI/CD pipelines, and event-driven architectures. Strong background in ETL, observability, and security-first development, with proven ability to deliver enterprise-grade solutions in Agile teams.

SKILLS

Backend (Python) : FastAPI, Flask, Django, Celery, SQLAlchemy, REST APIs, GraphQL, gRPC

Frontend : React, Angular, Next.js, TypeScript, Redux Toolkit, Tailwind CSS, Material-UI

Cloud & DevOps : AWS (ECS/EKS, Lambda, API Gateway, RDS, S3), Azure (AKS, Functions, Key Vault), GCP (GKE, Pub/Sub, BigQuery, Cloud Run, Dataflow, Firestore), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, ArgoCD

Data & Messaging : PostgreSQL, MySQL, MongoDB, Redis, Kafka, RabbitMQ, Airflow, Spark

Testing & Security : Pytest, Selenium, Cucumber, Pact, OAuth2, JWT, Keycloak, SonarQube

Observability : OpenTelemetry, Prometheus, Grafana, ELK Stack, Jaeger

Programming Languages : Python, JavaScript (ES6+), SQL, Java, C++

EXPERIENCE

CVS Health, USA | Software Engineer (Python Developer)

Jul 2024 - Present

- Developed FastAPI microservices for patient records and insurance workflows, integrated FHIR APIs, and secured endpoints with OAuth2, improving authentication performance by 30%.
- Built React + TypeScript dashboards for claims and pharmacy data, reducing average load time by 40% and improving user adoption.
- Deployed containerized services to AWS ECS and GCP GKE, achieving 99.9% uptime while lowering operational costs by 25%.
- Implemented Pub/Sub pipelines to process 100k+ daily insurance transactions, enabling near real-time processing.
- Automated CI/CD pipelines with Terraform + GitHub Actions, delivering zero-downtime blue-green deployments and reducing release effort by 50%.
- Set up observability with OpenTelemetry + Grafana, reducing mean-time-to-detect incidents by 45%.

4Sphere Software Solutions, USA | Software Engineer (Python/Data Engineer)

Nov 2019 - May 2024

- Designed RAG pipelines (LangChain + FAISS/ChromaDB) for enterprise document classification, reducing manual processing time by 60%.
- Built Streamlit dashboards connected to Kafka topics, cutting operational monitoring delays from minutes to seconds.
- Engineered ETL workflows in Airflow + Python that processed 5M+ daily records into BigQuery and Snowflake, boosting reporting efficiency by 70%.
- Integrated GCP Cloud Functions + Pub/Sub, reducing batch ingestion delays by 70% and improving data freshness.
- Optimized APIs with FastAPI and Redis caching, reducing 95th percentile latency by 60% during peak hours.
- Collaborated on AI/ML deployment, embedding TensorFlow/Keras models into Flask APIs, improving model serving latency by 35%.

Accenture Solutions Ltd, India | Software Engineer (Python Developer)

Oct 2021 – Aug 2022

- Contributed to banking and telecom apps using Python Flask/Django and Angular/React, improving customer onboarding efficiency by 20%.
- Assisted in designing REST API contracts with Swagger and backend integrations with Oracle DB, reducing integration bugs by 15%.
- Supported Kafka-based fraud detection pipelines, enabling alerts within less than 5 seconds of suspicious activity.
- Wrote unit/integration tests with pytest and supported QA automation, raising test coverage to 85%.
- Participated in CI/CD pipelines (Jenkins, GitHub Actions), reducing release errors by 30%.
- Collaborated on containerized deployments with Docker + Azure AKS, cutting infra provisioning time by 40%.

Agimus Solutions, India | Software Engineer

Oct 2020 - May 2021

- Developed IoT APIs with Python Flask, enabling data ingestion from 500+ devices into a cloud dashboard.
- Built real-time monitoring system with MQTT + Firebase, reducing sensor-to-dashboard latency to less than 2 seconds.
- Designed MongoDB schemas for time-series data, reducing query times for historical lookups by 50%.
- Deployed prototypes on GCP Cloud Run and IoT Core, validating scalability to 10k+ concurrent device connections.

EDUCATION

Master in Computer Science | California State University San Marcos, San Marcos, CA

Bachelor in Information Science & Engineering | GSSS Institute of Engineering and Technology for Women, Karnataka, India
