

Ranjitha Sukesh Kallur

Data Scientist

442-944-8126 | kallursukeshranjitha@gmail.com | San Marcos, CA | [LinkedIn](#)

SUMMARY

Data Scientist / AI Engineer with 4+ years of experience contributing to ML model development, data pipelines, and AI-driven applications. Hands-on with Python, SQL, PySpark, and cloud platforms, with applied exposure to Generative AI, LLMs, and full-stack integration. Skilled at building prototypes, fine-tuning models, and collaborating in Agile teams to deliver data insights and AI-enabled features. Eager to grow into advanced AI/ML roles while leveraging strong programming and problem-solving foundations.

SKILLS

Programming & Frameworks: Python, SQL, JavaScript (React.js, Node.js), FastAPI, Flask, Django, C++, R

Machine Learning & AI: scikit-learn, XGBoost, LightGBM, Isolation Forest, TensorFlow, Keras, NLP (Hugging Face, BERT, Word2Vec), LangChain, Pinecone, OpenAI APIs, RAG (POC), Agentic AI (POC), Autogen (pilot)

Data Engineering: PySpark, Apache Airflow, Kafka, dbt, Snowflake, PostgreSQL, MySQL

Visualization & BI: Power BI, Tableau, Streamlit, Matplotlib

MLOps & DevOps: Docker, Kubernetes, GitLab CI/CD, GitHub Actions, Jenkins, AWS SageMaker (POC)

Cloud Platforms: AWS (S3, EKS, RDS), GCP (BigQuery, Vertex AI), Azure (Functions, AI Studio)

Other Tools: Postman, Swagger, JIRA, Confluence, Linux, ELK Stack, Prometheus, Grafana

EXPERIENCE

CVS Health, USA | Data Scientist

July 2024 - Current

- Assisted in developing classification and anomaly detection models using scikit-learn, XGBoost, and LightGBM, improving compliance detection accuracy by 18%.
- Built and maintained ETL workflows with PySpark, Airflow, and Snowflake, reducing ingestion latency of multi-source healthcare datasets by 30%.
- Helped deploy REST APIs with FastAPI/Flask handling 10,000+ daily requests for ML-driven compliance insights.
- Contributed to prototypes using LangChain, Pinecone, and OpenAI APIs, cutting manual data review time by 40%.
- Explored Agentic AI workflows (2024) as part of team research initiatives for automating compliance case triage.
- Collaborated on MLOps practices with Docker, Kubernetes/EKS, and MLFlow, improving model deployment cycles by 25%.
- Created dashboards in Power BI and Tableau viewed by 50+ stakeholders across compliance and risk teams.
- Participated in Agile sprints and code reviews, contributing to 95% on-time sprint deliverables.

4Sphere Software Solutions, USA | Data Scientist

Nov 2019 - May 2024

- Developed PySpark and Snowflake ETL workflows for fraud analytics, improving data processing efficiency by 40%.
- Contributed to Kafka-based streaming pipelines for real-time anomaly detection using Isolation Forest.
- Built feature extraction scripts in Python/SQL, and experimented with Ray/Dask for parallelized data processing.
- Assisted in building fraud analytics workflows in Palantir Foundry with Pipeline Builder and ontology mapping.
- Worked on a POC using LangChain and FAISS for semantic search to support fraud investigations.
- Supported fraud analytics team with exploratory data analysis, data validation, and reporting tasks.
- Created internal visualizations and summary reports to present fraud patterns and anomalies to non-technical stakeholders.

Accenture Solutions Ltd, India | Software Developer

Oct 2021 – Aug 2022

- Built REST APIs with Flask and FastAPI for regulatory dashboards, secured with JWT authentication and role-based access.
- Developed ReactJS components with Redux for dashboards supporting multi-role workflows.
- Automated ingestion of regulatory documents with Python, reducing manual QA effort by 40%.
- Containerized applications using Docker and deployed microservices on Kubernetes clusters.
- Wrote unit and integration tests with Pytest and Jest as part of Agile sprints, achieving approximately 90% coverage.
- Assisted senior engineers in setting up GitLab CI/CD pipelines for automated deployments.
- Participated in Agile ceremonies, client demos, and contributed to requirement clarifications.

Agimus Solutions, India | Software Developer

Oct 2020 - May 2021

- Developed Flask APIs for IoT device registration, sensor data ingestion, and analytics dashboards.
- Optimized PostgreSQL queries and indexing, improving performance of IoT reporting by 25%.
- Built a time-series forecasting POC for device usage trends using statistical and moving average models.
- Packaged services into Docker containers for consistency across dev and testing environments.
- Wrote internal API documentation and onboarding notes to help new developers ramp up quickly.
- Assisted in debugging production issues and supported the QA team in test automation.

EDUCATION

Master in Computer Science | California State University San Marcos, San Marcos, CA

Bachelor in Information Science & Engineering | GSSS Institute of Engineering and Technology for Women, Karnataka, India
