SUMMARY

I am passionate about solving business problems using Data Science & Machine Learning. I systematically and creatively use my skills to add tangible values to the team, the business, and the end-user. I am constantly learning, and always looking to improve.

SKILLS

- Python, Scikit-learn, NLTK, Numpy, Pandas, Tensor
- Data Cleaning
- Data Analysis
- Data Visualization
- Data modeling and evaluation
- Data Classification, regression and clustering

EXPERIENCE

Omdena Collaborator, Omdena, August 2023-Current - REMOTE

- Developing a solution from scratch. We collect data, process, and annotate the data, and finally develop a classification/regression model.
- Collaboration and teamwork. In Omdena projects we collaborate with others, attend group meetings, accept the differences in opinions, and provide constructive feedback to achieve our goals.

AI/ML Intern, Samsung Innovation Campus AI Course, November 2022-April 2023 - Remote

- Assisted in data collection, preprocessing, and cleaning for machine learning projects.
- Contributed to algorithm development and model training for predictive analytics.
- Performed model evaluation, fine-tuning, and optimization to improve accuracy.
- Participated in cross-functional teams to design and implement AI solutions.
- Selected as one of the top 3 presenters in the 2022-2023 Samsung Artificial Intelligence course.

EDUCATION AND TRAINING

Postgraduate Degree in Artificial Intelligence and Machine Learning in Business Applications
University of Texas December 2022

Bachelor's degree in Electronics and Communication Engineering
Anna University Chennai May 2012
