

RASHMIKA BHARATHA

Atlanta, GA | rashmika19.b@gmail.com | 309-621-0289 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Engineering professional with 4+ years of experience architecting and implementing large-scale data solutions. Expertise in designing ETL/ELT pipelines, building cloud-native data lakes, and optimizing data models for performance and scalability. Proficient in Python, SQL, AWS (S3, Glue, Redshift, Lambda, Athena), Databricks, and Apache Spark for distributed processing. Skilled in orchestrating end-to-end workflows with Airflow and Azure Data Factory, delivering real-time analytics via Kafka streams, and enabling data-driven decision-making. Known for creating robust, high-performance systems that support analytics, reporting, and machine learning initiatives.

SKILLS

- **Languages:** Python, SQL, Shell Scripting, Scala
- **Big Data & Data Integration:** Spark (PySpark, Spark SQL), Hive, Hadoop, Kafka
- **Cloud:** AWS (S3, Glue, Redshift, Lambda, EMR, Athena, CloudFormation), Azure, GCP
- **Orchestration & ETL/ELT Tools:** Databricks, DBT, Airflow, Azure Data Factory, Oozie
- **Data Modeling & Architecture:** Dimensional Modeling, Star/Snowflake Schemas, Data Lakes
- **DevOps & CI/CD:** Terraform, Git, GitHub/GitLab, Jenkins, Docker, Kubernetes, CI/CD pipelines, IaC
- **Monitoring & Scheduling:** CloudWatch, X-Ray, EventBridge, ESP
- **BI & Visualization:** Tableau, Power BI, QuickSight
- **Project Management & Agile:** Agile/Scrum, Jira, Stakeholder Engagement, RCA, Production Support

WORK EXPERIENCE

SR. DATA ENGINEER

Jun 2024 - Present

Gateway Solutions Inc, Atlanta, Georgia

- Designed and optimized large-scale **ETL pipelines** using **Python** for data processing and **Databricks (PySpark)** on **AWS** and **Azure**, significantly improving data transformation efficiency and job execution performance by 30%.
- Engineered a modular **Data Lake** architecture on AWS with **S3**, **Glue Data Catalog**, and **Athena**, integrating over 20+ structured and semi-structured data sources to support financial analytics, while ensuring compliance standards.
- Built Hive/Impala **SQL** pipelines with performance-tuned queries, enabling efficient and scalable data transformations.
- Managed production workflows by integrating **Kafka**-based streaming pipelines for real-time data ingestion, and troubleshooting using **CloudWatch**, **ESP**, and **Jira**, ensuring pipeline stability and timely issue resolution.
- Containerized Python ETL jobs with Docker, version-controlled deployments using Git, and deployed them via Kubernetes clusters to ensure high availability within CI/CD pipelines and IaC standards.
- Led Tableau dashboard deployment and created 10+ interactive dashboards for finance and marketing teams, reducing manual reporting time by 60% and optimizing query refresh rates by 40% supporting analytics.
- Built and optimized search and analytics workflows using **Elasticsearch**, enabling fast, scalable data retrieval and supporting real-time insights for downstream applications and business intelligence reporting.
- Collaborated with stakeholders to design and refine visualizations and dashboards aligned with business KPIs.
- Created automated **Shell scripts** for job health monitoring, enabling faster **RCA** and issue recovery automation.
- Ensured data quality, validation, and governance pipelines with complex SQL logic supporting 5+ critical ML use cases.
- Led Agile initiatives, coordinating sprint planning, issue management, and key project routines (kick-offs, status reviews, change control, and tollgates) across cross-functional teams to ensure timely delivery, while simultaneously maintaining comprehensive data-architecture documentation.
- Used MS Excel and **Power BI** for reconciling costs across dashboards, providing actionable business insights.

Technologies: Python, SQL, Databricks, Hive, Impala, AWS (S3, Glue, Athena, CloudWatch), Azure, Tableau, Power BI, Docker, Kubernetes, Kafka, Shell Scripting, ESP, Jira, Agile/Scrum

AWS DATA ENGINEER

Jan 2023 – May 2024

Kaiser Permanente, Chicago, Illinois

- Designed **secure data lakes** and **Redshift-based data warehouses** for clinical and insurance analytics, ensuring HIPAA compliance and high-performance data access.
- Led production support, performing root-cause analysis on failed ETL jobs and data anomalies, ensuring data reliability and pipeline stability.

- Migrated legacy **SQL** workloads to **AWS Glue + Redshift** using Python scripts and CDC frameworks, supporting database migration workflows from MySQL and relational source systems.
- Orchestrated healthcare data workflows from ingestion to reporting using **Oozie** and **AWS Step Functions** for automated, event-driven processing.
- Built real-time analytics dashboards in **QuickSight** and **Athena**, enabling instant decision-making.
- Deployed and managed **infrastructure-as-code (IaC)** using **Terraform** and **CloudFormation** for data services, reducing deployment time by 40% and minimizing project risk via standardized CI/CD pipelines.
- Designed and governed enterprise data models (Star/Snowflake schemas) for high-performance financial and clinical analytics, ensuring alignment with the required data architecture documentation and standards.
- Designed a unified analytics architecture by modeling patient, claims, and billing data into curated **Redshift** datamarts and **OLAP cubes**, used by reporting and visualization teams.
- Utilized **AWS CodePipeline** and **Databricks Repos** for **CI/CD** and deployment of data modeling logic with version-controlled infrastructure.
- Developed complex **ETL/ELT pipelines** using Python, SQL, AWS Glue, Lambda, Step Functions, and DBT, orchestrating data transformations and movement between on-premises systems and cloud sources.
- Leveraged **Amazon DynamoDB** and **Amazon Kinesis** for real-time data ingestion and streaming analytics to support operational health metrics and dashboards.

Technologies: Python, AWS (Glue, Redshift, Lambda, Step Functions, CodePipeline, DynamoDB, CloudFormation, Kinesis, Redshift, RDS, CloudWatch, X-Ray, Secrets Manager, IAM, KMS), Databricks, SQL, Agile/Scrum

AWS DATA ENGINEER

Jan 2021 - Jul 2022

KansoCloud, Hyderabad, India

- Built and monitored **ETL pipelines** in **AWS Glue, Lambda, and Redshift Spectrum**, ingesting data from multiple on-premises and SaaS sources.
- Developed **Python** and Shell-based Glue ETL pipelines, integrating data from **SQL Server, S3, and APIs**, and implemented event-driven automation using Oozie, Lambda, Step Functions, and EventBridge.
- Designed logical and physical data models for structured data in **Redshift** and semi-structured logs in **S3**, using optimized partitioning strategies for performance and scalability.
- Applied security, performance tuning, and orchestration best practices to **AWS data lake** pipelines, ensuring HIPAA and organizational compliance using **IAM roles, KMS encryption, and AWS Secrets Manager**.
- Created, deployed, and managed AWS infrastructure including EC2, Lambda, and VPC networking components in alignment with enterprise architecture and security standards.
- Transformed and loaded data into **Amazon Redshift** and **Amazon RDS (PostgreSQL/MySQL)** to enable high-performance analytics and BI reporting.
- Integrated **Amazon S3** as a scalable data lake for storing data, enabling downstream analytics and **ML use cases**.
- Monitored pipeline health and infrastructure using CloudWatch, AWS X-Ray, and CloudTrail for performance, availability, and security auditing.
- Developed end-to-end **CI/CD pipelines** using AWS CodePipeline, CodeBuild, and Terraform, automating deployment of data pipelines and infrastructure as code.
- Delivered production-ready **Tableau dashboards** for healthcare claims, financial cost analysis, and member insights.
- Mentored junior data engineers and supported sprint planning, effort estimation, and documentation.

Technologies: AWS (Glue, Lambda, Redshift, Redshift Spectrum, S3, Step Functions, EventBridge, CloudWatch, X-Ray, CloudTrail, Secrets Manager, IAM, KMS), Python, Shell Scripting, SQL Server, APIs, Tableau, Oozie, Terraform, Agile/Scrum

CERTIFICATIONS

- AWS Certified [Solutions Architect - Associate](#)
- AWS Certified [Cloud Practitioner](#)

EDUCATION

Master of Science in Computer Science

Bradley University, Peoria, Illinois

Bachelor of Technology in Computer Science & Engineering

Sreenidhi Institute of Science & Technology, Hyderabad, India
