PROFESSIONAL SUMMARY

Detail-oriented **Data Analyst** with **3.5 years of project experience** in analyzing complex datasets, developing dashboards, and generating actionable business insights. Proficient in **MySQL, Tableau, Power BI, Python, and Excel**, with experience supporting teams across **healthcare, banking, and supply chain** domains. Strong in turning raw data into clear reports and dashboards to improve operations, reduce risk, and drive decisions.

TECHNICAL SKILLS

- **Languages:** SQL, Python (Pandas, NumPy), R (Basics), Excel
 - **Visualization:** Tableau, Power BI, Looker Studio
 - **Databases:** MySQL, PostgreSQL, SQL Server, BigQuery
 - **ETL & Data Prep:** Alteryx, Power Query, SSIS, Talend
 - **Cloud:** AWS (S3, Athena, QuickSight), Azure Synapse, GCP (BigQuery)
 - **Tools:** JIRA, Git, GitHub, Confluence, REST APIs
 - **Concepts:** Data Cleaning, KPI Reporting, A/B Testing, Agile
-

PROFESSIONAL EXPERIENCE

Data Analyst

June 2024 – Present

Elevance Health – Atlanta, GA

- Designed over 15 Tableau dashboards to track claims, patient outcomes, provider efficiency, and care costs.
- Queried structured healthcare data from MySQL databases for KPI and operational reporting.
- Collaborated with clinical teams to identify gaps in patient engagement and improve care program outcomes.
- Built automated Alteryx workflows to handle claim denials, improving turnaround time and accuracy.
- Created unified pharmacy and provider views for executive reporting using Tableau Story.
- Analyzed trends in claim denials and helped reduce rejections by 12% through insights shared with ops.
- Developed ad hoc reports for pharmacy and actuarial teams with customized filters and drilldowns.
- Used Python to clean, merge, and prep multi-source datasets for advanced visualizations.
- Scheduled Tableau extracts and used REST APIs to ensure real-time dashboard refreshes.
- Participated in sprint demos and daily standups, showcasing data insights to non-technical teams.
- Maintained documentation of KPI definitions, SQL logic, and dashboard structure in Confluence.

- Delivered weekly performance scorecards to regional teams using Excel and Tableau.

Environment: MySQL, Tableau, Python, Alteryx, Excel, AWS S3, Confluence, Power BI, Agile

Data Analyst**October 2023 – May 2024****Fifth Third Bank – Kentwood, MI**

- Built Power BI dashboards for credit card performance, fraud trends, and customer segmentation.
- Wrote advanced SQL queries to identify irregular transaction patterns and compliance triggers.
- Supported marketing team with churn and cohort analysis to guide retention campaigns.
- Forecasted credit performance by region using Excel models and Python-based analytics.
- Integrated credit bureau data into customer profiles and scoring dashboards.
- Optimized Power BI report performance by tuning DAX expressions and reducing data refresh time.
- Automated operational reports using GitHub-triggered Python scripts and stored procedures.
- Coordinated with finance teams to validate report numbers and ensure metric alignment.
- Built metrics for customer acquisition cost and card activation rates using SQL and DAX.
- Documented report flows and data dictionaries using Confluence and shared portals.
- Led weekly review sessions with risk and compliance teams to align on insights.
- Migrated several legacy Excel-based reports into Power BI for live monitoring and improved UI.

Environment: Power BI, SQL Server, Python, Excel, Azure Synapse, GitHub, JIRA, Confluence

Junior Data Analyst**June 2019 – December 2021****Birlasoft – Hyderabad, India**

- Created dashboards in Tableau and Excel to track inventory levels, vendor SLAs, and order timelines.
- Pulled large ERP datasets using SQL and cleaned them for daily operations reports.
- Analyzed purchase order delays and identified top suppliers impacting delivery KPIs.
- Created pivot-based summary reports for material consumption and return rates.
- Built custom parameters in Tableau for interactive regional views of warehouse data.
- Developed monthly reports on warehouse performance, space utilization, and load forecasts.
- Worked with supply chain leads to interpret data and identify slow-moving stock.
- Automated daily Excel reports using macros and Power Query to reduce manual work.
- Standardized incoming data formats from suppliers using Python-based preprocessing scripts.

- Participated in agile sprint planning and reviewed dashboard priorities with business analysts.
- Documented SQL queries, dashboard logic, and user guide walkthroughs in shared folders.
- Collaborated with developers to integrate data sources from multiple ERP systems.

Environment: Tableau, Excel, SQL, Python, ERP Systems, Power Query, Jira, Agile

EDUCATION

- **Master of Science in Computer Science**
University of New Haven – Dec 2023
 - **Bachelor of Technology in Electronics & Communication Engineering**
Lovely Professional University – May 2021
-

CERTIFICATIONS

- Tableau Desktop Specialist – Tableau
 - Microsoft Certified: Power BI Data Analyst Associate
 - MySQL for Data Analytics – Udemy
 - Python for Data Science – Coursera
 - AWS Data Analytics – Specialty (In Progress)
-
