

RAVI TEJA

PYTHON DEVELOPER

Phone: +1 817 213 6615 | Email: iamraviteja.py@gmail.com | Location: Arlington, TX | [LinkedIn](#)

SKILLS

Methodology

SDLC, Agile, Waterfall

Languages:

Python, JavaScript (ES6+), SQL, Java, TypeScript, C#, Bash

Frameworks:

Django, Flask

IDEs:

Visual Studio Code, Jupyter Notebook

Package & Tools:

NumPy, Pandas, Web2py, CherryPy

Web Technologies:

HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, Json, XML

Cloud Technologies:

AWS (EC2, Lambda, S3, RDS, Redshift, Glue), Azure (Blob Storage, Functions)

Big Data & Data Engineering:

Hadoop, Apache Spark, Kafka, Hive, AWS Glue, AWS Athena, PySpark, Pandas

Databases:

SQL Server, MySQL, SQLite

Version Control Tools:

Git, GitHub

Operating Systems:

Windows, Linux

EDUCATION

Masters of science in Data Science

University of North Texas, TX
May 2024

Bachelor of Technology in Computer Science & Engineering

Acharya Nagarjuna University (ANU), Andhra Pradesh, India
May 2021

SUMMARY

- Experienced Full Stack Engineer with a proven track record in the banking and financial industry. Strong expertise in Python, Flask, React.js, SQL, AWS, Spark, and Hadoop. Proven track record in developing end-to-end solutions across banking and financial domains, with deep knowledge of data transformation, cloud-native architecture, and full stack development. Collaborative team player adept at gathering requirements, designing user interfaces, and implementing front-end components. Proficient in frameworks such as Flask, Django, and React JS. Strong expertise in database management, data engineering pipelines, and security measures.

EXPERIENCE

Edward Jones, MO | Jun 2023 - Present

Python Developer

- Developed and maintained scalable backend services using Python, Flask, and RESTful APIs to support client-facing financial applications and improve data transaction efficiency.
- Designed and implemented ETL pipelines using Python and SQL to extract, transform, and load data from multiple banking systems into PostgreSQL for real-time analytics and regulatory reporting.
- Built server-side application logic to automate financial workflows, enabling secure handling of sensitive data across investment operations.
- Collaborated with UI/UX and frontend teams to define API requirements, enabling seamless integration of Python-based microservices with React/Redux interfaces.
- Utilized PySpark to process large-scale structured and semi-structured datasets, improving the speed and accuracy of investment performance reports.
- Leveraged AWS services (EC2, S3, CloudWatch) to deploy and monitor applications, improving application uptime and reducing troubleshooting time by 30%.
- Optimized SQL queries and indexing strategies to boost database performance and reduce load times across critical banking dashboards.
- Managed source control with GitHub and integrated CI/CD pipelines using Jenkins to automate builds, testing, and deployments in Agile sprints.
- Write scripts to parse XML and JSON documents and load the data in database.
- Handling Mainframes applications Analysis requirements, especially PL/I and Business Objects Work in database development using SQLite, SQL Server.

DXC Technology, India | Jan 2020 - Aug 2022

Software Developer

- Worked in agile and waterfall methodologies with high quality deliverables delivered on-time.
- Used Python and Django creating graphic exchange business logic implementation.
- Implemented and enhance CRUD operations for the applications using the MVC architecture of Django framework and Python conducting code reviews.
- Utilized the front-end technologies including HTML, CSS, JavaScript to layout the front-end pages.
- Used AJAX to modify small portions of the web pages by sending a request to the server avoiding the need of reloading the entire web page.
- Wrote and executed various MySQL database queries from python using connector and dB package.
- Worked with Bootstrap to develop different custom component like carousel, date-picker and accordion.
- Used GIT as repository, GitHub to build and deploy the project into Fuse server.
