EXPERIENCE

Fannie Mae

Oct 2024 -May 2025

Project Manager

- Led the design and rollout of a Gen AI use case intake process in ServiceNow, improving submission ,tracking and prioritization for over 50+ business users.
- Collaborated with data governance, legal, and technical teams to build a compliant AI sandbox environment, reducing onboarding time by 30%.
- Defined data access policies and compliance controls for handling sensitive data in AI experimentation, ensuring 100% audit readiness.
- Managed the full lifecycle of 20+ AI use cases from intake to testing, ensuring timely evaluation, data availability, and infrastructure support.
- Integrated technical environments with platforms such as pgvector (PostgreSQL), Amazon Neptune, and Domino Data Lab to enable secure, scalable experimentation.

Fannie Mae

Jan 2024 - Oct 2024

Business Analyst

- Gathered and analyzed business requirements to define end-to-end data workflows and processes during a large-scale cloud data platform migration.
- Worked closely with SMEs to capture business logic and derivations essential for accurate data mapping and reporting.
- Created detailed source-to-target mapping (STTM) documents to migrate legacy on-prem data to AWS Redshift, ensuring consistency and integrity across environments.
- Collaborated with data producers and consumers (analytics, finance, ops) to define requirements for scalable, governed data interfaces.
- Facilitated the creation of data contracts outlining schema definitions, refresh schedules, SLAs, and data quality standards to align producer-consumer expectations.
- Supported implementation of data pipelines and APIs in the cloud environment, ensuring reliable and automated data delivery.

Blue Cross Blue Shield
Business Systems Analyst

Jan 2020 - Oct 2023

- Monitored production systems for data availability and report automation, ensuring daily readiness and rapid resolution of platform issues.
- Led root cause analysis on system incidents, working closely with engineering and operations to propose long-term solutions.
- Created detailed reports and dashboards using SQL and Power BI to support strategic decisions across 500+ providers and maintained KPIs to monitor business performance.
- Defined functional requirements and user stories for claims analytics platforms with a focus on system accuracy and performance.
- Engaged with internal stakeholders to refine business processes, identify automation opportunities, and streamline data workflows.
- Managed multiple priorities across Medicare and commercial analytics projects, maintaining high attention to detail and timely delivery.
