

RAVITEJA SANIVALLI

Boston, MA | rsanivalli@gmail.com | (443) 564-1591 | GitHub: [GitHub.com/Ravi2001321](https://github.com/Ravi2001321)

EDUCATION

Clark University — Worcester, MA

Master's degree in Data Analytics [STEM], (ML, Data Visualization, Data Management) Aug 2022 – May 2024 | GPA: 3.7

BV Raju Institute of Technology (BVRIT) — India

Bachelor of Technology in Electronics and Communications Engineering, (Minor: AIML) Aug 2018 – Jun 2022 | GPA 7.01

PROFESSIONAL EXPERIENCE

MFS Investment Management — Boston, MA

Support Engineer (Level 2)

Feb 2025 – Present

- Automated monitoring & incident resolution using **Python & C#**, reducing downtime for **500+ enterprise users**.
- Developed **REST APIs** and integrated **SQL-based reporting** to streamline IT operations.
- Improved system reliability in **Linux/Windows cloud-first environments**, collaborating with developers on **scalable solutions**.

Bright Mind Enrichment and Schooling (BMEAS) — Remote

Data Analyst (Volunteer)

Sep 2024 – Jan 2025

- Designed & deployed **ML pipelines on Azure** (NLP classification), cutting inference latency by **35%**.
- Built **ETL pipelines (50M+ rows weekly)** integrating SQL & C# for backend workflows.
- Developed **real-time Power BI/Tableau dashboards** for KPI monitoring across distributed systems.
- Contributed to **AI/ML model deployment** and **cloud-native applications** impacting 10,000+ learners.

Cerebral Technologies, Inc. — Irving, TX / Remote

Data Engineer (Intern)

Jan 2024 – May 2024

- Built **RESTful APIs for ML model inference on Azure ML**, enabling cloud-native deployments.
- Implemented **CI/CD pipelines with GitHub Actions** for .NET backends, improving release reliability by **25%**.
- Conducted **SQL-based EDA** and developed **Power BI dashboards**, enhancing insights by **30%**.
- Mentored interns in **backend development & AI integration**, fostering team-wide skill growth.

PROJECTS

Conversational AI Assistant (LLM + RAG) (Self-Project)

- Fine-tuned **LLMs** with Retrieval-Augmented Generation for domain-specific Q&A.
- Built middleware in **C# + Web APIs**, connecting AI services to applications.

Vehicle Insurance Fraud Detection (ML Pipeline)

- Achieved **90% accuracy** using Python ML classification models.
- Designed **SQL + Azure** pipelines for scalable deployment & monitoring.
- Used **profiling tools** to measure training performance and visualized model metrics with Matplotlib and Seaborn.

Stock Price Prediction (Time-Series ML)

- Trained **Random Forest Regressor** on 5 years of stock data (**$R^2 \approx 0.87$**).
- Engineered **technical indicators (SMA, RSI)** and visualized correlations using **Matplotlib/Seaborn**.
- Visualized correlations and trends using Matplotlib and Seaborn to assist in **data-driven decision-making**.

TECHNICAL SKILLS

Languages & Frameworks: Python, C#, .NET Core/6+, SQL, R, C++, Java (basic), Angular, React (familiar).

Cloud & DevOps: Azure (Azure ML, Cognitive Services), AWS (basic), Git, GitHub Actions, CI/CD pipelines.

AI/ML & Data: LLMs, RAG, NLP, Deep Learning, Random Forests, Distributed Training, Data Visualization.

Systems & Tools: Linux, Windows, Networking Protocols, Profiling & Debugging, Middleware Development.

Visualization: Power BI, Tableau, Matplotlib, Seaborn.
