

venu RAVURI

Venubrdev11@gmail.com | +1(224)5192440 | Decatur, GA 30033

Summary

A seasoned 4+DevOps Engineer with a proven track record at PNC Financial, I excel in deploying CI/CD pipelines and cloud architectures, notably enhancing software delivery reliability by 40%. Skilled in collaboration and Agile methodologies, my work has consistently improved operational efficiency and project outcomes.

Skills

- SDLC
- Agile
- Waterfall
- Chef
- Ansible
- Nagios
- Docker
- Kubernetes
- EC2
- ELB
- IAM
- S3
- CloudWatch
- Redshift
- Autoscaling
- CloudFormation
- Maven
- Gradle
- Jenkins
- Python
- Shell scripting
- PowerShell
- SQL Server
- MySQL
- PostgreSQL
- Oracle
- MongoDB
- Apache Tomcat
- Git
- GitHub
- GitLab
- Jira
- Linux
- Windows
- Mac
- Scripting languages
- Software development
- Continuous deployment
- Windows operating system
- Linux operating system
- Version control systems
- API development
- System administration
- Monitoring and logging
- Test automation
- Continuous integration

Experience

PNC Financial | Texas City, USA

DevOps Engineer

01/2024 - Current

- Implemented various Software Development Life Cycle (SDLC) methodologies, including Agile and Waterfall, to enhance the efficiency and organization of software development and delivery workflows.
- Coordinated testing and validation procedures through software development lifecycle.
- Managed infrastructure components including virtual machines, storage devices, networks.
- Integrated object-oriented design and development techniques into projects to support usability goals.
- Created CI and CD pipelines with Jenkins and Docker to automate the build process of applications.
- Managed the deployment of containerized applications through Docker, utilizing Kubernetes for orchestration to ensure robust service availability

and scalability.

- Considered and maintained cloud architectures using AWS services such as EC2, ELB, IAM, S3, CloudWatch, Redshift, Autoscaling, and CloudFormation, successfully creating secure and scalable infrastructures that improved uptime by 30%.
- Developed and optimized CI/CD pipelines with tools like Maven, Gradle, and Jenkins, automating build, testing, and deployment processes, resulting in a 40% reduction in deployment times, and increased reliability of software delivery.
- Utilized Terraform for infrastructure as code, ensuring consistent resource provisioning, while leveraging Docker for application containerization, and orchestrating Kubernetes clusters, enhancing scalability and resource efficiency by 25%.
- Worked successfully with diverse group of coworkers to accomplish goals and address issues related to our products and services.
- Collaborated with cross-functional development teams using Jira for effective project management and issue tracking, ensuring clear communication, and timely project progress.
- Implemented automation tools such as Ansible, Puppet, Chef, Terraform to streamline operational tasks.
- Automated cloud deployments using Terraform and Ansible to enhance operational efficiency.
- Designed procedures for deploying applications on Kubernetes clusters using Helm charts or Terraform modules.
- Worked closely with DevOps teams for continuous integration and delivery of software products using Terraform or Ansible playbooks.
- Integrated third-party tools with AWS services such as Terraform or Ansible Tower.
- Implemented automated processes using Infrastructure as Code tools like Terraform or CloudFormation for provisioning resources on public clouds.
- Completed day-to-day duties accurately and efficiently.
- Collaborated closely with team members to achieve project objectives and meet deadlines.
- Monitored application health using various monitoring tools like Zabbix, Nagios, CloudWatch.
- Conducted regular reviews of system performance data collected from monitoring tools.
- Installed and configured monitoring tools such as Splunk to track real time application performance metrics from different sources including logs stored on S3 buckets.
- Conducted regular performance monitoring of LAN, WAN, VPN components using various monitoring tools.
- Monitored performance metrics using monitoring tools like Splunk and New Relic.
- Monitored server performance metrics using monitoring tools and created reports as needed.
- Performed root cause analysis on incidents reported by users or monitoring tools.
- Created databases to store electronic data.
- Maintained customer databases and tracked client interactions.
- Performed periodic backups of the databases.
- Performed quality assurance testing of SQL code for accuracy and performance.

Elmhurst University | Elmhurst, IL
Teaching Assistant (Cloud Computing)
08/2022 - 04/2023

- Developed SQL queries to extract and analyze data from multiple sources.
- Employed integrated development environments (IDEs).
- Designed and delivered engaging presentations on cloud computing concepts, incorporating real-world examples such as Netflix's deployment on AWS to enhance student understanding.
- Conducted follow-up sessions for students needing extra help.
- Surveyed new cloud technologies, incorporating Azure Databricks into instructional content.
- Engaged in industry-led activities for updated insights on cloud technologies.
- Managed inventory and supplies to ensure materials were available when needed.
- Applied expertise in troubleshooting complex problems efficiently.
- Enforced rules for behavior and established expectations for student conduct in accordance with school guidelines.
- Assisted with the development of Individual Education Plans.
- Established positive relationships with students, parents, fellow teachers and school administrators.
- Attended various training sessions for skill enhancement.

Designed supplemental educational materials and aids for lessons.

Magna Infotech | India, India
DevOps Engineer
01/2020 - 06/2022

- Championed the integration of Agile methodologies across development and operations teams, promoting a culture of teamwork, openness, and ongoing enhancement of processes.
- Developed and maintained PowerShell automation scripts for system configuration and deployment tasks, reducing manual effort by 50%, and improving overall operational efficiency.
- Designed and managed Splunk dashboards to visualize and analyze data from Prometheus and other monitoring tools, facilitating performance assessment and trend identification, which led to a 35% improvement in response time for issue resolution.
- Analyzed and addressed performance bottlenecks in containerized environments, optimizing resource distribution, and enhancing application stability using Kubernetes and OpenShift monitoring tools.
- Managed and monitored AWS cloud services, including EC2, S3, and RDS, ensuring high performance and scalability for cloud-based applications, resulting in a 40% increase in application uptime.
- Created CI and CD pipelines with Jenkins and Docker to automate the build process of applications.
- Implemented systems automation using scripting languages like Python and Bash.
- Combined root-level authentication and authorization technologies with ongoing system design to harden finished solutions.
- Updated software upon release of vendor patches to mitigate vulnerabilities.
- Deployed and supported infrastructure automation and configuration management tools.
- Established and improved Ansible playbooks for automating server provisioning and configuration, reducing manual tasks by 60%, and cutting deployment times by 50%.
- Streamlined build, testing, and deployment processes with Maven and Gradle, while integrating monitoring solutions into CI/CD pipelines with

Jenkins for real-time visibility into build progress and deployment statuses.

Education and Training

Elmhurst University | Elmhurst, IL

Master of Science in Computer Science Information Technology

07/2022

RVR & J.C. College of Engineering | Rvr&jc College Of Engineering, India

Bachelor of Science in Electrical Electronics Engineering

04/2022

Certifications

- AWS Certified Administrator
- Python with Artificial Intelligence
- Salesforce Platform App Builder
- Interview Preparation Toolkit for Freshers
