Education

- **B.S, Computer Science**
 - Georgia State University, Atlanta, GA May 2022
- **M.S, Analytics**
 - Georgia Institute of Technology, Atlanta, GA Expected Dec 2026

Professional Work Experience

- **LexisNexis Risk Solutions** – Software Engineer II Sept 2022 – Jan 2024
 - Developed search functionality using ECL on HPCC platform for clients to find matches within 2 seconds from the full production database containing 20 billion+ records
 - Primary support for Location ID SaaS service, enhancing service reliability, debugging issues, and supporting all future changes by participating in full SDLC per ticket
 - Created an automation testing system to test and verify production build data utilizing CRON jobs saving 100+ work hours
 - Built testing system to check precision and recall on all linking services for on prem production data vs cloud
 - Generated C2B and B2C reports of datasets containing 35,000,000+ records for clients in a promptly manner
 - Developed a client facing standardized analysis process that streamlined multiple services into one, cutting down runtime by 50%

Projects

- **Full stack NBA Web App (Python, Flask)** - Created a web application to track your favorite NBA player statistics. Made using Flask micro framework, PostgreSQL database system, NBA REST API calls and Heroku with added unit tests to check backend logic. Application allows you to login and logout securely and search which NBA player to track and displays the player along with his most recent stats.
- **Full stack Movie Explorer Web App (Python/Flask/JavaScript/React)** – Developed a web application for users to explore and review popular movies. Made using Python/Flask, JavaScript/React, Heroku PostgreSQL relational database system, Wikipedia/TMDB REST API calls with backend logic checked with added unit tests. Application allows for secure login and logout and allows the user to leave a comment and rating on any given movie.

SKILLS

- **Programming:** ECL, Python (Flask, unittest), Java (Spring Boot, JUnit), JavaScript (React.js, React Native), HTML, CSS, SQL (MySQL, PostgreSQL, SQL Server)
- **Tools & Platforms:** Git, GitHub, Excel, CI/CD, Jira, Power Bi, Tableau, WordPress, AWS(EC2)
- **Technologies** - Restful API's, API Integration, HTTP Requests
