

Rebecca Brown

CAREER OBJECTIVE

Results-driven data analytics professional seeking career advancement. Previous exposure to database technology and experience writing code ticks in JIRA. Proven track record for data analysis, data visualization, algorithm analysis, and code testing. Proficient customer service history working directly with customers. Experience working on real data analysis projects and communicating technical concepts to a non-technical audience.

EVIDENCE OF EXCELLENCE

Brilliant Mode, Las Vegas, NV

AI Research & Developer

- Developed AI chatbots using ChatGPT in FlutterFlow and Google Gemini, enhancing user engagement and data-driven decision-making
- Utilized Python and Streamlit for AI development, demonstrating strong technical skills in digital product creation

Arrow International, Las Vegas, NV

Associate Producer

- Improved pre-production process by adopting a project management routine which lowered production costs by 20%
- Discovered through data analysis what games were most popular among players
- Ran statistical analysis with C# tools to predict gaming profitability
- Detected software issues/bugs and reported through JIRA

Starbucks, North Las Vegas, NV

Barista

- Provided excellent customer service to customers in a fast-paced environment
- Achieved a 15% sales increase by suggesting added espresso shots to drinks or pastries to compliment the perfect blend of coffee

United States Marine Corps (USMC)

Heavy Equipment Engineer

- Cut quarterly costs of \$25,000 by creating a recycling system for military equipment
- Improved fuel costs by 12% for training exercises by implementing strict procedures for Laser Grade Control Systems

EDUCATION

B.A. Computer Science

University of Nevada Las Vegas

FinTech Coding Bootcamp

University of California Berkely

A.A. General Studies

College of Southern Nevada

PROJECTS

Traffic Simulator – simulated traffic using semaphores and threads in C

Data Clustering Methods with Cryptocurrency – K-means algorithm using Python

SKILLS

Programming languages: C++, Python, C, Linux, SQL, MATLAB, R

Computer software/ frameworks: Excel, PowerPoint, JIRA, Pandas, Matplotlib, Jupyterlab, Tableau, Visual Studio

Technical: Object Oriented Programming, Software Testing, Troubleshooting, Bug Detection, Algorithm Analysis, Software Lifecycle, Data Analysis, Data Visualization, Agile Methods

Soft Skills: Written and Verbal Communication, Public Speaking, Customer Centric, Customer Service
