Gresham, Oregon

EDUCATION

2021

B.S. Computer Science
University of North Carolina at Charlotte

2019

A.A. Accounting
Central Piedmont Community College

CERTIFICATIONS

2024

**Statement of Completion:
Data Engineering in Python**
DataCamp

SKILLS

- Python
- SQL
- AWS Services (AWS Lambda, AWS S3, AWS Gateway)
- Tableau
- Data Analysis
- API Integration
- Database Management

WORK EXPERIENCE

Data Analyst and Developer

Project Indigo

Feb 2022 - Nov 2023

- Collaborated with the data analytics team in Agile sprint planning to build ETL pipelines, to ensure seamless data flow between systems
- Proficiency in SQL for data extraction and transformation
- Developed and deployed microservices using AWS Lambda, while also integrating AWS API Gateway to expose RESTful endpoints for client applications to enhance data accessibility and improved the overall user experience
- Took a proactive role in automating data integration between systems by creating and managing webhooks. Leveraged Python and JSON payloads to optimize data transfer efficiency, making critical contributions in a fast-paced startup environment.
- Collaborated with cross-functional teams to enhance data organization and workflow efficiency within Figma

Office Administrator

ProCare Property Services

Mar 2019 - Apr 2021

- Analyzed communication from financial services institutions to compile action items for contractors in Oregon and Washington regarding foreclosed properties
- Managed work order flow and logistics by relying on various software tools such as Google Maps and Excel increasing profits by 15% through efficient communication and optimal scheduling resulting in lower work order rejection rates
- Advised and worked through issues with contractors such as illegal property occupancy and work order scope

Teacher's Assistant, Intro to Computer Science I

UNC Charlotte College of Computing and Informatics

Sept 2020 - Dec 2020

- Assisted 120 students with questions about lecture and laboratory course work and guided them to solutions on conceptual problems regarding loops, functions, calls, etc.
- Evaluated student performance and provided feedback to the instructor regarding potential ways to address computer science concepts in a more understandable manner
- Attended class meetings and labs to gain perspective on what kind of instruction new students were exposed to regarding computer science concepts
- Performing various data entry tasks
