EDUCATION

B.Sc. in Data Science, Minor in Behavioral Neuroscience (3.9/4.0)

Sep. 2022–Dec. 2025

Khoury College of Computer Sciences, Northeastern University

Boston, MA

- *Relevant Courses:* Advanced Programming with Data, Algorithms & Data, Database Design, Large-Scale Information Storage and Retrieval, Linear Algebra, Probability & Statistics, Information Presentation and Visualization, Human Computer Interaction, Artificial Intelligence, Machine Learning & Data Mining 1 and 2, and Neural Networks.

SKILLS

Programming Python, R, Java, MySQL/SQL, C++, JavaScript/TypeScript, Prisma ORM, HTML/CSS

Tools scikit-learn, VSCode, Jupyter, PyTorch, TensorFlow, Git, LaTeX, Linux, DBeaver, PyCharm, Docker

PROJECTS

The Five Factor Model of Personality and its Relationship to Drug Behavior 🔗

Oct. 2023–Present

- Applied several machine learning models to analyze relationships between drug use behavior and quantified personality evaluations, earning *1st place* in the Northeastern Data Club's Snowball Project Competition.
- Determined that caffeine, crack, and amyl had the highest predictive accuracies across tested models, including *Logistic Regression* and *Decision Tree Classifier*.
- Currently developing an *interactive dashboard* to explore relationships between drugs and specific personality traits.

Understanding Student Retention in Higher Education 🔗

Oct. 2023

- Used machine learning techniques such as *Random Forest Regressor* and *Linear Regression* to analyze the attributes of universities that contribute most to retention rate.
- Analyzed results and of the features tested, SAT scores, faculty salaries, and students' earnings after 6 years of entry had the greatest impact on a university's retention rate.

GoRental - Database Application

Jun. 2023

- Combined Python and SQL to create an application that navigates and modifies a database for a rental company.
- Implemented a user-friendly interface that enables employees to track and update information concerning products as well as customers and fellow staff.

EXPERIENCE

Database Developer & Research Assistant

Jul. 2024–Apr. 2025

Center for Inclusive Computing 🔗

Boston, MA

- Designed and implemented a comprehensive database to track partner universities and intervention programs to improve data accessibility and organizational efficiency.
- Conducted literature reviews and participated in discussions on academic articles about advancements in AI, ethics of technological development, and computer science education.
- Performed data collection and analysis to study patterns and best practices in computer science curricula.

Computer Science Intern

Mar. 2022–Jun. 2022

Albany ITG, LLC 🔗

Saratoga Springs, NY

- Gained experience with APIs, database management and manipulation, and computer vision programming.

Server, Hostess, Busser

May 2022–Aug. 2023

Saratoga Arms Hotel 🔗

Saratoga Springs, NY

- Showcased strong teamwork and communication skills to provide personalized customer service to guests in an upscale hotel restaurant

Genetic Genealogy Research Intern

Jun. 2021–Sep. 2021

DNA Finders 🔗

Saratoga Springs, NY

- Leveraged forensic genetic genealogy techniques to research local cold/missing person cases and identify unknown familial connections.

ACHIEVEMENTS

Graduated *summa cum laude*, Northeastern University

2025

1st Place in the Snowball Competition, Northeastern University Data Club

2023

- Awarded 1st place in a competition against 10 other teams based on the strength of the project proposal and execution.

Dean's List, Northeastern University

2022-2025

Honors Scholarship, Northeastern University

2022-2025

EXTRA-CURRICULARS & INTERESTS

Member @ Data Club

Northeastern University | Sep. 2023-2025

Member @ NEURONS (NU Researchers of Neuroscience)

Northeastern University | Sep. 2022-2025

Member @ DIY Craft Club

Northeastern University | Sep. 2022-2025

Interests: Woodworking, Yoga, Crafting
