EXPERIENCE

City of Morrow

MORROW, GA

IT Technician

April 2024 - February 2025

- Re-designed the networking to link the fire department, police department, our event venues, and city hall
- Worked on Flask-React web for sanitation to track which houses have paid and been picked up, including updating payment status daily with a custom-built API using data from BS&A
- Coded a web app using Javascript, Node.js, and React and deployed on GitHub Pages for information on The District, the city's outdoor event venue.
- Photography for city events, including editing using Adobe suite
- Led production, including wiring the LED screens, audio, photography, and lights for all events

IT Supervisor

February 2025 - Present

- Implemented AI chatbot for events pages to scrape data
 - Coded AI voice agent using Asterisk and OpenAI, hosted with AWS, for city hall's reception
 - Integrated Tickera, Checkinera, and WooCommerce via PHP and REST APIs to enable city-wide event ticketing, seat selection, and vendor payments through a custom WordPress portal
 - Supervised in the development of Google Ads, and analyzed data to present to the mayor and council
 - Leveraged AI platforms to analyze the best timing to reach maximal exposure of city-owned billboards
 - Built WiFi landing page and hosted in AWS for public access from our fiber, offering one gigabyte throughput
-

PROJECTS

WasteWise

ATLANTA, GA

Full Stack Developer, founder
