(341) 213-9661

EDUCATION

Seattle, WA	Seattle University	September 2022 – Present
• Majors: Computer Science (B.S.) • Undergraduate Coursework: Concurrency Programming, Algorithms & Data Structures, Object Oriented Programming, Artificial Intelligence Systems, Database		

LANGUAGES AND SKILLS

-
- **Languages:** Java, C++, Python, JavaScript, C#, SQL, Typescript, HTML, CSS, Material UI
 - **Technologies and Frameworks:** Unity, React, Node.js, Arduino, Next.js, Firebase, Powershell

EXPERIENCE

SWE Fellow 2024	Headstarter AI	July 2024 – September 2024
• Designed and developed multiple projects, including an AI chatbot and a finance tracker, leveraging Next.JS. • Engineered robust database integration to enhance functionality, optimize performance, and ensure seamless data availability. • Integrated APIs and selected efficient AI models to develop AI-driven web applications, creating clear instruction sets to guide AI behavior in both individual and team-based projects.		

SELECTED PERSONAL PROJECTS

Fighting Robot

- Collaborated with a team to test microcontroller pin connections, ensuring proper input/output signal transmission for accurate joystick movement across all channels.
- Connected microcontroller pins to key robot components, including the spinner and motor, ensuring seamless communication for optimal performance in the fighting competition.
- Utilized: Arduino, C++, git

Platform Game

- Developed a platforming game in Unity implementing core gameplay mechanics while ensuring smooth user interaction and responsive controls.
- Implemented game object spawning while optimizing performance by removing off-screen objects to prevent excessive memory usage.
- Utilized: Unity, C#

AI ChatBot

- Developed an AI ChatBot website by selecting an efficient AI model, coding core functionalities, and optimizing response generation for improved speed and accuracy.
- Implemented a message-sending function that enables the AI to process and interpret user input, allowing it to generate accurate, context-aware responses.
- Utilized: TypeScript, Next.JS, Node.JS, CSS

HONORS AND AWARDS

-
- **Dean's list** – Received in December 2022, and March 2022.
