

REHAN BASHIR

Full-Stack Software Engineer | AI/ML Specialist

+1 (323) 955-1423 | rbashir2001@gmail.com | Virginia, USA

LinkedIn: linkedin.com/in/rehanbashir | GitHub: github.com/rehanbashir

PROFESSIONAL SUMMARY

Innovative Software Engineer with expertise in AI-driven solutions, scalable backend systems, and modern web applications. Proven track record of delivering high-impact projects using cutting-edge technologies including RAG, LLMs, and cloud platforms. Experienced in working with development teams and managing client relationships with demonstrated success in both enterprise and freelance environments. Skilled in Python, JavaScript, MERN stack, and cloud technologies with a focus on creating intelligent systems that solve real-world problems.

PROFESSIONAL EXPERIENCE

Software Engineer

Freelance Team - Upwork

Remote | December 2024 - Present

- Collaborate with a team of 3 developers delivering custom software solutions to international clients with 100% client satisfaction rate
- Successfully completed 4 projects generating \$10,000+ in revenue through strategic client acquisition and retention
- Specialize in AI/ML integrations, full-stack web applications, and cloud-based solutions using React, Node.js, and Python
- Manage complete project lifecycles from requirements gathering to deployment and maintenance

Software Engineer

LUMS SBASSE

Remote | December 2024 - Present

- Develop sophisticated web applications using Vite.js, TypeScript, React, and Firebase for academic research projects
- Lead implementation of LLM-powered features and advanced NLP techniques for intelligent data processing
- Collaborate with research teams to productionize AI models and optimize performance metrics
- Reduced application load time by 40% through code optimization and strategic caching implementations
- Design and implement scalable architectures supporting 1000+ concurrent users

Software Engineering Intern

PakWheels.com

Lahore, Pakistan | July 2024 - September 2024

- Resolved 20+ critical backend issues improving platform stability and user experience across web and mobile platforms
- Architected and implemented RESTful APIs for car inspection appointment scheduling system serving 500+ daily bookings
- Refactored legacy codebase resulting in 15% performance improvement and enhanced maintainability
- Implemented automated testing suite increasing code coverage from 45% to 78%
- Collaborated with cross-functional teams to deliver features aligned with business objectives

Tech Disruptor (AI Engineer)

UrduX

Remote | August 2023 - August 2024

- Engineered DAOChatbot achieving 95% query resolution success rate using Retrieval-Augmented Generation (RAG) architecture
- Developed Gender-DEI Bot with 87% accuracy in bias detection using DistilBERT and advanced sentiment analysis
- Implemented voice-based interaction features using Flask and React for enhanced accessibility
- Reduced model inference time by 60% through optimization techniques and efficient caching strategies
- Processed 10,000+ monthly queries with sub-second response time

KEY PROJECTS

DAOChatbot - Intelligent Query System | UrduX

- Developed enterprise-grade RAG-based chatbot with 30% accuracy improvement over baseline models
- Integrated MERN stack for privacy-focused query tracking and comprehensive analytics dashboard
- Implemented vector databases and semantic search for efficient information retrieval

Technologies: Python, Flask, React, MongoDB, OpenAI API, Pinecone, LangChain

Gender-DEI Bot - Bias Detection Platform | UrduX

- Led development of AI-powered bias detection system achieving 85% accuracy on diverse datasets
- Custom-trained transformer models for nuanced sentiment and bias analysis
- Deployed to production serving 500+ daily active users with 99.9% uptime

Technologies: Python, DistilBERT, TensorFlow, React, PostgreSQL, AWS

Enterprise Parcel Management System | Akisyah Trading (Fiverr Client)

- Built comprehensive package tracking application with QR code scanning and real-time updates
- Reduced package processing time by 45% through automation and workflow optimization
- Integrated with multiple shipping APIs (FedEx, UPS, DHL) for seamless logistics management

Technologies: Node.js, Express, MongoDB, React Native, REST APIs

EDUCATION

Bachelor of Science in Computer Science

FAST National University of Computer and Emerging Sciences

Islamabad, Pakistan | 2020 - 2024

- Specialization: Generative AI and Natural Language Processing
- Relevant Coursework: Machine Learning, Deep Learning, Cloud Computing, Data Structures, Algorithms, Software Engineering, Database Systems
- Capstone Project: RAG-based Enterprise Chatbot Solution (Grade: A+)

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL, HTML/CSS

AI/ML Technologies: Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Natural Language Processing (NLP), DistilBERT, TensorFlow, PyTorch, Generative AI, LangChain, Vector Databases

Web Development: React.js, Node.js, Express.js, MongoDB, Vite.js, Next.js, RESTful APIs

Frameworks & Libraries: Flask, Firebase, MERN Stack, Redux, Tailwind CSS

Cloud & Databases: AWS (EC2, S3, Lambda), Azure, MongoDB, MySQL, Pinecone

Tools & Methodologies: Git, Agile/Scrum, JIRA, Software Requirements Specification (SRS)

Professional Skills: Technical Business Writing, Documentation, Client Communication, Team Collaboration

ADDITIONAL INFORMATION

- **Client Satisfaction:** 100% satisfaction rate on Upwork with 4 successfully delivered projects
- **Performance Optimization:** Consistent track record of improving application performance by 15-60%
- **Communication:** Excellent technical business writing skills with fluency in English and Urdu
- **Work Authorization:** Authorized to work in the United States
- **Availability:** Immediate
