

REKHA MUPPANENI

rekhamuppaneni7@gmail.com | (+1) 518-330-9424 | Albany, New York, United States Of America 12206

Personal Summary

Results-driven **Data Analyst** with expertise in **Python, SQL, Power BI, and Tableau**. Specializing in transforming complex data into strategic insights, I leverage **agile** methodologies to deliver high-impact analytics. Collaborative team player with a proven ability to drive data-informed **business decisions** and optimize operational efficiency through advanced analytical solutions

Technical Skills

- **Cloud Platforms:** Experience with **AWS (EC2, Lambda, S3, ECS Fargate)** for scalable data storage and processing.
- **IaC:** Used **CloudFormation** to automate analytics infrastructure.
- **Data Pipelines:** Worked with **Apache Flink, Kafka, Airflow** for real-time and batch data workflows.
- **Querying & ETL:** Skilled in **SQL** and **Python** (Pandas, FastAPI) for data extraction, transformation, and analysis.
- **Programming:** Proficient in **Python, Java (Spring Boot), and Scala** for data applications.
- **AI/ML Tools:** Familiar with **LangChain, OpenAI, Bedrock, RAG**, and **LLMOps** for AI-driven insights.
- **Search & Indexing:** Experience with **OpenSearch, Elasticsearch**, and **Vector DBs**.
- **DevOps & Monitoring:** Worked with **Jenkins, Datadog, CloudWatch, Kibana, X-Ray** for analytics pipeline visibility.

Work Experience

Aprojects | Albany, New York
Junior Data Analyst
08/2025 - Current

- Assist in collecting, analyzing, and interpreting data from inspections and maintenance activities to identify trends, anomalies, and opportunities for improvement.
- Support the development of dashboards and reports to provide insights for management and technical teams.
- Ensure accuracy and integrity of data by validating and cross-referencing information from multiple sources.
Identify performance gaps and recommend enhancements to optimize operational efficiency.
- Translate complex data into actionable strategies that enhance efficiency and compliance with industry standards
Qualifications & Requirements.
- Contribute to predictive analytics to forecast equipment reliability and present findings through clear visualizations to aid decision-making.

Albany Distilling Co. | Albany, NY
Junior Data Analyst Intern
02/2025 - 08/2025

- Helped build internal tools using **Python (Flask)** and **React** for tracking inventory and sales.
- Facilitated in designing **SQL** databases for production and sales data storage.
- Developed basic **Power BI dashboards** for inventory and production insights.
- Aided automation of data entry and reporting tasks, reducing manual errors
- Participated in **Agile meetings** and contributed to team planning and

testing.

- Focused on writing clean, organized code and learning from code reviews.

GloMan Sourcing India Pvt. Ltd | Ballari, India

Full Stack Web Developer

08/2022 - 04/2023

Leveraged SQL to extract and analyze data from relational databases, enhancing reporting efficiency by 25% and supporting regular business unit deliverables.

- Cleaned and transformed raw business data to improve quality and consistency, preparing datasets for detailed exploratory analysis.
- Designed and maintained interactive dashboards using Power BI and Excel to visualize sales trends and operational metrics, thereby supporting strategic decisions.
- Conducted thorough exploratory data analysis (EDA) to uncover patterns, guide insights, and inform actionable recommendations for business improvements.
- Developed predictive models with Python (scikit-learn) to forecast demand and customer behavior, contributing to data-driven decision-making.
- Collaborated with senior analysts and business teams in weekly meetings to present clear, actionable insights and recommend strategic solutions.

Education

University At Albany, SUNY | Albany, NY

M.S. in Information Science

Expected in 01/2026

GPA: 3.6/4.0

RYM Engineering College | Ballari, India

B.Tech in Computer Science

05/2023

GPA: 3.6/4.0

Projects

Fraud Detection System with Decision Tree & SMOTE :

- Fraud detection in credit card transactions utilized a Kaggle dataset with 200,000 credit card transactions to predict anomalies with high precision and develop predictive models accurate for risk management, cleaned and preprocessed data, removed outliers, missing values, transformed data to extract insights, and data quality improvement using Python. The resampled dataset dealt with imbalances between the fraud and non-fraud transaction ratios using SMOTE. I built logistic regression, Gaussian Naïve Bayes, and decision tree classifier models to predict a fraud transaction. Achieved accuracy of 86.47% for decision tree classifier model, indicating its effectiveness in identifying fraud.

Real-Time Stock Price Forecasting with LSTM & Dash :

- Stock price forecasting with LSTM, LSTM-based real-time stock prediction with a Plot Dash dashboard, used AWS EC2, and time-series analysis for latency-sensitive insights
Optimized and efficient color prediction algorithm using Mask R-CNN, designed an algorithm to efficiently predict the maximum color of objects detected by Mask R-CNN
Stock price forecasting with LSTM, LSTM-based real-time stock prediction with a Plot Dash dashboard, used AWS EC2, and time-series analysis for latency-sensitive insights
Optimized and efficient color prediction algorithm using Mask R-CNN, designed an algorithm to efficiently predict the maximum color of objects detected by Mask R-CNN.
- **Skills:** LSTM · Time Series Forecasting · Stock Price Prediction · Real-Time Data Processing · Plot Dash · AWS EC2 · Dashboard Development · Mask R-CNN · Computer Vision · Object Detection · Color Prediction Algorithm · Model Optimization · Python (Programming Language).

Semi-Humanoid Service Robot for Elderly Assistance :

- Semi-humanoid autonomous robot for the elderly and disabled, embedded with a ROS (Robotic Operating System) operated autonomous robot with a robotic arm to make it serviceable and to help older people with specific tasks,

developed a robot featuring object and facial recognition and natural language processing technologies
Semi-humanoid autonomous robot for the elderly and disabled, embedded with a ROS (Robotic Operating System)
operated autonomous robot with a robotic arm to make it serviceable and to help older people with specific tasks,
developed a robot featuring object and facial recognition and natural language processing technologies.

- **Skills:** Robotics, Robot Operating System (ROS), semi-humanoid robot design, object recognition, facial recognition, natural language processing (NLP), autonomous navigation, assistive technology, computer vision, embedded systems, AI for healthcare
