Bachelor of Science: Information systems

University Of Illinois At Urbana-Champaign

2019

Champaign, IL

- GPA-3.79/4.00

- Gies College of Business Scholarship Recipient

Associate of Science: Information Technology

College of Lake County

2017

Grayslake, IL

- GPA 3.65/4.00

Projects

- Database Design and Management- Worked on a team of five to develop a working database for our client Maker-labs. Made ER-Models and used SQL. We did a final presentation with the database.
- Information System Analysis and Design- Worked in a team of three people to work on an app idea. Created functional and non-functional requirements for an app. We made use-case diagrams, user stories, activity diagrams, class diagrams, state-machine, sequence diagrams and a prototype for an app. I learned about different stages of SDLC. I learned about agile methodology.
- Data Science and Analytics- Worked in a group of four, to choose a data set, use R and Tableau to analyze the data, come up with our finding and presented them in front of the class.
- Consulting- In a team of five people, I did consulting for a client from Wisconsin. Meet with clients on a weekly basis and did market research and figure out if they are missing a niche. This project was done with the help of analytical tools like R and Tableau.
- Design and Managing Organization- In a team of five, we choose a company which is having a performance gap right now. Used congruence model to find out the performance gap and the reasons behind that gap.

Work History

Consultant

Aug 2018 - Current

ElImprovement

Racine, WI

- I did product mix analysis, recommended which brands to add or drop.
- Data analysis in Tableau to figure out which products are not generating revenue and which segments are generating the most revenue.
- Figure out with the help of data, which Parent categories make the most revenue and which is not performing up to the expectations.
- Based on the research and analytics we gave recommendations.
