

VENKATA UDAY BOGGARAPU

Chicago, IL | (312) 868-9878 boggarapuuday@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Graduate student pursuing an M.Sc. in Computer Science with hands-on experience in full-stack development, machine learning, and deploying cloud-based solutions. Proven ability to architect scalable web applications and drive data-driven solutions. Demonstrated success collaborating across cross-functional teams and delivering impactful projects through academic research and internships.

EDUCATION

ILLINOIS INSTITUTE OF TECHNOLOGY, CHICAGO, IL

Master's in computer science

Aug 2023 - Present

Expected GPA: 3.5/4.0

VIT-AP University, Amaravati, India

Bachelor of Technology in Computer Science and Engineering

Jun 2019 - Apr 2023

CGPA: 3.65/4.0

SKILLS

Programming Languages: Proficient in Python, Java, JavaScript; working knowledge of R, PHP, HTML/CSS

Web & Frameworks: ReactJS, Django, Flask, Node.js, Material UI, Flutter

Databases: MySQL, PostgreSQL, MongoDB, Redis, Cassandra, Neo4j; exposure to NoSQL and database optimization

Tools & Platforms: Git, Figma, Google Colab, Android Studio, Visual Studio, WAMP

Cloud & DevOps: AWS (S3, EC2), Firebase, Docker (Basics), Cloud Computing (AWS, Firebase basics)

Machine Learning & Data Tools: Scikit-learn, Pandas, NumPy, Matplotlib, TensorFlow, Data Analytics

WORK EXPERIENCE

Full Stack Developer Intern - Pay matrix, Hyderabad, India

Jan 2023 – May 2023

- Collaborated with a cross-functional team to architect and deliver a scalable internal communication platform.
- Delivered a full-stack communication tool used by ~30 internal users for screen sharing and real-time messaging.
- Integrated CometChat SDK to enable seamless text, voice, and video communication within the application.
- Secured authentication flow with Firebase, ensuring access control for 100% of registered users.
- Enhanced internal team productivity by streamlining communication workflows, reducing coordination delays by ~30% across 3 departments.

PROJECTS

LeaseLedger – Smart Property Lease Management System

Tech Stack: ReactJS, Node.js, Express.js, Tailwind CSS, AWS(EC2, DynamoDB, Jenkins), Firebase Authentication, REST API

- Built a full-stack platform for managing leases, rent cycles, and maintenance between landlords and tenants.
- Secured user authentication and route access with Firebase Authentication and backend token verification.
- Developed a serverless backend using Node.js, Express, and DynamoDB, optimizing data storage and retrieval.
- Implemented CI/CD pipelines with Jenkins and GitHub Webhooks for seamless AWS EC2 deployment.

Battleships Multiplayer Game

Tech Stack: Flutter, Dart, RESTful APIs, HTTP, SharedPreferences, Provider

- Engineered a real-time multiplayer Battleships game tested with 10+ users for stability and real-time responsiveness.
- Integrated secure authentication with RESTful APIs, designed a 5x5 interactive grid with visual game indicators.
- Enhanced performance using asynchronous state management via FutureBuilder and StreamBuilder.
- Modularized core components to improve maintainability and reduced load latency by ~20%.

Car Rental System

Tech Stack: Html, CSS, JS, PHP, SQL

- Assembled a full-stack web platform to browse and reserve vehicles via secure user login.
- Implemented real-time vehicle availability, user registration, and booking confirmation.
- Connected to MySQL backend for real-time transaction updates and record handling.
- Reduced local booking process complexity by 40% through interface simplification and backend automation.

Chronic Kidney Disease Prediction

Tech Stack: Python, Flask, Machine Learning, Data Analysis, AWS

- Built a Flask-based prediction system deployed on AWS, trained on a dataset of 400+ patient records.
- Processed and analyzed patient data to train models with over 90% accuracy in test environments.
- Designed a clean interface enabling users to input health metrics and receive real-time predictions.
- Enabled preventive diagnostics for 100+ hypothetical patients through accurate forecast delivery.
