SUMMARY

Experienced Software Engineer with over 4 years of hands-on expertise in back-end development, primarily within the healthcare domain. Proven ability to architect and deliver end-to-end enterprise solutions from system design and API integration to deployment and performance optimization. Skilled in building high-performance, scalable applications using .NET and C#, with a strong focus on clean, maintainable code and secure data handling. Adept at solving complex technical challenges and driving continuous improvement in system performance and reliability.

WORK EXPERIENCE

Senior Software Engineer, Optum, Hyderabad, India

March 2024 - Aug 2025

- **Technologies:** .NET Core, Azure DevOps, Kafka, Docker, Jenkins, CI/CD, SSIS, Cloud, Splunk
 - Led real-time deployments using Azure DevOps pipelines, SQL automation, Kafka topic management, and containerized services on the cloud.
 - Architected and implemented a file-driven orchestration engine from the ground up in .NET Core, with multi-format output and automated email workflows, streamlining high-volume contract processing.
 - Built and scheduled automated jobs, data logs using Splunk and managed SSIS packages, significantly reducing manual intervention and increasing system reliability by 25%.
 - Improved system scalability and reduced latency through code optimization and distributed processing strategies. Collaborated across cross-functional teams to gather requirements, deliver technical designs, and implement solutions within Agile delivery cycles. Played the role of a technical mentor, promoting clean architecture, CI/CD best practices, and code quality across development teams.

Software Engineer, Optum, Hyderabad, India

March 2023 – March 2024

- **Technologies:** C#, .NET Core, SQL Server, Git, Azure DevOps, APIs
 - Developed automated .NET-based bots that reduced manual claim processing by 60%, improving overall operational efficiency.
 - Designed and maintained back-end services and Local/ Web API integrations for healthcare platforms.
 - Led migration of legacy systems to modern .NET Core architecture, PLM VM migrations, mentored junior developers, and upheld coding best practices.

Associate Software Engineer, Optum, Hyderabad, India

Jul 2021 – March 2023

- **Technologies:** C#, .NET Framework, SQL Server, Azure DevOps
 - Contributed to core module development for healthcare applications using the .NET Framework.
 - Resolved performance issues by identifying and fixing defects across back-end components.
 - Supported SQL Server maintenance and back-end data optimization within Agile sprint cycles.

Intern, TCS, India

Jul 2020 – August 2020

– **Technologies:**

- **Frontend:** HTML5, CSS3, Bootstrap, JavaScript
- **Backend:** JSP, JDBC Template, Apache Tomcat 8.5
- **Database:** PostgreSQL

– As an Intern at **TCS** under ExOP- WB e-District, developed a fully functional responsive web Application - '**TIMESHEET**'.

EDUCATION

2017 – 2021 Bachelor of Technology in Computer Science and Engineering at
MLR Institute of Technology, Telangana, India.

SKILLS

Languages & Frameworks	C#, .NET,.NET Core, HTML5, CSS, Javascript.
Databases	SQL Server, Entity Framework.
DevOps & Tools	Jenkins, Kubernetes, Azure DevOps, Git , Docker, Splunk.
Cloud	Microsoft Azure (AZ-900 Certified)  Yasasvi Masetti
Soft Skills	Problem-solving, Teamwork, Adaptability, Communication.

ADDITIONAL INFO

- Hands-on experience in Java,Python,C, C++,Bootstrap, Verastream-VHI, IBM MQs, DB2 data handling, PowerBI.
