

MAHITHA REDDY SAMA

913-258-6625 | mahithareddysama@gmail.com

PROFESSIONAL SUMMARY

Java Developer with over 2 years of experience in designing, building, and deploying highly scalable microservices and RESTful APIs using Java, Spring Boot, and distributed systems principles. Proven expertise in developing secure, efficient systems for finance and healthcare, with deep experience in cloud platforms like AWS and Azure. Skilled in utilizing container orchestration (Docker, Kubernetes), cloud services (PaaS, IaaS), and CI/CD pipelines for seamless deployments. Strong foundation in design patterns, CS algorithms, and data structures, with a focus on performance optimization and system reliability. Adept in cross-functional collaboration, applying Agile methodologies, and driving product solutions through technical innovation.

TECHNICAL SKILLS

Programming Languages: Java, C#, Python, TypeScript, JavaScript, SQL

Frameworks: Spring Boot, Hibernate, J2EE, Microservices, JUnit, Mockito, REST APIs, Angular, React

Cloud Platforms: AWS (S3, Lambda), Azure (Cosmos DB, Kubernetes, PaaS, IaaS, IaC)

DevOps & Tools: Docker, Kubernetes, Jenkins, Maven, GitHub Actions, Azure DevOps

Database Management: PostgreSQL, MySQL, Cosmos DB, MongoDB

Software Design Patterns: Singleton, Factory, Observer

Monitoring Tools: Prometheus, Grafana, Dynatrace

Networking: Load Balancers, Reverse Proxies, Firewalls, DNS

Security: OAuth, Active Directory, Windows Authentication

Methodologies: Agile (Scrum, Kanban), SDLC

PROFESSIONAL EXPERIENCE

RideInfo Tech Systems, McKinney, TX: Software Developer

Aug 2024 – Present

- Designed and maintained distributed systems with Java 8 and Spring Boot, improving scalability and performance for healthcare applications.
- Developed RESTful APIs, utilizing OAuth and Active Directory to ensure secure system access
- Spearheaded cloud-based deployments on Azure, optimizing resource usage and reducing latency through Kubernetes and serverless computing (Lambda).
- Designed and deployed Azure cloud infrastructure using Terraform, improving automation and scalability.
- Created and optimized CI/CD pipelines with Jenkins, Docker, and GitHub Actions, reducing deployment time by 25% and streamlining release processes.
- Deployed microservices on Kubernetes clusters, ensuring auto-scaling, resilience, and optimized resource management across multiple environments.
- Implemented Infrastructure as Code (IaC) best practices to streamline provisioning and configuration management.
- Integrated Terraform with CI/CD pipelines for automated infrastructure updates and deployments.
- Automated cloud infrastructure tasks using PowerShell, enhancing operational efficiency and reducing manual intervention.
- Participated in Agile ceremonies, collaborating with cross-functional teams to ensure smooth sprint execution and technical innovation.

Tata Consultancy Services, India: Associate Software Engineer

Oct 2021 – Nov 2022

- Developed high-performance, scalable Java applications for the finance industry, focusing on microservices architecture with Spring Boot and J2EE.
- Designed and documented RESTful and SOAP APIs, reducing processing issues by 30% and improving system interoperability across financial applications.
- Led PostgreSQL query optimization, reducing data access times by 20% in high-traffic environments.
- Managed Azure DevOps pipelines, automating CI/CD workflows and minimizing system downtime during updates.
- Utilized Docker containers and Kubernetes for seamless deployment, improving system scalability and reliability.
- Deployed Prometheus for monitoring and alerting, improving issue detection and response times for mission-critical applications.
- Integrated OAuth and SAML protocols to enhance security, ensuring secure authentication and access to sensitive financial data.
- Collaborated with product managers and architects to refine technical requirements and deliver scalable, reliable system architectures.

Competent Minds, India: Junior Developer

April 2020 – Dec 2021

- Developed and maintained scalable backend services using Java, Spring Boot, and Hibernate for healthcare applications, ensuring high availability and low-latency performance.
- Utilized Kubernetes to orchestrate the deployment of microservices, automating scaling, deployment, and resource management, which improved system resilience by 20%.
- Implemented and optimized SQL queries for healthcare applications, resolving database bottlenecks and improving query performance by 20%.
- Integrated Cosmos DB with Java applications, enabling real-time data querying and optimizing storage for distributed systems across multiple data centers.
- Strengthened security protocols with OAuth and Active Directory integration, ensuring secure access to sensitive healthcare data.
- Worked with Docker for containerization and Jenkins for CI/CD, automating the deployment of applications to Kubernetes, reducing deployment times by 25%.
- Collaborated with cross-functional teams, including Product Owners and QA engineers, to refine user stories, deliver high-quality software, and ensure timely releases in an Agile environment.
- Applied design patterns such as Singleton, Factory, and Observer in microservices architecture to enhance code reusability, improve maintainability, and reduce system complexity.

INTERNSHIP

Skill Safari, India: Front End Development

Jan 2020- March 2020

- Built responsive web pages with HTML, CSS, and JavaScript, improving load times by 20% and ensuring 100% accessibility across devices.
- Enhanced user engagement by 30% with dynamic and interactive web features, improving client satisfaction by 25%.

EDUCATION

Master of Science, Computer Science

May 2024

University of Central Missouri, Warrensburg, MO

Relevant Coursework: Advanced Algorithms, Distributed Systems, Cloud Computing, Data Mining and Machine Learning, Software Engineering, Big Data Analytics, Artificial Intelligence, and Database Systems Design.

Bachelor's in technology, Electronics And Communications Engineering

July 2021

Jawaharlal Nehru University, India
