Product Management | Software Engineering | Customer Success

SUMMARY

I have supported customers, developed internal processes, and technically enabled teams as a product manager at Oracle. I am passionate about communicating and understanding users and designing products to improve their experience. I have a bachelor's degree in CS, with HCI, UI/UX, psychology, data analytics, product design, cloud, database, and project management backgrounds.

WORK EXPERIENCE

Product Manager (Database, Cloud, SQL, PL/SQL)

July 2021 – Jan 2023

Oracle America, Inc.

Redwood Shores, CA

- Developed a technical strategy for cross-platform solutions – [LiveLabs](#), focusing on Oracle DB and Cloud, to accelerate adoption of Oracle technology by enabling enterprises/customers to interact with products through targeted labs, achieving **4 million+** views from **1000+ companies** around the 3rd year of launch
- Improved LiveLabs iteratively by communicating with customers and PMs daily, understanding and identifying issues, prototyping new features, and collaborating with engineers to implement, test, and launch features
- Designed and developed process ([Step by Step guide](#)) and standards ([QA document](#)) to ensure **700+ workshops'** quality
- Supported customers in North America by solving **150+ technical production issues** with cloud and database
- Supported **130+** hands-on labs for **Oracle CloudWorld 2022** – the yearly biggest in-person customer-facing event of Oracle, by working cross-functionally with VPs, PMs, sales, marketing, and events team
- Designed and created a data analytics app to gain insights from Olympics data, including 200,000 competition records;

Product Manager Intern (SQL, PL/SQL, Database, Cloud, APEX, Markdown, HTML)

May 2020 - Aug 2020

Oracle America, Inc.

Remote

- Led, directed, and troubleshooted for a distributed team of 7 QA engineers daily, completing **QA 60+ workshops**
- Solved issues and improved 30+ workshops on **database, cloud, storage, ML, [analytics](#), graph database, etc.**, by working cross-functionally and extensively with QA engineers, software engineers, and PMs across **10+ teams**
- Designed and implemented a [COVID-19 tracking app](#) to receive notifications about exposure to COVID-19

Peer Mentor / Teaching Assistant (Database, SQL, C)

Jan 2021 - May 2021

Computer Science 564 - Introduction to Database @ UW – Madison

Madison, WI

Peer Leader / Teacher (Java)

Sep 2019 - May 2021

Computer Science 200 - Programming I & Computer Science 300 - Programming II @ UW-Madison

Madison, WI

Software Engineer Intern (JavaScript, HTML, CSS, D3.js, jQuery, Electron)

June 2019 – Feb 2020

Learning, Representations, & Technology Lab, UW-Madison

Madison, WI

- Created a desktop application prompting questions and hints to students learning chemistry and signal processing, helping **3000+ students** at UW-Madison to learn more efficiently, using **jQuery** and **D3.js** in **JavaScript**

SKILLS

Programming languages: Java, SQL, PL/SQL, C++, JavaScript, C, Python, HTML, CSS, C#

Certifications: [Oracle Cloud Infrastructure Architect Associate 2022](#), [Oracle Cloud Data Management Foundations 2022](#)

PM skills: Prototyping, Figma, UI/UX, Agile, Scrum, Go-to-market, Project Mng, Design, Heuristic Evaluation, Video Editing

Technical skills: Git, React, REST API, [APEX](#), Markdown, [Unity](#), GUI, Cloud, Database, QA, Analytics, [DialogFlow](#)

EDUCATION

Bachelor of Science: Computer Science (Honor)

University of Wisconsin – Madison (GPA: 3.97/4.0)

Relevant coursework: Algorithms, Operating System, Database, HCI, Project Management, UI/UX, VR/AR, Stats, Econ, Psych

Honors: Dean's List (8/8 semesters), CS Department Service Award

PROJECTS

Course Enrollment Web App (React, JavaScript, REST, Prototyping, Heuristic Evaluation)

- Designed and implemented a course enrollment web app for students to do faceted searches, enroll, and drop courses, check information on courses and sections, rate courses, and view completed, recommend, and qualified course

Fitness Tracker Mobile App (React Native, JavaScript, REST, Prototyping – Adobe XD, Accessibility)

- Designed and developed a fitness tracker to set exercise and dietary goals, review and add exercises, track meals and foods, and compare goals versus current progress, along with accessibility features (*VoiceOver* in iOS)

Conversational Shopping Agent ([DialogFlow](#), Experience Prototyping, Usability Testing)

- Designed and built a virtual shopping agent to display and sell products, answer questions, and help users check out

[Flying over Hogwarts](#) - VR Project ([Unity](#), C#, 3D Modeling)

- Designed the logic and created an interactive VR game to experience flying over Hogwarts and fighting with enemies
