EDUCATION

Georgia State University <i>Master of Science in Computer Science, CGPA: 3.3/4.0</i>	Aug 2024 – May 2026
G. Narayanamma Institute of Technology and Science, Hyderabad, India <i>Bachelor of Technology in Computer Science, CGPA: 8.4/10</i>	Aug 2020 – June 2024

EXPERIENCE

Georgia State University Graduate Student Assistant at Chick-fil-A	Aug 2025 - Present
- Delivered exceptional customer service while managing orders, payments, and ensuring operational efficiency in a fast-paced environment, - Assisted in food preparation, inventory management, and team training to maintain high standards of quality, safety, and productivity.	
Graduate Lab Assistant	Jan 2025 – May 2025
- Designed and assessed lab quizzes and assignments, ensuring alignment with course objectives and clear technical expectations. - Delivered hands on lab instructions and support, bridging, theoretical concepts with practical applications in topics such as Snowball commands and exception handling, while collaborating with faculty to refine course content.	
Graduate Teaching Assistant	Aug 2024 – Dec 2024
- Collaborated with faculty to design, enhance and deliver undergraduate computer science content, ensuring effective learning outcomes and improved student engagement. - Provided targeted tutoring and academic support, evaluating assignments and projects to deliver actionable feedback that boosted student performance and retention.	

SKILLS

- Languages:** Java, Python, C++, C, HTML, SQL, Go, JavaScript, CSS, TypeScript, Dart, Ruby, REST APIs
- Frameworks & Cloud Concepts:** Git, Docker, AWS(S3, SQS, SNS, Lambda), GCP, Kubernetes, NoSQL, Pig
- Databases & Operating Systems :** DynamoDB, MongoDB, Linux, Ubuntu, Windows, Bash
- Web & Mobile Development:** React.js, Next.js, Flutter, Django, Flask, Node.js, Tailwind CSS
- Tools & Concepts:** Tableau, Power BI, AI/ML, Data Structures, Grit, Keras, LLM, NLP, Data Quality Management

PROJECTS

Crypto Wallet	Mar 2025 – May 2025
Developed “Crypto Wallet”, a secure, decentralized digital wallet application that integrates advanced cryptographic standards including AES-256, AES-GCM, and RSA to manage passwords, files, and encrypted messages. Implemented client-side encryption and a zero-knowledge architecture using React, TypeScript, and Supabase to ensure data privacy and security. The system supports real-time encryption, secure file sharing, JWT-based authentication, and a password vault, making it scalable for personal and enterprise use. GitHub	
Copy- Move Forgery detection using Deep learning Techniques	Jan 2024 – Jun 2024
- Implemented a deep learning-based copy-move forgery detection system using CNN and VGGNet-16, achieving 90 % accuracy, with model training and evaluation in Python(Jupyter Notebook, Numpy, OpenCV, tensorflow/Keras) . - Developed a full-stack web application integrated a Flask backend with HTML, CSS, JavaScript, and Bootstrap frontend, enabling interactive image uploads, real-time forgery detection, and visualization of results.	
Prediction of Heart Diseases using Machine Learning Techniques	Jan 2023 – Aug 2023
- Developed a heart disease prediction system leveraging random forest, Naïve Bayes, and logistic Regression, achieving 91% diagnostic accuracy. - Created interactive visualization using Plotly, Seaborn, and Matplotlib(bar charts, donut charts, scatter plots) to highlight key patterns and support data-driven decisions. GitHub	

LEADERSHIP AND ACHIEVEMENTS

- Presented and Published ML/DL research on heart disease prediction and image forgery detection at international conferences. [Springer](#) [Springer](#)
- Demonstrated leadership and collaboration by participating in a 24-hour IBM cloud data science hackathon and organizing CSI student chapter events.
