

Suryansh Patel

Software Developer

Kansas City, MO | +1 (913) 296 1349 | suryansh@quickestmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Software Developer with 3+ years of experience in building scalable, high-performance web and enterprise applications. Proficiency in full-stack development using Java and Python, with a strong emphasis on backend engineering through Spring Boot, Hibernate, and RESTful services. Experienced in crafting responsive, user-focused front-end interfaces using React.js and Angular to enhance usability and engagement. Ability to developing modular microservices architectures and integrating APIs to ensure maintainable and scalable codebases. Well-versed in core J2EE technologies like Servlets, JSP, and JDBC for secure, web applications. Hands-on experience with cloud platforms such as AWS, Azure, and GCP, optimizing infrastructure using services. Familiar with DevOps tools like Docker, Kubernetes, Jenkins, and CI/CD pipelines to support efficient, automated deployments.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Languages: Java, Python, SQL, PL/SQL, C, C++, C#

Frameworks: Spring MVC, Spring Boot, Spring Security, Microservices, Hibernate, JPA, React, Vue.js, Node.js, Angular

IDEs: NetBeans, IntelliJ IDEA, VS Code, Eclipse

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC, Java Mail

Web Technologies: HTML, CSS, JavaScript, TypeScript, Bootstrap, jQuery, Ajax, JSON, XML

Cloud Tools: AWS (VPC, EC2, S3, CloudFront, ELB), Azure, GCP

Application Server: Apache Tomcat, IBM Web Sphere

Databases: MySQL, SQL Server, PostgreSQL, Oracle, MongoDB

Version Control/Other Tools: Git, GitHub, GitLab, Maven, Gradle, Jira, Jenkins, Junit, MS Excel, JMeter

Operating Systems: Windows, Linux, Mac

EDUCATION

Master of Science in Computer Science

May 2025

University of Missouri-Kansas City (UMKC, Kansas City MO)

Bachelor of Technology in Computer Science and Engineering

Apr 2022

Lakshmi Narain College of Technology (LNCT, MP India)

EXPERIENCE

State Street, USA | Software Developer

Jan 2025 - Present

- Developed scalable backend services using Java and Spring Boot, supporting high-throughput data processing and maintaining performance stability under peak user activity.
- Designed responsive front-end interfaces with React.js and Angular, enhancing application usability and delivering an engaging user experience.
- Constructed RESTful and GraphQL APIs to support modular microservices architecture, improving system communication efficiency and reducing data retrieval time.
- Organized cloud-native applications on Microsoft Azure, leveraging Azure DevOps for CI/CD automation and optimizing cloud infrastructure for cost and performance.
- Planned and managed both relational and NoSQL databases, implementing indexing and normalization strategies that improved data access speeds and storage efficiency.

Mphasis, India | Software Developer

Jan 2021 - Dec 2023

- Led full lifecycle development of full-stack web applications, delivering scalable backend architectures and responsive front-end interfaces within Agile development environments.
- Optimized database interactions by refining ORM logic with JPA and Hibernate, increasing query efficiency and reducing transaction latency by 40%.
- Designed and implemented secure RESTful and GraphQL APIs to support distributed systems, improving service response time by over 30% and ensuring seamless data exchange.
- Assembled and deployed cloud-native solutions on AWS using EC2, RDS, Lambda, and DynamoDB to ensure system scalability, availability, and fault tolerance.
- Updated CI/CD pipelines with Jenkins, Docker, and Kubernetes, cutting deployment times by 45% and increasing the reliability of production releases.
- Drifted monolithic applications to microservices architecture, enhancing system modularity, fault isolation, and enabling faster deployment of new features.
- Delivered high-performance backend services using Java and Node.js, optimizing algorithms and request handling to support real-time, data-intensive applications.
- Implemented GitLab CI and automated testing frameworks to maintain code quality, reduce regression risks, and accelerate development cycles.
