Professional Summary

Clinically trained Physician Associate with 5+ years of experience delivering direct patient care across surgical and research settings, and hands-on experience in clinical research, data analysis, and health data systems. Proven ability to bridge clinical workflows with data-driven insights REDCap database management, and Python-based analysis. Passionate about improving care delivery, research quality, and clinical decision-making through informatics and data science.

Core Skills

- Clinical Informatics & Workflow Optimization
 - Electronic Health Records (Epic, Cerner, CRIS)
 - Clinical Research & Protocol Management
 - REDCap Database Design & Data Management
 - Python (Pandas, NumPy, Matplotlib – if accurate)
 - Data Wrangling, Analysis & Visualization
 - Clinical Documentation & Data Quality
 - Cross-functional Communication (Clinical, Research, IT)
-

Professional Experience

Physician Associate/Associate Investigator

Kelly Government Services/National Institutes of Health, Bethesda, MD – Nov 2023 to Present

- Conduct comprehensive medical and craniofacial examinations while collecting high-quality clinical and phenotypic research data for NIH protocol 16-D-0040
- Manage and maintain REDCap databases, ensuring data integrity, accuracy, and usability for downstream analysis and publication
- Analyze clinical and morphometric datasets to inform research direction, data collection strategies, and peer-reviewed publications
- Lead virtual surgical planning meetings by integrating clinical findings, imaging data, and multidisciplinary input to optimize surgical outcomes
- Serve as a clinical informatics liaison between investigators, surgeons, residents, and research staff to streamline workflows and data capture
- Enter and manage structured clinical documentation across NIH EHR systems in compliance with research and regulatory requirements
- Consent patients and support recruitment strategies to improve protocol enrollment and dataset completeness
- Supervise and mentor oral and maxillofacial surgery residents in clinical decision-making and perioperative management

Data Science Intern

The Tech Academy, Portland, OR – June 2023-July 2023

- Performed exploratory data analysis and statistical modeling using Python to evaluate global COVID-19 trends and public health responses
- Analyzed multivariate datasets to assess factors influencing case counts and cross-country outcomes
- Developed data-driven recommendations based on application content rating analysis to optimize market success
- Created technical reports and visualizations translating analytical findings into actionable insights for non-technical stakeholders
- Collaborated in an Agile/Scrum team environment, contributing to iterative analysis and project delivery

Bariatric Surgery Physician Associate

Virginia Bariatric Surgery Center, Herndon, VA – Mar 2022 to Apr 2023

- Delivered perioperative and longitudinal care to bariatric surgery patients in inpatient and outpatient settings
- First-assisted in laparoscopic gastric bypass and sleeve gastrectomy procedures
- Optimized weight loss outcomes through evidence-based pharmacologic management and patient education
- Documented clinical encounters within EHR systems, supporting continuity of care and outcome tracking

General Surgery Physician Associate

Chevy Chase Surgical Associates, Chevy Chase, MD – Aug 2020 to Feb 2022

- Managed preoperative and postoperative care for general surgery patients across hospital and ambulatory settings
- First-assisted in a wide range of general surgical procedures
- Conducted outpatient procedures and wound care while ensuring accurate and timely EHR documentation
- Responded to emergency surgical consultations, coordinating care across multidisciplinary teams

Education

- **Master of Medical Science, Physician Associate** – Arcadia University, Christiana, DE (2020)
- **Bachelor of Science, Neurobiology & Physiology** – University of Maryland, College Park, MD (2016)
- **Data Science Bootcamp (Certificate)** – The Tech Academy (Remote, 2023)

Certifications and Training

- Physician Assistant, National Commission on Certification of Physician Assistants (NCCPA) – 2020
- Data Science Bootcamp (Certificate of Completion), The Tech Academy – 2023
