United States | (680) 356-8409 | bhaveshpurohit@gmail.com | <https://www.linkedin.com/in/purohitbhavesh/>

SUMMARY

Data Analyst with 4+ years of experience designing scalable ETL workflows, data pipelines, and BI dashboards across Finance, Manufacturing, and IT operations. Skilled in processing millions of records, delivering actionable insights, and enabling data-driven strategic decisions. Proficient in SQL, Python (Pandas), R, SAS, Power BI, Tableau, Snowflake, AWS, Azure, ServiceNow, and advanced Excel. Experienced in statistical modeling, API integration, cloud-based data engineering, and performance optimization. Adept at stakeholder collaboration, Agile project execution, documentation, and metrics-driven reporting to improve operational efficiency and business outcomes.

Attended BEYA STEM DTX™ Conference 2025

PROFESSIONAL EXPERIENCE

PNC Financial Services
Business Data Analyst

United States
Jun 2024 - Present

- Analyzed **100K+** client investment portfolios via ELT Workflow in **Snowflake using DBT**, to extract and transform data ingesting from **multiple Oracle Datasets**, for behavioral trend modeling, identifying **3 key patterns** that improved portfolio strategy accuracy by **25%**.
- Developed **12+ Power BI dashboards with DAX calculations and row-level security**, integrating multiple client datasets, automating KPIs, reducing manual reporting by **35%**, and delivering investment insights for executive decision-making.
- Configured **Planview PPM workflows** to manage project progress, task dependencies, and resource allocation, tracking timelines across multiple teams, improving portfolio delivery predictability by **20%**, and aligning operations with strategic business priorities.
- Performed **QA testing on OLAP Server datasets and Power BI pipelines** handling **1.5M+ daily transactions**, validating data accuracy, automating exception handling, and improving dashboard uptime by **25%**, preventing operational delays across teams.
- Collaborated with operations and compliance teams to perform **A/B testing and statistical analysis** using Python and SAS, translating insights into improvements, supporting **3 feature launches**, increasing engagement by **18%**, and standardizing reporting workflows.
- Documented BRDs, FRDs, and SOPs in Confluence**, establishing a centralized knowledge repository, standardizing reporting processes, and reducing reporting cycle time from **7 to 3 days** for four business departments.

Saint-Gobain
Supply Chain Data Analyst

India
Aug 2022 - Jul 2023

- Engineered **multidimensional SSAS cubes in SQL Server**, for the migration of **3M+** sales and inventory datasets using **SSIS pipelines and Python scripts**, optimizing aggregations, **reducing query latency by 35%**, and accelerating global supply chain analytics decisions.
- Designed **15+ interactive dashboards in SSRS**, leveraging migrated OLAP datasets, implementing dynamic parameters, calculated KPIs, and expressions, delivering operational insights, and increasing efficiency by **20%** across seventy international regions.
- Streamlined **10+ high-volume reporting workflows with Python**, applying ETL transformations from source systems into analytical models, **saving 150+ analyst hours monthly**, ensuring **99%** data accuracy, and improving enterprise-wide reporting consistency.
- Implemented **SQL-based data validation and Python** troubleshooting scripts to identify and correct **2,000+ anomalies in enterprise datasets**, improving ETL reliability, reducing error resolution time by **30%**, and streamlining operational reporting processes.
- Curated a **centralized knowledge repository in SharePoint**, documenting ETL processes, workflow design, and ServiceNow incident resolutions, reducing recurring tickets by **30%**, standardizing operations, and enhancing IT and analytics team efficiency globally.

KPIT Technologies
Data Analyst Consultant

India
Jun 2020 - May 2022

- Coordinated **4 cross-domain BI projects via Azure DevOps**, tracking project progress, ensuring on-time delivery, aligning with stakeholder requirements, managing workflows, and implementing process improvements across diverse portfolios simultaneously.
- Optimized **multiple cloud-hosted data processes for migration programs**, reducing infrastructure costs by **15%**, enhancing ETL performance, and improving analytical workload efficiency across **3 client sectors** with high-volume operational datasets.
- Produced **multiple ad-hoc Power BI and Excel reports** using **on-premise and cloud Data Server**, delivering insights, accelerating executive decisions by a business day, and improving cross-functional project turnaround times across multiple client portfolios.
- Integrated **complex ETL pipelines in Azure Data Factory with SAS statistical validations**, supporting approximately **20 monthly cross-functional business decisions** using verified, high-quality datasets for analytics, forecasting, and operational reporting.
- Collaborated with stakeholders and other teams across multiple domains to **gather requirements**, converting them into **BRDs, FRDs, user stories, SOPs, and PoCs**, standardizing processes, improving communication, and accelerating development and reporting accuracy.

SKILLS & CERTIFICATIONS

• Programming Languages	Python, R, SAS, SQL, DAX, DBT, SCALA
• Databases & Big Data	SQL Server, PostgreSQL, Oracle DB, Apache Spark, Databricks
• Data Visualization & BI Tools	Power BI (RLS/OLS), Tableau, IBM Cognos, Amazon QuickSight, SAS Visual Analytics, Looker Studio
• ETL & Data Integration	Snowflake, Azure Data Factory, AWS Glue, SSIS, Informatica PowerCenter, Alteryx, API Automation
• Cloud Platforms & Services	AWS (S3, Lambda), Microsoft Azure (Blob Storage, Functions), Google Cloud Platform Enterprise
• Applications & Version Control	ServiceNow, Jira, Confluence, Azure DevOps, GitHub, Git, Salesforce CRM
• Project & Collaboration Tools	Plainview, Jira, Confluence, Azure DevOps, Git/GitHub, ServiceNow, SharePoint, Visio
• CERTIFICATIONS	SAS Certified Specialist , Oracle: Generative AI Professional , Snowflake: Data Warehousing

EDUCATION

Master of Science in Information Systems , Syracuse University, NY	May 2025
Bachelor of Engineering in ECE , University of Mumbai, India	May 2022
