EXPERIENCE

- Turning Green

Remote

Technology Consultant Intern (Part-time)

September 2024 - January 2025

- Led the Development and Integration of a Data Management Dashboard:** Spearheaded the design and implementation of an impactful dashboard to track sustainability metrics for the Conscious Kitchen initiative, enhancing data-driven decision-making.
 - Continuous Improvement and Impact Assessment:** Instituted a framework for continuous feedback, utilizing KPIs to measure and report on system effectiveness, which directly supported ongoing improvements and user satisfaction.
 - Autonomous Project Management and Strategic Consulting:** Operated independently across multiple projects, consulting with senior management to align technological solutions with organizational goals, demonstrating critical thinking and problem-solving.
- Turning Green

Remote

Data Systems Consultant Intern (Part-time)

February 2024 - May 2024

- Innovative Process Optimization and Automation:** Independently spearheaded the overhaul and automation of complex data systems, transforming traditional order management and significantly enhancing operational processes and efficiency. Developed a custom AppScript application that minimized manual errors and streamlined data entry processes, underpinning the organizational shift towards digital optimization.
 - Strategic Stakeholder Engagement and Solution Adaptation:** Led interactive training and consultations tailored for non-technical stakeholders, effectively communicating complex technical details. Employed a feedback-driven approach to continually refine system designs and functionalities by leveraging stakeholder domain expertise, ensuring high usability and effective adoption across the organization.
 - Enhanced Data Utilization and Outreach Efforts:** Re-engineered and consolidated multiple disparate alumni databases into a cohesive system, optimizing data structures by implementing feature engineering for enhanced data accessibility. Introduced mail merge technologies to automate and personalize outreach efforts, significantly optimizing communication strategies and increasing marketing effectiveness.
- Reconstruct Sustainable Solutions

Mumbai, India

Junior Consultant (Full-time)

January 2023 - July 2023

- Data-Driven Analysis & Assessment:** Led a comprehensive analysis and assessment of a prominent baked-products FMCG company's carbon footprint, utilizing data science techniques to identify pain points and areas for improvement.
 - Strategic Planning & Implementation:** Developed and executed a strategic plan to offset and reduce the carbon impact of the client, leveraging a multidimensional approach that encompassed waste management, afforestation initiatives, carbon credit brokers, and sustainable energy solutions.
 - Business Analytics & Insights:** Applied business analytics methodologies to gather, analyze, and interpret extensive data sets encompassing waste, product, distribution, and consumption patterns, enabling data-driven decision-making throughout the project.
 - Client Collaboration & Consultation:** Collaborated closely with clients, conducting in-depth consultations to understand their unique needs, goals, and challenges, resulting in tailored and effective solutions to address their sustainability requirements.
 - Performance Tracking & Reporting:** Tracked and monitored project performance using key performance indicators (KPIs), providing regular reports to clients and management, highlighting the achieved improvements and quantifiable reductions in greenhouse gas emissions, ultimately contributing to the client's commitment to environmental sustainability.
- CRISIL Limited

Mumbai, India

Quantitative Finance Intern - Market Intelligence & Analytics Division (Full-time)

October 2022 - January 2023

- Advanced Machine Learning Implementation:** Played a pivotal role in developing and implementing the 'Bank Statement Analyser,' leveraging advanced machine learning algorithms to categorize transactions in bank statements. Provided valuable insights for configurable categories such as kiting, charity, insurance, investment, salary, and circular transactions.
 - Applied Data Governance for Credit Ratings:** Implemented data governance principles in a project for Large Corporates and Small and Medium-sized Enterprises, utilizing client data to calculate information value. Derived meaningful inferences for credit ratings, showcasing a deep understanding of data analysis and its applications in the financial sector.
 - Integral to Fulkrum Integration & Optimization:** Contributed significantly to integrating the 'Bank Statement Analyser' onto Fulkrum, CRISIL's Enterprise Big Data Analytics & Reporting Platform. Played a key role in optimizing the tool's performance and functionality, demonstrating adaptability and technical proficiency in working with next-generation analytics platforms.
 - Engaged in Client Collaboration and Presentation:** Actively participated in internal and client discussions, effectively communicating modeling methods and insights. Demonstrated strong interpersonal and presentation skills by conveying complex technical concepts to non-technical stakeholders.
- Quantiphi, Inc.

Mumbai, India

Business Analyst Intern - Google Cloud Platform Infrastructure Practice (Full-time)

Feb 2022 - July 2022

- Solution Architecture:** Collaborating with solution architects to prepare a high-level overview of the proposed cloud infrastructure.
 - Collaterals:** Preparing proposal decks for managed services and reselling deals, drafting contracts, curating promotional content for the practice and any other miscellaneous deliverables required during the pre-sales stage of a deal.
 - Project Management:** Acting as the medium of communication between the clients and the delivery side of the team.
- 73 Strings

Remote

Research Intern - Product Innovation (Full-time)

Nov 2021 - Dec 2021

- Testing & Debugging:** As a part of the product management team, my primary responsibility was to work towards the testing and debugging of the POC version of the PDF parsing and monitoring module for the state-of-the-art QubitX platform along with testing and assessing the performance of third-party PDF parsers.
 - Client Performance Review:** Conducting research on the companies in the client's (usually Private Equity firms) portfolio using sensitive corporate data such as board meeting decks, investor reports and audit reports that would lead to the ideation of novel AI-powered solutions for automated review of the investments' performance.
 - Financial Analysis:** Analyzed and evaluated financial statements such as Profit & Loss, Balance Sheets and Cash Flow Statements of the companies that the clients have invested in.
 - Design:** Brainstormed on the UI/UX of the module under development.

SKILLS SUMMARY

- **Languages:** Python, R, SQL, JAVA, C++
- **Frameworks:** Scikit, NLTK, TensorFlow, Keras, Flask, NumPy, Pandas
- **Tools:** RStudio, Jupyter Notebook (Anaconda), PostgreSQL, Tableau, MS Excel, PowerBI, Visual Studio
- **Platforms:** Linux, Web, Windows, Arduino, Raspberry, Virtual Box VM
- **Soft Skills:** Leadership, Event Management, Writing, Public Speaking, Time Management

EDUCATION

- **USC Marshall School of Business** Los Angeles, USA
Masters of Science - Business Analytics August 2023 - May 2025
Coursework: Forecasting & Risk Analysis, Quantitative Investing, Digital Foundations for Business Innovation, Statistical Computing & Data Visualization, Applied Modern Statistical Learning Methods, NoSQL Databases in Big Data, Data Driven Decision Making
 - **Scholarships:** Recipient of the university’s merit-based scholarship and three external awards, totalling \$17,000.
 - **Resident Assistant - Graduate & Family Housing:** Managed a 50+ student residence, providing leadership and support that fostered a safe and inclusive environment; organized and led community events, increasing resident engagement and participation.
 - **Teaching Assistant: Advanced Business Statistics (BUAD 310g) and Applying Analytics to Human Capital in Business (DSO 550):** Led review sessions and provided personalized tutoring, enhancing student understanding and overall course performance; evaluated assignments and delivered detailed feedback to support academic growth.
 - **Lead Research Assistant - Trojan Sports Research Lab:** Led multiple research projects across various sports leagues, analyzing demographics, biomechanics, and performance optimization strategies. Focused on reducing injury risk and promoting inclusivity through data-driven insights, contributing to evidence-based advancements in athletic training and sports science.
 - **Global Case Competition Team Leader:** Led the USC Marshall MSBA team to a 4th place finish at the 2024 Global Case Competition, organized in partnership with Accenture. Presented a pioneering idea using weak supervised contextualization and knowledge graphs to revolutionize multilingual financial education by enabling scalable, AI-driven content generation. Awarded the title of Domain Champion in Finance.
- **Mukesh Patel School of Technology Management and Engineering** Mumbai, India
Bachelor of Technology - Data Science; GPA: 3.67/4.0 July 2019 - July 2022
Coursework: Financial Engineering & Risk Management, Advanced Business Statistics, Machine Learning, Deep Learning, Artificial Intelligence, Advanced Neural Networks, Data Gathering & Cleaning - ETL Process, Business Visualization, Natural Language Processing, Big Data, Computer Vision, Database Management Systems, Data Structures and Algorithms, Predictive Modelling
 - **Student Ambassador Award:** Received at the convocation for representing the university at national and international competitions and conferences in addition to actively undertaking student leadership roles throughout the program.
 - **MPSTME Model United Nations Society:** Served as the Under Secretary General: Research & Development with the primary responsibility of leading a team of 12 individuals for preparing research documents in addition to curating and conducting training sessions, and mentoring the university delegation in terms of documentation, policy development and public speaking.
 - **Google Non-profit Marketing Immersion:** Led the digital marketing team of a USA-based NGO that works towards education, empowerment and employment of youth in Rural Africa with the goal of increasing their outreach and aiding their fundraising efforts.
- **Sauder School of Business, University of British Columbia** Vancouver, Canada
Vancouver Summer Program; GPA: 3.6/4.0 July 2022 - August 2022
 - Participated in a one-month immersive program that not only gave us the opportunity to experience academic life at the University of British Columbia but also introduced us to North American culture and tradition
 - Studied International Business Management & International Marketing, and stood 5th and 9th in those classes respectively

PROJECTS

- **High-Frequency Trading Model Developer:** Developed a predictive model to challenge the Random Walk Hypothesis using high-frequency commodity futures data. Utilized Python for extensive data transformation and feature engineering to enhance predictive accuracy in price change forecasts. Tech: Python, Pandas, Glob, SciPy. (April '24)
- **Oil Production Predictive Analytics:** Analyzed geostatistical and production data from 137 wells in the Wattenberg Field, NE Colorado, to identify optimal drilling locations and forecast oil production. Built predictive models, applied interpolation techniques, and conducted economic analysis, estimating a \$7M NPV over five years, \$4M higher than the field average (58 BPD). (Dec '23)
- **Equity Analyst (Python Package):** An Open-Source Python Package published on the PyPi repository that uses a Deep Learning model to predict future stock prices based on historical data. It also acts as an aid to acquire and visualise stock prices without any redundancy. Tech: Python, Pandas-Datareader, Tensorflow, Keras. (April '21)
- **Loan Management System:** Developed a database management system which maintains records of loans taken from a bank, calculates a credit score using the data and evaluates the risk of default using the calculated credit score. Tech: PostgreSQL (March '20)

PUBLICATIONS

- **Research Paper: Developing an Emotion Recognition Tool for Tweets:** Published by Cloud Computing & Data Science Journal. (December '22) DOI: 10.37256/ccds.4120231827
- **Research Paper: A case study on Credit Risk Analysis using Taiwanese Banking Data:** Published in Association of Data Scientists’ machine learning journal - Lattice: Volume 2, Issue 4 (February '22)
- **Review Paper: Prevention of Non-Consensual Data Collection for Unfair Use:** Published by Wiley’s Security & Privacy Journal. (September '21) DOI: 10.1002/spy2.189

HONORS AND AWARDS

- Titled as a Campus Star by the Economic Times, among the top 91 brightest engineering students in India - July 2022
- Won the prestigious Resolution fellowship at the Social Venture Challenge by the Resolution Project - June 2021
- Represented India as the Head Delegate of NMIMS University at Harvard WorldMUN - February 2021
- Runner up position at the State Level Technical Paper Presentation Competition - Technocrat - October 2018
