

Amey Arun Parange

Brighton, MA | 8573131430 | parange.a@northeastern.edu | [LinkedIn](#) | [GitHub](#)

Professional Experience

- Data Analyst**, Community Dreams Foundation, Remote Sep 2024 - Present
- Developed a real-time data pipeline, enabling seamless employment data tracking and portal integration.
 - Constructed an automated weekly attendance reporting system, ensuring 100% data accuracy and accessibility.
- Business Intelligence Teaching Assistant**, Northeastern University, Boston Jan 2024 - May 2024
- **Mentored 90 students** to develop analytics projects focused on dimensional modeling, ETL, and data visualization.
 - Architected a traffic crash data analytics system, implementing staging, curation, validation, and integration layers for a data warehouse that **consumed 8M records** from open-source APIs using Azure Data Factory.
 - Mentored students to design dashboards Power BI to analyze huge datasets, **improving student grades by 70%**.
 - Implemented star schema models by orchestrating data pipelines improving data quality of dataset up to **95%**.
- Business Intelligence Analyst**, Tata Consultancy Services, Mumbai Jun 2019 - Sep 2022
- Contributed to the fintech team by implementing, and maintaining ETL pipelines using Informatica PowerCenter and PySpark, integrating data into **Oracle ERP**-based accounting systems and a **Finance Data Warehouse**.
 - Led cross-functional Agile teams to implement data pipelines and SQL queries, successfully integrating a new product.
 - Automated ingestion and failure recovery for vendor files using Python, reducing **manual intervention to 98%**.
 - **Optimized SQL queries** by implementing table partitioning and indexing strategies, resulting in a 5X improvement in data retrieval speed in source queries.
 - Engineered complex SQL queries to **integrate multiple data sources** into a de-normalized table, enhancing data accuracy and reducing report generation time by 40% for rental car dashboards and **ad-hoc reports**.
 - Performed comprehensive data analysis using PL/SQL and **Excel** (VLOOKUP, filters, and pivot tables) to identify root causes in the nightly load process, improving data quality by 10%.
 - Collaborated with finance and accounting teams to design **Tableau** dashboards aligned with critical refund metrics, resulting in a 20% improvement in decision-making efficiency and a 90% reduction in invalid refunds.
 - **Redesigned BI reports in Tableau** with improved visualizations and KPIs, enhancing clarity and readability by 95%.
- Software Engineer Intern**, Reliance Industries Limited, India May 2018 - Jul 2018
- Streamlined data integration for inventory management using **Python**, reducing manual processing by 98%.
 - Designed and implemented **real-time monitoring** and live inventory dashboards with strategic KPIs and charts using Tableau, reducing unwanted picks by 22% and ensuring near-zero faults in inventory management.

Technical Skills

Coding Languages: Python, SQL, Oracle PL/SQL, PySpark, Java, Unix Shell Script
Databases: Oracle, MS SQL Server, Snowflake, Cosmos, Big Query, MySQL
Cloud and Big Data: Google Cloud Platform, Microsoft Azure, Dataproc, Spark, Hadoop
Data Engineering Tools: Informatica, Talend, Azure Data Factory, SSIS, Composer, Databricks, Azure Synapse
BI and Other Tools: Power BI, Tableau, ER Studio, Looker, SSRS, Git, Jira, Excel, Alteryx

Education

- Northeastern University** Aug 2022 - May 2024
Master of Science in Information Systems Boston, US
- Vidyalankar Institute of Technology,** Jul 2015 - May 2019
Bachelor of Engineering in Computer Science Mumbai, India

Projects

- Food Facilities Analysis** | Azure Data Factory, Azure SQL Database, Power BI, Tableau Mar 2024
- Developed data pipelines in ADF implementing a **star schema** improving data quality by 95%.
 - Crafted interactive **Power BI** dashboards featuring advanced visualizations like heatmaps, line graphs, and KPIs for inspection reports to enhance decision-making reducing violations and warning **30% of food facilities**.
- IMDB movies Analysis** | Talend, Slowly Changing Dimensions, Power BI, Python Nov 2023
- Performed data profiling on various sources with Alteryx and Python to filter **10% of data discrepancy**.
 - Implemented **SCD Type 2** in a star schema model for improved historical references and **4X faster analytics**.
 - Calculated metrics in **Power BI** dashboard for movie performance using DAX, data modeling, and Power Queries.
