

ANKIT NAGAM

nagamankit5@gmail.com | 312-561-6792

SUMMARY

- A Data Analytics professional with 6 years of experience in Communications, Pharma, and Banking Domains.
- Excellence in the requirement gathering, development, validating and maintaining interactive dashboards/reports in Tableau Desktop and Tableau Server (Dev and Prod environments).
- Strong understanding of advanced Tableau features, including Relationships, Data Blending, Data Aggregations, Calculated Fields, Parameters, Table Calculations, LODs, Window Functions, and Dashboard Actions.
- Proficient in writing complex SQL Queries, Stored Procedures, Normalization, Database Design, creating Indexes, Functions, Triggers, Sub Queries, Collections, Performance Tuning and Query Optimization.
- Good exposure to Development, Testing, Production Support, Debugging, Implementation and Documentation.
- Expertise in Data Cleaning, Data Mapping, Data Aggregation, Data Analysis and Reporting/Visualization.
- Experience in processing large datasets with millions of records for data transformation and data reporting including data scrubbing, profiling, and de/normalizing leveraging SQL, Alteryx, Tableau Prep Builder, and Python.
- Built rich visualizations like Dual Axis Bar Graphs, Scatter Plots, Pie-Charts, Heat Maps, Bubble Charts, Tree Maps, Funnel Charts, Box Plots, Waterfall Charts, Geographic maps, Pareto chart and custom visualizations.

TECHNICAL SKILLS

Databases	Oracle, SQL Server, Snowflake, and MySQL
BI Tools	Tableau Desktop 2024, Qlik Sense, PowerBI, and MS Excel
Programming Languages	Python, R, and SAS
ETL Tools	Tableau Prep Builder, Alteryx, and Informatica
Data Warehousing	Star & Snow-Flake Schema Modeling, OLAP, OLTP, SSIS, and SSRS
Other Tools	Service Manager, SharePoint, Google analytics, Jira, and Trello

EDUCATION AND CERTIFICATIONS

DEPAUL UNIVERSITY

Master of Science in Data Science

March 2020

JNTUH

Bachelor's in computer science

June 2017

Certifications:

Tableau Certified

PROFESSIONAL EXPERIENCE

Verizon, Richardson, Texas

Business Intelligence Developer

June 2022 - Present

- Analyzed Core Network Engineering data to optimize capacity of Field Engineers and Center Engineers.
- 15+ million records Pre-processed in Oracle, SQL Server, Python, Tableau Prep Builder, and Qlik.
- 3 Performance Agreement dashboards, 2 At-a-Glance dashboards built independently in Tableau, Qlik which in executive meetings.
- 65% reduction in execution time by optimizing Python scripts, SQL queries, saving operations cost daily of CEE.
- 10+ design revamps using visualization best practices in Tableau and Qlik.
- Migrated 5+ Tableau Dashboards to Qlik Sense Platform.
- Applied Tableau features like LODs, Data Aggregations, Calculated Fields, Joins, Parameters, Table Calculations, Integration, Data Blending, and Dashboard Actions.
- Developed custom SQL connections and calculated fields within Tableau to facilitate automated production of data visualizations.
- Created indexed views, complex stored procedures, effective triggers, and useful functions to facilitate efficient data manipulation and consistent data storage.
- Optimized 10+ Tableau dashboards with a focus on usability, performance, flexibility, testability, and standardization.

Tableau Data Analyst

- Analyzed Customer Service Desk (Service Manager) data to improve efficiency by reducing the cost of operations.
- Worked on creating 25+ complex dashboards using Tableau Desktop and published to Tableau Server for general user consumption.
- 10+ design revamps using visualization best practices and 15+ ad hoc reports delivered in Tableau, according to the requirements within a provided time.
- Worked within and leading multifunctional teams tasked with delivering custom Business Intelligence (BI) solutions.
- Developed 5 leadership and 6 Operational dashboards independently from scratch by extracting data from various sources like Oracle, Snowflake, SQL Server, and SharePoint into Tableau using Relationships and Custom SQL queries.
- Tested Tableau dashboards on various environments before publishing on production server, tracked issues in JIRA and resolved the technical errors before deployment.
- Created report documentation of complex Tableau reports, Data Pipelines, and presentation slides monthly.
- 60+ dashboards validated to run seamlessly upon new product launch and Database upgrade within the deadline.
- Setup end-to-end reporting solutions from scratch and automated the entire process; explained in layman terms.
- Created data masking mappings to mask the sensitive data between production and test environment. Implemented complex SQL scripts to automatically update Tableau Server. Have used charts extensively for presenting various trend analysis in the reports.
- Identified and executed robust and continuous improvement opportunities within the master data management processes in the applicable systems. Identified missing or incorrect master data standards.
- Created SQL Scripts to insert/update and delete data in MS SQL database. Created database tables, wrote stored procedures to update and clean the old data and also helped the front-end application developers with their queries.
- Actively involved in testing new/upgraded features like new Visualizations, Forecasting, Data Blending, Parallelized Dashboard, Hyperlink Objects, Color-coded tabs etc. in Tableau desktop/Server.
- Implemented advanced geographic mapping techniques and use custom images and geo coding to build data visualization (Hex Tile Chart).

CVS PHARMACY, Woonsocket, RI**February 2020 - December 2020****BI Data Analyst**

- Worked in the application UI to present to the end users with Tableau dashboards and visualizations in multiple platforms.
- Worked on advanced web analytics tracking, monitor KPI's using Google analytics, create Google analytics reports and dashboards.
- Performed an extensive graphical visualization of overall data, including customized graphical representation of revenue reports, specific item sales statistics and visualization.
- Extensively used advance chart visualizations in Tableau like Dual Axis Bar Graphs, Tree maps, Bubble Charts, Trend Lines, Waterfall charts, funnel charts etc.
- Collaborated with Database Teams, Marketing Leads, and Business Analysts to gather technical Business requirements, extract the data from data warehouse and developed dashboards containing 15+ key metrics, KPIs, and measures.
- Assisted and owned Google Analytics deployed on client platform to track user activity to recommend multiple teams how to drive engagement. Track and bucket users for customer segmenting to engage with them for potential opportunities.
- Worked with cross functional teams in various organizations understanding requirements engineering, analyzing and documenting business and system requirements.
- Participated in the Test Data Governance working group sessions to create Data Governance Policies.
- Database Analyst with SQL Server, Created Tables, Update and Created Indexes, and Various Security Practices in Microsoft Access Database using VBA.
- Developed the Tableau data sources by connecting to different databases includes Oracle, SQL Server, excel files.
- Analysis, design, development, and implementation of Business Intelligence (BI) solutions focused on streamlining data for operational, functional, and enterprise level reporting.
- Successfully used Agile/Scrum Method for gathering requirements and facilitated user stories workshop. Documented User Stories and facilitated Story Point discussions to analyze the level of effort on project specifications.
- Created customized and interactive dashboards using multiple data sources using Tableau; Good hold over SQL databases and using SQL queries within Tableau.
- Extracted data from SQL Server to pull into Access for data manipulation
- Was responsible in Performance Tuning for queries and indexes using SQL Profiler.
- Used SSIS to import and export data into tables using SQL Server, creating tables, views and Stored Procedures using SQL server.
- Implemented action filters, parameters, calculated filed and set for preparing dashboards and worksheets in Tableau.
- Performed data analysis, position involved extensive routine operational reporting, hoc reporting, and data manipulation to produce routine metrics and dashboards for management.
- Created Tableau scorecards, dashboards using Stack bars, bar graphs, scattered plots, geographical maps, Gantt charts using show me functionality.
- Supported developing and improving master data management to increase operational efficiency.

- Was responsible for all aspects of data governance including creating and maintaining data definitions, data profiling, data quality issue identification, and ongoing data quality monitoring rules.

BAXTER INTERNATIONAL, *Deerfield, IL*

July 2019 - January 2020

Data Analyst

- Worked within a cross functional team of Leadership Team, Business Analysts, Data Analysts and Data Scientists to design reports, dashboards, story boards and Visual representation of Business Statistics.
- Involved in publishing of various kinds of live interactive data visualizations dashboards.
- Performed data profiling and analysis on different source systems that are required for Customer Master.
- Automated multiple reports utilizing MS Access, MS Excel and VBA to increase accuracy and decrease production time.
- Wrote complex SQL Queries by joining multiple tables, creating Views, Stored Procedures, CTEs, and Triggers
- Performed data parsing, data manipulation and data preparation with methods including describe data contents.
- Interacted with DBA to discuss database design and modeling, index creations and SQL tuning issues.
- Performed reverse engineering on a database to sync Erwin data model with database model.
- Maintained and enhance data model with changes and furnish with definitions, notes, reference values and checklists.
- Designed the data mart and successfully implemented the model to meet the business requirements. This position utilizes Data Warehousing methodologies and data modeling techniques to ensure the integrity of data.
- Conducted analysis and profiling of potential data sources, upon high level determination of sources during initial scoping by the project team.
- Built interactive reports, dashboards, and/or integrating modeling results and have strong Data Visualization design skills and analytic background by using Tableau desktop.
- Maintained database, including updating statistics, re-indexing, structure modifications and restore Database backup.
- Worked with Data Warehouse in the development and execution of data conversion, data cleaning and standardization strategies and plans as several small tables are combined into one single data repository system MDM (Master Data Management).
- Prepared Data modeling and Data Mapping document for data elements and data cleansing that were used for Current and New system in MS-Excel.
- Executed SQL queries to retrieve data from databases for analysis.
- Worked with non-transactional data entities for multiple feeds of reference data using MDM.
- Creation of database objects like tables, views, Materialized views, procedures, packages using Oracle tools like PL/SQL, SQL* Plus, SQL*Loader and Handled Exceptions.
- Involved in writing SQL queries to validate the data between source and target systems.

HSBC, *Hyderabad, India*

August 2017 – June 2018

Database Analyst

- Responsible for preparing plan and data set for data migration from one legacy system to newly proposed system.
 - Resolved user queries on the data present in Data Warehouse, Hadoop and AWS Cloud and help the users in providing the definitions and data usage.
 - Worked on collections in Python for manipulating and looping through different user defined objects.
 - Used the DataStage Designer to develop processes for extracting, cleansing, transforms, integrating and loading data into data warehouse database.
 - Used Star Schema and Snowflake Schema for data marts / Data Warehouse.
 - Involved in Data Analysis, Data Mapping and Data Modeling and Performed data integrity, Data Portability testing by executing SQL statements.
 - Created Use case Diagrams, Activity Diagrams, Sequence Diagrams and ER Diagrams in MS Project.
 - Involved in Data Modeling of both Logical Design and Physical design of data warehouse and data marts in Star Schema and Snowflake Schema methodology.
 - Designed and created reports using SSRS and Tableau for the business analysts and end-users.
 - Developed Tableau data visualization using cross tabs, heat maps, scatter plots, geographic map, Pie charts, bar charts, density charts.
 - Used Python to place data into JSON files for testing Django Websites.
 - Used python, Excel, and STATA to cleanse, transform, and manipulate data to make datasets complete and tidier.
-
