EDUCATION

University of Nebraska Medical Centre (UNMC)

GPA: 3.6

Master of Public Health, Biostatistics

Achievements: Recipient of the Swarts and Nekuda Scholarship for excellent performance as a Public Health Intern

Dr. NTR University of Health Sciences (Dr. NTRUHS)

GPA :3.8

Bachelor of Dental Surgery

Achievements: Academic Excellence in Oral Medicine and Radiology

TECHNICAL SKILLS

- **Statistical Analysis & Methods:** Longitudinal Analysis, Survival Analysis, Logistic Regression
- **Programming & Analytics:** R, SAS, SPSS, STATA, Python
- **Data Visualization & Reporting:** Tableau, Excel, GIS, Redcap, Power BI
- **Database Management:** PostgreSQL, Microsoft Access
- **Healthcare Data Standards:** SNOMED-CT, HIPAA, GCP, HL7, CPT, ICD-10, HCPCS, HEDIS, case report forms

PROFESSIONAL EXPERIENCE

Crowd Doing

Aug 2024 - Present

Public Health Expert - Health Intervention and Data Analytics

- Developed SQL-based ETL pipelines to process healthcare datasets, including electronic health records, claims data, and validated health assessments, ensuring compliance with HL7, HIPAA, and GCP standards
- Created interactive Tableau dashboards to analyze the impact of health interventions targeting sleep disorders, anxiety, and mental health, leading to a 25% improvement in public health program evaluations and supporting grant-funded research initiatives

University of Nebraska Medical Center

Oct 2023 – May 2024

Graduate Biostatistician

- Conducted advanced statistical analyses using SAS and R on complex longitudinal healthcare datasets, improving reporting accuracy by 30% through enhanced data visualization techniques and predictive modeling
- Led the development of predictive models using survival analysis and multivariate analysis to assess diabetes and wound complications in bariatric surgery, resulting in an 18% reduction in post-surgical complications and contributing to evidence-based healthcare policy recommendations

University of Nebraska Medical Center

Aug 2022 – Apr 2023

Graduate Research Assistant

- Collected and analyzed qualitative data, conducted community readiness assessments, and performed social network analysis to evaluate public awareness and understanding of early childhood care and education while adhering to ethical research guidelines for IRB applications
- Designed and implemented surveys using REDCap, integrating the data collected into actionable insights, and contributed to grant preparation, manuscript writing, and media monitoring efforts to inform evidence-based recommendations for the project

Dr. NTR University of Health Sciences

Sep 2015 – Apr 2022

Public Health Data Analyst and Dentist

- Led healthcare data analysis for tobacco-related public health initiatives, using SAS, R, and SQL to assess program effectiveness and support public health interventions and grant-funded projects
- Designed and executed advanced statistical models, including longitudinal data analysis and regression techniques, to assess the effectiveness of tobacco control campaigns and evaluate health disparities, improving public health policies

PROJECTS

Social Network Analysis of the "We Care for Kids" Campaign Using R

- Conducted advanced social network analysis using R, identifying 15 key influencers and optimizing engagement strategies, for a grant-funded public health initiative and improving outreach impact

Advanced Health Outcomes Analysis using SQL

- Developed SQL-based data integration processes for EMR and claims data, improving workflow efficiency by 30% and supporting grant-funded health outcomes research

Advanced Statistical Analysis using SAS

- Led longitudinal data analysis using SAS, enhancing predictive model performance by 25% and ensuring compliance with grant-funded clinical research reporting standards

CERTIFICATIONS

- Quality Improvement in Public Health, Good Clinical Practice, Six Sigma, Freedom with AI
