PROFESSIONAL SUMMARY

Versatile full-stack developer with 3+ years of experience with a results-oriented perspective and expertise in Java, Kotlin, Spring Boot, ReactJS, and AngularJS, delivering impactful solutions in e-commerce, automation, and backend optimization

EDUCATION

Syracuse University | M.S. in Computer Science | Syracuse, US

Aug 2022 – May 2024

Relevant Coursework - Algorithms, Object Oriented Design, Android Programming, Computer Architecture

Medi-Caps University | B. Tech in Computer Science | Indore, India

Aug 2016 – May 2020

Relevant Coursework - Data Structure, Operating System, Database Management System, Distributed Systems

TECHNICAL SKILLS

Programming/Scripting Languages:

Java, Golang, Kotlin, Ruby, Linux, C++

Web Technologies:

HTML, CSS, JavaScript, ReactJS, TypeScript, NodeJS, Kafka, GraphQL, Jasmine

Database Tools:

MySQL, MS SQL Server, NoSQL, PostgreSQL, Oracle ERP, Elasticsearch

Cloud Technologies:

Amazon Web Services (ECS, lambda, S3 bucket), Google Cloud Platform, Microsoft Azure

Development Tools:

NetBeans, UiPath, Android Studio, Spring Boot, Junit, Maven, SOAP

Others:

Agile SDLC, JIRA, GitHub, MS Excel, JMeter, Git, TailwindCSS, Docker, RabbitMQ

Publications:

“[SaaS Architecture and Security Issues](#)”, “[Media streaming in Cloud AWS](#)”

EXPERIENCE

Software Developer | Syracuse University | Syracuse, NY

Jun 2024 – Present

- Built an interactive **React UI** with component-based architecture, improving UI performance by 30% and user engagement by 25%
- Automated backend API testing with **JUnit**, reducing production defects by 40% and ensuring 99.9% API reliability
- Developed Spring Boot microservices with **Apache Kafka**, reducing downtime by 35% and increasing processing speed by 50%
- Built secure **GraphQL** APIs in Spring Boot for transaction queries, enhancing data retrieval speed by 40% and ensuring compliance with banking standards

Assistant System Engineer | Tata Consultancy Services | Pune, India

Dec 2021 – Jul 2022

- Collaborated with 15 staff members using **Agile** methods to deliver adaptive website improving page load times by 20%
- Orchestrated creation of **RESTful APIs** for efficient communication among microservices using **Java servlets** which helped in runtime optimization leading to 24% improvement in response times within MetLife portals
- Utilized **socket programming** techniques to boost system scalability resulting in 80% enhancement
- Collaborated with team of 4 members with execution of 50+ Spring Boot test cases to increase performance optimization resulting in 25% system efficiency boost

Associate Software Engineer | Al Sulaihi Building Materials Trading Co. | Dubai, UAE

May 2021 – Dec 2021

- Revamped websites using **ReactJS** ensuring responsiveness achieving 40% improvement in load times
- Designed databases with Erwin Data Modeler and automated testing resulting in cutting post-launch support requests by 9%
- Built RESTful APIs in Golang using **Goroutines** and **Channels**, boosting concurrent handling and increasing throughput by 40%
- Automated integration tests for Golang microservices with **Go Test** and **Testify**, achieving 85% coverage and reducing defects by 30%

Associate Software Engineer | Emorphis Technologies | Indore, India

Feb 2020 – Feb 2021

- Automated robots/workflows using UiPath (**Robotic Process Automation**) which scraped data from websites resulting in 60% reduction in manual data entry efforts and saving time by 100%
- Implemented **SEO** strategies boosting organic traffic by 28% and improving search engine rankings by 15%
- Automated** Beacon Document Management System process yielding 60% increase in team efficiency and saving time by 100%
- Programmed **robot** to autonomously navigate websites, extract information, and transmit data to server with 96% accuracy

PROJECTS

E-Commerce Shopping Cart App | Angular, Java, Spring Boot

Jan 2024 – May 2024

- Engineered an E-Commerce Shopping app, leveraging **Angular**, resulting in 20% improvement in user engagement
- Secured application with **JWT**, **OAuth2**, and **OpenID** Connect, enhancing authentication and authorization by 25%
- Utilized **Jasmine** testing framework for unit and integration tests, ensuring code reliability and reducing bugs by 20%
- Integrated **Stripe API** for credit card payments streamlining transactions and increasing sales revenue by 15%

Telemedicine Platform with Real-Time Chat/Video | ReactJS, Golang, MySQL

Oct 2024 – Dec 2024

- Developed a telemedicine platform using **ReactJS** boosting online consultations by 30% and reducing scheduling time by 40%
- Created a prescription module using **MySQL** by optimized queries and indexing to improve data retrieval speed by 40%
- Integrated **WebRTC** (RTCPeerConnection) with Java Springboot for real-time chat/video reducing consultation time by 20%
- Developed and executed 25+ unit tests with **Jest**, increasing code reliability and consistency by 28%
