

Azan Memon

(773) 517-3013 | Chicago IL | azanmemon.am@gmail.com | www.linkedin.com/in/azan-memon | <https://github.com/azan-memon>

EDUCATION

University of Illinois Chicago | Master of Science in Business Analytics - **CGPA 4.00** **Aug 2023 - Dec 2024**
Institute of Business Administration | Bachelor in Business Administration - **CGPA 3.58** **Aug 2017 - May 2021**
CFA Institute | CFA® Program participant Completed Level 1 **Feb 2021**

PROFESSIONAL EXPERIENCE

Extreme Branding | Data Analyst Intern **Feb 2025 - Present**

- Collaborated with cross-functional teams to gather and analyze business requirements, developing data-driven insights and dashboards using **SQL** and **Python** to support decision-making.

Uber Company (Careem) | Data Analyst **Apr 2022 – Jul 2023**

- Drove data-informed decisions within the FP&A department, providing critical analyses on key performance indicators influencing a **15%** increase in quarterly revenue growth.
- Led the optimization of the ETL pipeline, improving data quality and availability from **90%** to **98%** by developing **Python** and **SQL** scripts.
- Conceptualized five interactive dashboards using **SQL**, **Power BI**, and **Tableau** that tracked user behavior across three distinct product lines; improved cross-product usage by **15%** within six months.
- Created financial models through **Excel** and **SQL** creating organizational strategy and goals, reducing the EBITDA burn by **USD 500,000** in collaboration with management, product, brand, finance, and operations.
- Identified loopholes in the transaction processes through data analytics to avoid fraudulent transactions, resulting in over **USD 15,000** per month efficiencies.
- Initiated and led a technology and product knowledge drive, increasing product understanding within the department through information sessions.

Intermarket Securities | Research Analyst **Jul 2021 – Mar 2022**

- Advised portfolio managers and investors by researching stocks across glass, petrochemicals and packaging industries with **30%** or above potential upsides.
 - Developed financial models and reports using stock valuation techniques for portfolio managers, enhancing the returns by over **25%** on investment.
 - Engineered interactive dashboards on **Power BI** based on management requirements to visualize key metrics, facilitating quick insights and decision-making for investors.
-

PROJECTS

RiseKit | Targeted Employment Support System

- Implemented an **LLM**-based system to analyze **8000 employee profiles** and recommend personalized support services using **OpenAI**.
- Built an interactive interface using **StreamLit** for users to upload resumes to get automated recommendations.
- Automated RiseKit's recommendation process, reducing man-hours by **90%** and improving efficiency.

University of Illinois Chicago:

Deep Learning | Harmful Brain Activity Classifier Model

- Created an input preprocessing sequence in coordination with a team of two to standardize and transform image-based data into tensors through **TensorFlow** and **PyTorch**.
- Developed **Convolutional Neural Networks** using **Python** to achieve **86%** correct predictions from EEGs, solving the multi-classification problem of Harmful Brain Activity.

Machine Learning Statistics | Network Intrusion Detector Models

- Performed Exploratory Data Analysis on a large dataset of **400,000 records**, exploring the distribution, correlation, and identifying key insights using **Python** libraries such as **Pandas**, **Matplotlib**, and **Seaborn**.
 - Formulated machine learning models on **Python**, including **SVM**, **Random Forest**, and **K-Means** to identify Network intrusion types, achieving a testing accuracy of **99.9%** through Random Forest.
-

SKILLS

- **Languages and Tools:** Python, SQL, R Programming, Tableau, Power BI, Excel
- **Business:** Strategy Development, Financial Modelling, Cost Budgeting, Research, Marketing analysis
- **Frameworks:** Random Forest, K-Means CNN, RNN, LSTM, Scikit-learn, Tensor Flow, PyTorch, Scrapy
