PROFESSIONAL SUMMARY

Experienced Data Analyst with over 3 years of experience in data manipulation, statistical analysis, and predictive modeling. Proficient in Python, SQL, R, and SCALA, with expertise in using key Python libraries such as Pandas, NumPy, and Matplotlib for data cleaning, visualization, and analysis. Skilled in cloud platforms like AWS, Azure, and GCP, as well as big data tools including Hadoop, Spark, and Kafka. Experienced in building and deploying data pipelines, conducting exploratory data analysis (EDA), and performing regression and time-series forecasting. Adept at leveraging BI tools such as Tableau, Power BI, and QlikView to deliver actionable insights. Strong problem-solving skills, with a focus on optimizing data-driven decision-making and improving business outcomes.

EDUCATION

Masters in Computer Science

December 2023

Sacred Heart University, Fairfield, CT

Bachelors in Electronics and Communication Engineering

August 2021

D.V.R and Hs Mic College of Technology, Andhra Pradesh, India

PROFESSIONAL EXPERIENCE

Data Analyst, CVS Health, Remote

September 2023 – Present

- Analyzed patient care data from over 500K records to identify trends in chronic disease management, providing actionable insights that supported targeted interventions and improved patient outcomes.
- Developed interactive Tableau dashboards to monitor key performance indicators (KPIs) such as patient wait times, readmission rates, and medication adherence, improving operational efficiency across healthcare services.
- Conducted data quality assessments and implemented data governance strategies, ensuring compliance with HIPAA standards and improving the integrity of patient data across multiple systems.
- Designed and deployed a data migration strategy to transfer 2M clinical records from legacy Oracle systems to Databricks, enhancing data accessibility and reducing report generation times by 30%.
- Created ad hoc reports using SQL and Excel for stakeholders in the healthcare department, enabling quick access to critical metrics and improving decision-making in patient care management.
- Collaborated with clinical and operational teams to identify gaps in healthcare service delivery, using data analytics to support the redesign of workflows and reduce patient processing times.
- Implemented automated reporting solutions using Power BI, allowing real-time tracking of patient care quality metrics and improving responsiveness to patient needs.
- Supported the integration of electronic health record (EHR) data with business intelligence tools, enabling more effective tracking of patient outcomes and operational performance across CVS Health's healthcare services.
- Conducted deep-dive analyses into prescription refill patterns, identifying potential gaps in medication adherence and contributing to initiatives aimed at reducing non-compliance among chronic disease patients.

Data Analyst/BI Developer, Version 1, Bangalore, IN

July 2021 – July 2022

- Analyzed large datasets to identify trends in consumer behavior, providing insights that informed marketing strategies and improved engagement.
- Developed interactive Power BI dashboards to visualize key performance indicators (KPIs), enhancing decision-making across departments.
- Collaborated with teams to design and implement data models, improving data integration and reporting processes.
- Automated routine reporting tasks, increasing reporting efficiency by 25%.
- Conducted regression analysis and time-series forecasting to predict sales trends, aiding inventory management and demand planning.
- Ensured data quality and integrity by implementing validation procedures, reducing discrepancies by 15%.
- Provided training on data analysis tools, fostering a data-driven culture.
- Collaborated with stakeholders to define data requirements and deliver customized reports aligned with business objectives.

Jr. Data Analyst, Sigma InfoSolutions, Ahmedabad, IN

July 2020 – June 2021

- Assisted in analyzing eCommerce transaction data to identify purchasing trends, contributing to improved customer engagement strategies.
- Supported the development of Power BI dashboards to track key performance indicators (KPIs), aiding in data-driven decision-making across departments.
- Collaborated with senior analysts to design and implement data models, streamlining reporting processes and improving data accuracy.
- Assisted in automating routine reporting tasks, reducing manual effort and increasing overall reporting efficiency.
- Supported regression analysis and time-series forecasting to help predict sales trends and improve inventory management.
- Applied basic statistical methods to analyze market data, providing insights to support product development and strategic planning.
- Ensured data quality by validating datasets, contributing to a reduction in discrepancies.

TECHNICAL SKILLS

- **Languages & Databases:** Python, SQL, R, SCALA, MySQL, MS SQL Server, ETL
- **Python Packages:** Pandas, NumPy, Matplotlib, SciPy, Scikit-Learn, Seaborn, Plotly, Plotly Dash, Statsmodels, Jupyter
- **Data Analytics Skills:** Data Manipulation, Data Cleaning, Data Visualization, Exploratory Data Analysis (EDA), Statistical Analysis, Regression Analysis, Time-Series Forecasting, Data Modeling
- **Cloud Platforms:** AWS, Azure (Databricks), GCP
- **Big Data & Tools:** Hadoop, Spark, Apache Airflow, Apache Kafka, BigQuery
- **Machine Learning/AI (Basics):** NLP (Natural Language Processing), A/B Testing, Hypothesis Testing, Supervised Learning, Unsupervised Learning
- **Data Visualization & BI Tools:** Tableau, Power BI, QlikSense, QlikView, Looker, Google Data Studio, Advanced Excel (Pivot Tables, Macros)
- **Version Control:** Git, GitHub
- **Operating Systems:** Windows, macOS, Linux (basic familiarity)
- **Additional Tools:** Databricks, Microsoft Power Query, Microsoft Power Pivot, Microsoft Power Automate
