

Bhavya Sree Eddlapalli

Data Analyst

Texas, USA | 732 523-5844 | bhavyasree12q@gmail.com | www.linkedin.com/in/bhavyasreeeddlapalli/

SUMMARY

Results-driven Data Analyst with 3+ years of experience in transforming complex datasets into actionable insights across healthcare and real estate domains. Skilled in data wrangling, statistical analysis, dashboard development, and reporting using Python, SQL, Power BI, and Excel. Adept at building scalable data pipelines on Azure and AWS, ensuring data accuracy and accessibility. Proven ability to collaborate with cross-functional teams to drive business decisions through data visualization, KPI monitoring, and process optimization. Strong understanding of data governance, compliance standards, and end-to-end analytics workflows in Agile environments.

SKILLS

Methodologies:	Agile (Scrum, Kanban), Waterfall
Languages:	Python, SQL, R
IDEs:	Visual Studio Code, PyCharm, Jupyter Notebook
Packages:	NumPy, Pandas, Matplotlib, SciPy, ggplot2, TensorFlow, Seaborn, Scikit-learn
Visualization Tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP, Power Query)
Database:	MySQL, SQL Server, PostgreSQL, Oracle, Cassandra, MongoDB.
Cloud Technology:	Microsoft Azure, Amazon Web Services (AWS), Google Cloud.
Other Skills:	Informatica Power Center, Talend, Kafka, Snowflake, Ad hoc Reports, Machine Learning Algorithms, Probability distributions, Predictive Modelling, Hypothesis Testing, Regression Analysis, Linear Algebra, Advance Analytics, SSIS, SSRS, SAS, Data Mining, Data warehousing, Data transformation, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling, Data Cleaning, Data Wrangling, Jira, Confluence, GitHub, Bitbucket, Data Factory, A/B testing, Predictive Modeling, KPI reporting, Forecasting.
Operating System:	Windows, Linux, Mac OS

EDUCATION

Master of Science in Information Systems & Technology – University of North Texas, Texas, USA
Bachelor of Technology in Electrical & Electronics Engineering - Siddharth Institute of Engineering & Technology, India

CERTIFICATIONS

- Certified In Microsoft Azure Fundamentals (Azure AZ-900)– Certification ID: 5709F4-06BFC4
- Certified In Microsoft Data Fundamentals (Azure DP-900)– Certification ID: 75D76P-60C861
- Certified In Microsoft Power BI Data Analyst Associate (PL-300)– Certification ID: 0F97EB-BYF5C5

WORK EXPERIENCE

Data Analyst | Humana, Dallas, TX Jan 2024 – Present.

- Designed and implemented a scalable Azure Data Lake architecture to consolidate and process 10M+ Medicare claims daily, enhancing data accessibility by 40% while optimizing storage efficiency and reducing costs by 30%.
- Extracted and analyzed key performance indicators (KPIs) such as claims denial rates, fraud trends, provider billing accuracy, using SQL (Azure Synapse, SQL Server) and Power BI. This led to a 15% reduction in claim rejections and improved financial reporting accuracy.
- Generated ad hoc reports using SQL, Power BI, and Excel to address urgent business queries, supporting executive decision-making and reducing data retrieval time by 35%. Created automated alerts for anomalies, ensuring proactive risk mitigation.
- Ensured HIPAA compliance by implementing Azure Data Lake encryption, data masking, and access controls, securing 100% of sensitive patient data, preventing breaches, and maintaining regulatory compliance.
- Conducted financial risk analysis by identifying high-risk claims and excessive provider billing patterns, leading to a \$5M reduction in unnecessary payouts and optimizing provider reimbursement policies.
- Partnered with healthcare analysts, data engineers, and actuarial teams to refine reporting frameworks, improving claims processing efficiency by 20%, reducing claim disputes by 18%, and enhancing decision-making.

Data Analyst | Prop Tech Solutions, India Jul 2020 – Dec 2022

- Led the development of a real-time property pricing optimization system, ensuring accurate and dynamic pricing recommendations, resulting in a 15% increase in successful property listings and improved customer satisfaction.
- Designed AWS-based data pipelines using Glue, Lambda, and S3, automating data ingestion and transformation, ensuring real-time data freshness for property price predictions.
- Performed extensive data mining and exploratory analysis using Python, Pandas, and NumPy, identifying key pricing drivers such as neighborhood demand, property size, and historical pricing trends, leading to a 15% improvement in pricing accuracy.
- Developed SQL queries (PostgreSQL, MySQL) to extract, filter, and analyze property pricing trends, improving the accuracy of geographic-based price segmentation and enhancing market forecasting capabilities.
- Assisted the Data Science team in developing and fine-tuning predictive pricing models using Scikit-learn (Linear Regression, Random Forest, XGBoost) to recommend optimal property prices based on market fluctuations.
- Integrated AWS Data Lake (S3, Athena, Glue) to store and manage 2 M+ real estate transaction records, reducing data retrieval time by 30% and enabling seamless historical trend analysis.
- Automated KPI reporting in Power BI and Excel, utilizing Pivot Tables, VLOOKUP, and Power Query to track key pricing indicators (listing duration, accuracy, competitiveness), enabling real-time model optimization and generating weekly insights for business decisions.
- Collaborated with cross-functional teams (Product Managers, Data Engineers, Marketing) in Agile sprints, ensuring that model updates and data

insights aligned with business goals.
