Professional Summary

Results-driven Data Analyst with 1.5+ years of experience transforming complex data into strategic insights for business optimization. Skilled in building ETL pipelines, data visualizations, and predictive models using Python, SQL, and BI tools. Experienced with cloud platforms (Azure, GCP) and stakeholder collaboration to support evidence-based decisions.

Technical Skills

Languages: Python, R, SQL, HTML, CSS, JavaScript, Java, C

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, TensorFlow, PySpark

Databases: MySQL, PL/SQL, SQLite, Redis, Neo4j

Cloud: Microsoft Azure, Google Cloud Platform

Tools: Power BI, Tableau, Looker, Excel, SAS, Google Analytics, Docker, Git

Experience

ONTRACKNORTHAMERICA

Feb 2025 – Present

Data Analyst

Philadelphia, PA

- Engineered automated ETL workflows with Python and SQLAlchemy, reducing manual labor by 70%.
- Consolidated multi-source logistics datasets to accelerate insight delivery by 3x and improve compliance analysis.
- Built Power BI dashboards for stakeholders, highlighting emissions, delays, and policy KPIs to boost ROI by 20%.
- Analyzed supply chain inefficiencies, improving decision-making and reducing cycle times by 30%.
- Partnered cross-functionally to deliver scalable analytics aligned with strategic transportation goals.

CSS CORP PVT LTD

Jun 2021 – Jul 2022

Data Analyst

Chennai, India

- Refined SQL stored procedures, boosting data pipeline efficiency by 40%.
- Assembled rule-based audit tools that saved 10+ hours weekly and increased data integrity.
- Directed A/B testing analysis to improve product retention by 20% using Python and data visualization.
- Designed real-time Tableau dashboards for executives to monitor KPIs across UX and engineering metrics.
- Collaborated with QA and development teams to strengthen data pipeline reliability.

Projects

E-Commerce Customer Analytics

Python, SQL, Scikit-Learn, Matplotlib, Seaborn | 2024

- Processed 1M+ records and engineered features for customer segmentation and demand forecasting.
- Clustered users using K-Means based on RFM metrics.
- Implemented Holt-Winters model with 10% MAPE for inventory planning support.

EHR Data Visualization

Excel, Python, Redis, ODBC Driver, Power BI | 2024

- Created a real-time analytics engine to process 100K+ electronic health records.
- Trained classifiers achieving 88% accuracy to predict cardiovascular risk.
- Advanced dynamic clinician dashboards with intuitive filtering and real-time KPIs.

Multilingual Chatbot using RAG

Streamlit, FAISS, LangChain, Hugging Face, Google Gemini AI | 2024

- Constructed LLM-based chatbot for multilingual Q&A with 97% translation accuracy.
- Optimized retrieval speed by 40% using FAISS with HNSW indexing.
- Utilized BERT tokenization to maintain 92% context accuracy across languages.

Education

Rowan University

Jan 2023 – Dec 2024

Master of Science in Data Science

Glassboro, NJ

Jain University

Jul 2018 – Jul 2022

B.Tech in Computer Science and System Engineering (IoT)

Bangalore, India

Certifications

Cisco Networking Academy: Data Analytics Essentials

IBM Skills Network: Python for Data Science

Neo4j Graph Academy: Certified Professional
