PROFILE SUMMARY

Data Science Business Analyst with 2+ years of experience in Python, SQL, machine learning, and business process optimization. Proven ability to lead data-driven projects, implement statistical models, and drive insights aligned with KPIs and strategic goals.

SKILLS

- **Programming:** Python, R, SQL, VBA, SAS, MATLAB, DAX
 - **Technologies:** Tableau, Power BI, AWS, Azure, Drupal, SharePoint, Amazon PI
 - **Machine Learning:** Regression, Random Forest, XGBoost, LightGBM, Neural Networks, GANs
 - **Other Skills:** Predictive Analytics, Data Mining, Statistical Modeling, Business Process Optimization, Workflow Automation, Lean Six Sigma, Agile, Project Management, KPI/OKR Tracking, Cross-Functional Collaboration
-

EDUCATION

Simon Business School, University of Rochester
Master of Science in Business Analytics (A STEM-Certified Program)

Rochester, NY
December 2025

- 3.73 GPA | Merit based Scholarship recipient | Dean's List (Fall 2024, Spring 2025)
- **Relevant Coursework:** Predictive and Causal Analytics, Artificial Intelligence in Business, Machine Learning, AI and Deep Learning
- **Clubs and Activities:** VP of events for Simon Life Sciences Club, Member of Simon Consulting
- **Awards:** 3rd Place - Kogod Case Competition (AI in Water Management for Xylem)

Narsee Monjee Institute of Management Studies
Bachelor's in Pharmacy + MBA (Pharma Tech.) - Integrated Course

Mumbai, MH
June 2023

- **Relevant Coursework:** Pharmacology, Pharmaceutical Chemistry, Biotechnology, Clinical Pharmacy, Marketing Management, Financial Analysis, Strategic Leadership, Operations Management, Biostatistics, Statistics, Data Management
-

PROFESSIONAL EXPERIENCE

Simon School Venture Fund
Investment Analyst

Rochester, NY
October 2024 - May 2025

- Developed financial models (DCF, Monte Carlo, sensitivity analysis) for 8+ startup evaluations, enhancing ROI forecasting accuracy.
- Analyzed large datasets from PitchBook and SQL to identify market trends, improving investment recommendation quality by 20%.
- Created predictive models to assess startup risks and revenue potential, contributing to multiple funding decisions.
- Authored detailed investment memos based on data-driven insights to guide cross-functional decision-making.

Signutra USA
Market Data Analyst

Wilmington, DE
May 2023 - June 2024

- Built interactive dashboards (Tableau, Power BI) with Python and SQL-driven ETL, increasing campaign optimization speed by 40%.
- Conducted predictive demand forecasting using statsmodels and A/B testing, contributing to \$216K in revenue and a 4.1% increase in market share.
- Applied machine learning models (XGBoost, LightGBM) with cross-validation and hyperparameter tuning to segment customer behavior, boosting campaign efficacy by 23%.
- Developed R-based seasonal forecasting models (Prophet, forecast), improving lead conversion by 22% through early trend detection.

Medisage
Data Science Intern

Mumbai, MH
June 2022 - October 2022

- Performed EDA on physician engagement using Python (Pandas, Matplotlib), identifying targeting opportunities and improving outreach by 15%.
- Designed and applied NLP models to categorize unstructured feedback from 70K+ healthcare professionals, enhancing content strategy alignment.
- Built a web scraping tool to compile a 500K+ doctor database, streamlining data warehousing and increasing outreach efficiency by 20%.
- Partnered with marketing to translate insights into action, resulting in a 35% increase in doctor registrations in 3 months.
