SUMMARY

AI & Analytics Engineer with 3+ years of experience architecting **AI-powered** solutions and designing scalable **ETL pipelines**. Proficient in **Azure Open AI models, Copilot Studio, Power Automate, Python, SQL, Tableau, Alteryx, and Fabric**. Demonstrated expertise in end-to-end data workflows, including data ingestion, transformation, and storage optimization. Skilled in orchestrating high-volume **data pipelines** using **Apache Airflow, Kafka, and Azure Data Factory**. Adept at collaborating with cross-functional teams to translate complex data into actionable business insights through advanced analytics and automation.

TECHNICAL SKILLS

- **AI & Automation:** Microsoft Copilot Studio, Power Automate, AI-based Agents, Prompt Engineering, TensorFlow
- **Data Engineering:** ETL, SSIS, Databricks, Snowflake, Azure Data Factory, Blob Storage, Apache Airflow, Kafka, Lucidchart, Visio
- **Data Analysis:** Python Pandas, NumPy, Matplotlib, SQL, SSAS, SSRS, Power BI, Tableau, Amazon QuickSight, DAX, Looker Studio
- **Data Management & Processing:** MS Fabric, RDBMS, PostgreSQL, MySQL, SQL Server, Excel Pivot Tables, VLOOKUP
- **Cloud & DevOps:** Azure, Salesforce Data Cloud, Sales Cloud, Marketing Cloud, AWS, GCP, Azure DevOps, GitLab
- **Project Management & Testing:** Agile Scrum, SDLC, JIRA, Slack, MS Suite, Google Suite, A/B Testing, Smoke Testing, Selenium

WORK EXPERIENCE

Borough of Manhattan Community College, USA - BI & Automation Engineer

December 2024- Present

- Engineered an **AI agent** to automate ticket management, targeting a 50% reduction in manual effort; integrated agent with ticketing system to retrieve information and facilitate live agent chats for issue resolution.
- Orchestrated projects from initial **SOW** through on-time delivery; led business engagement sessions to capture and document application-specific data requirements for test data generation and protection.
- Oversaw end-to-end implementation and management of **Microsoft Fabric** and **Power BI**, including **server connections, gateways**, workspace creation, **pipeline deployment**, user assignment, **OneLake** catalog management, **SSRS** report migration, report sensitivity labeling, and dataset/report monitoring.

Virtual Infra Services, USA - Associate Data Analyst

May 2023 - December 2024

- Analyzed and remediated **CrowdStrike faulty sensor** issues across 2,000+ servers and 50,000 endpoints, prioritizing high-impact systems to ensure timely project completion.
- Quantified financial impacts for three remediation projects, uncovering 20% in previously unaccounted risks to enable rapid mitigation.
- Automated data workflows using **Power Automate**, decreasing manual hours by 10 per week and boosting departmental operational efficiency by 15%.
- Designed and implemented **PostgreSQL database** schemas on **Azure VM**, configured user permissions, and maintained **Azure Blob Storage** containers, optimizing data management efficiency by 25%.

Accenture Private Limited, India - Data Analyst

August 2021 - July 2022

- Delivered actionable insights to senior management by analyzing POS sales and financial datasets, enabling data-driven decisions that optimized inventory management and reduced stock outs by 12%.
- Enhanced POS system efficiency by 20% through the development of robust **ETL pipelines**, ensuring timely and accurate sales data availability.
- Managed **Azure DevOps** pipelines for cloud-based data workflows, improving team productivity and data accessibility for financial reporting.
- Created interactive Power BI and Tableau dashboards to visualize key sales and financial metrics, facilitating informed decision-making.

Amazon Development Center, India - CS Analyst

March 2021 - July 2021

- Processed large-scale datasets using **SQL, Python, and Amazon QuickSight** to identify patterns and trends, optimizing logistics and product offerings, resulting in a 15% increase in customer satisfaction.
- Improved data processing efficiency by 30% by designing robust **data pipelines** and workflows for recurring reports, enabling real-time data accessibility.
- Leveraged **Amazon QuickSight** to develop **interactive dashboards** visualizing customer behavior and product performance, which facilitated the data-driven identification of 10 key areas for improvement and enhanced decision-making processes.

EDUCATION

- **Central Michigan University, Michigan, USA**
Master's Degree - Information Systems

August 2022 – May 2024

CERTIFICATIONS

- Google Cloud Data Analytics Certificate - *Google*
- Salesforce Agentforce Specialist - *Salesforce*
- Salesforce AI Associate - *Salesforce*
- Generative AI: Enhance your Data Analytics Career - *IBM*
- Certified Associate Data Analyst - *Data Camp*
