WORK EXPERIENCE

Software Engineer Intern

July 2024 - Present

Changing The Present | **React.js, PostgreSQL, Splunk, Kafka, GraphQL**

New York, USA

- Implemented reusable components and optimized the performance of existing **React.js** code, leading to a 20% increase in page load speed, adhering to clean code practices
- Integrated **Splunk** for real-time monitoring and logging by setting up dashboards and alerts, enhancing the system's observability and troubleshooting capabilities
- Utilized **Kafka** for efficient data streaming between microservices by designing and implementing a robust messaging system, improving the overall scalability and reliability of the application
- Developed efficient **SQL** queries and leveraged **PostgreSQL** for robust database management and data integrity

Software Engineer

Mar 2021 - Aug 2022

Kellton Tech Solutions Limited | **Java, SpringBoot, MongoDB, AWS, Agile**

Gurugram, India

- Developed high-performance **Java SpringBoot** microservices, reducing API response time by 30% through optimized code design while leading the key phases of SDLC, from requirements gathering to deployment
- Diligently performed **root cause analysis** for over 100 **production** and **UAT** bugs, driving corrective actions and achieving a 90% reduction in recurring issues, enhancing system reliability by 40%
- Contributed to **Agile** processes, including sprint planning, daily stand-ups, and retrospectives, achieving a 95% on-time delivery rate of features using **JIRA**
- Integrated security measures against **log4j** and **Spring4shell**, reducing vulnerabilities across all microservices by 25% through code reviews and implementation of advanced security protocols
- Utilized **Junit** and **Mockito** for unit and integration testing, improving code quality by 40% resulting in a 20% decrease in post-deployment bugs

PROJECTS

BeforeRelease | SpringBoot, React, MongoDB, Firebase, JWT

Jan 2024 - May 2024

- Developed a web application utilizing **SpringBoot** for the back-end, offering a streamlined platform for users to evaluate and rate movies based on their trailers prior to release, using **JWT** for authentication and authorization
- Implemented a user-friendly interface using **React.js** featuring a video player integrated with YouTube API, allowing users to watch trailers directly on the platform and provide detailed reviews and star ratings for each movie

NurtureNest | React, Redis, MongoDB, Redux, AWS S3, NodeJS, Socket.io, OAuth

Jan 2023 - May 2023

- Built a robust React Web App using **MERN** stack to create a childcare management platform streamlining nanny hiring, task management, and real-time parent communication
- Implemented a real-time chat feature using **socket.io** to improve user interaction and facilitate seamless communication
- Leveraged **AWS S3** for secure storage and retrieval of user-uploaded images, ensuring data security and accessibility
- Utilized **Redux** for robust state management, significantly improving tracking capabilities for meals and vaccine records

SKILLS

Programming Languages: Java 8, J2EE, JavaScript, TypeScript Python, HTML5, CSS3, XML

Frameworks: SpringBoot, Node.js, React.js, MERN, Microservices, Android Studio, Docker, Kubernetes

Databases: SQL, Oracle, PostgreSQL, NoSQL, MongoDB, MySQL

Engineering Tools: REST API, Redis, Sonar, Kafka, JSON, CI/CD(Jenkins), JUnit, Swagger, Git, Microsoft Office, GCP

AWS Services: IAM, SQS, ECS, Lambda, S3, DynamoDB, Fargate, RDS, API Gateway, Route 53, Cloudwatch, CLI

EDUCATION

Master of Science (M.S) in Computer Science

Sep 2022 - May 2024

Stevens Institute of Technology, Hoboken, NJ, USA

GPA: 3.6/4.0

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Aug 2017 - Aug 2021

Dr. A.P.J. Abdul Kalam Technical University, India

GPA: 3.0/4.0
