

GAYATRI SHARMA KURMATEY

San Francisco, California | 4695889006 | gkurmatey@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Professional with 7+ years of experience leading data-driven projects, designing scalable pipelines, and delivering enterprise-grade BI and analytics solutions. Proficient in Python, SQL, Tableau, Power BI, Power Automate, and Spark, with hands-on expertise in ELT workflows, data modeling, and cloud-based architectures. Led cross-functional teams to implement data pipelines, orchestrate workflows and enhance data quality and observability. Recognized for leading automation initiatives, mentoring engineers, and driving innovation in modern data engineering to streamline business processes and improve productivity

WORK EXPERIENCE

Robert Half, Fremont Unified School District, California, Data Science Engineer

March 2024 – Jan 2025

- Led a team of 6 to build scalable ETL pipelines, integrating CI/CD via Azure Synapse & Power Platform to cut runtime by 5 hours and enhance data reliability
- Improved cross-platform data exchange efficiency by 30% through strategic API integrations and schema mapping
- Built ERP-integrated dashboards and automated pipelines with Power Platform and SharePoint, using A/B testing to align KPIs and boost finance reporting transparency
- Built automated software for 2,500+ laptop allocations and HR data using Microsoft Power Platform and SharePoint, saving \$100K+ annually and recognized as a lighthouse project across California school districts
- Mentored team members on Power Platform, saving 2 hours daily through improved workflows and scalable BI practices

Pacific Gas and Electric Company, California, Data Science Engineer

May 2023 – Aug 2023

- Reduced dashboard load time by 20 minutes daily by optimizing Spark SQL and Delta Lake pipelines on Power Platform, and fine-tuned data access with RLS in Azure Active Directory for executive reporting
- Automated SQL and SharePoint data pipelines in Power BI, improving KPI and saving 20+ hours weekly for onsite inspection team
- Trained teams on complex Power Query and DAX, boosting dashboard performance by 40% and analytics productivity by 25%

Tesla Inc, Fremont, California, Data Science Engineer

May 2022 – Dec 2022

- Built SharePoint-driven dashboards for employee data updates, enabling executives to make faster business decisions on Bay Area office space planning, saving 10+ hours weekly and earning recognition from the VP and senior leadership
- Analyzed invoice payment statuses using Tableau dashboards, flagging overdue and pending payments to accelerate vendor follow-ups and improve payment cycle transparency
- Created 20+ Power BI dashboards for ~\$1.3B CAPEX projects, enabling executive visibility and PM insights, improving performance with DAX and Power Query tuning, A/B testing, and user feedback
- Delivered real-time vendor analytics and BOM forecasts with Qlik Sense, Power BI and Tableau
- Engineered forecasting logic and data input flows for construction budgeting app, enabling real-time projected vs. actual cost comparisons across 40+ R&D initiatives through statistical, prediction and inferential KPI models
- Designed a centralized construction tracking dashboard that automated permit status and milestone updates, reducing manual reporting time by 40% and improving floor/lab-level visibility
- Administered access and security for Power BI and Power Apps by implementing RLS with Azure AD and migrating construction data pipelines from SharePoint to Dataverse for unified Power Platform integration

Tango Analytics, Texas, Data Scientist

Jan 2022 – May 2022

- Spearheaded automation of floor plan annotation using Computer Vision techniques, OpenCV, and Mask R-CNN to generate high-quality training datasets
- Improved ML model integration by 65% with 88% entity recognition accuracy, accelerating data labeling and enhancing overall pipeline efficiency

Amazon, Hyderabad, India, Data Science Engineer

Aug 2018 – Aug 2019

- Boosted operational efficiency by 80% with ETL pipelines using Qlik Sense, Tableau, Power Platform, and Python
- Supported logistics analytics with SQL, VBA, and M Query, saving \$10K weekly in last-mile operations and resource costs

Indian Space Research Organization, India, Data Science Engineer

May 2017 – Mar 2018

- Devised a conference hall booking system for ISRO using Sybase, MySQL, and Java, improving processes by 17 hours weekly
- Developed multidimensional models for procurement data in MySQL and a web app, enhancing decision-making by 75%

RESEARCH EXPERIENCE

NASA Ames Research Center, California, Open-Source Collaborator

Feb 2024 – Present

- Engineered atomic-level graph embeddings from PDB kinase structures using Graph2Vec and Graph Neural Networks (GNNs)
- Applied statistical modeling and dimensionality reduction (UMAP/t-SNE) to validate embedding quality and optimize clustering of active/inactive chains of protein conformations

Jet Propulsion Laboratory, NASA, California, Volunteer Research Assistant

May 2023 – Aug 2023

- Compiled insights through advanced data analysis, utilizing LLMs, BERT, PyPDF2, and Haystack for knowledge extraction

The University of Texas at Dallas, Research Assistant

Jan 2022 – May 2022

- Coded a containerized Open Data Cube project for NASA, automating data ingestion of over 500 satellite images

SKILLS

Automation & Workflow: Power Apps, Power Automate, ChatGPT, Airflow, Microsoft Copilot, Dataverse

BI & Data Visualization: Power BI (DAX, Power Query, DAX Studio), Tableau, Qlik Sense, Google Analytics, Chimera, OLAP (SSAS, Multidimensional Data Models)

Cloud & Infrastructure: Azure, Snowflake, Microsoft Intune, AssetSonar, SharePoint

ML Models: Neural Networks (Mask R-CNN, Graph Neural Networks, Recurring Neural Networks), Unsupervised Models

Data Science & Programming: Python (Pandas, NumPy, Matplotlib, Plotly), Jupyter Notebook, Docker

Database & ETL: Microsoft SQL Server, MySQL, PostgreSQL, MariaDB, PL/SQL, BigQuery, ERP Data Integration

Excel & Scripting: Advanced Excel (Pivot Tables, VBA, Macros and Advanced Functions)

Project & Team Management: JIRA, Confluence, Microsoft Project, Monday.com

EDUCATION

Master of Science - *Information Technology & Management, University of Texas at Dallas*

Jan 2021 – Dec 2022

Bachelor of Technology - *Computer Science, Jawaharlal Nehru Technological University*

Sep 2014 – Jun 2018

ACHIEVEMENTS & CERTIFICATIONS

Databricks badge on Databricks Fundamentals

Databricks badge on Generative AI Fundamentals

NASA Badge on Open Science 101

Recognized by VP and district officials for dashboarding solutions implemented at FUSD and Tesla

LinkedIn Certification in Tableau

LinkedIn Certification in Supply Chain Analytics

Scholar with Recognition at University of Texas at Dallas for top 3 Highest GPA
