PROFILE SUMMARY

"Highly skilled SAP Analyst with expertise in optimizing supply chain processes and improving business operations using SAP ECC, MM, SD, and BW modules. Adept at identifying system gaps, implementing SAP solutions, and collaborating with business stakeholders to align IT systems with strategic goals. Currently pursuing a master's in management information systems, passionate about leveraging IT to streamline business processes and drive operational efficiency. Proficient in business analysis, SAP configurations, troubleshooting, and using advanced analytics for data-driven decision-making."

EXPERIENCE

LINEYSHA AND THE VAN SOFTWARE TECHNOLOGIES

Full Stack Python Developer

Vijayawada, INDIA - 7/2022-11/2022

- Architected robust API solutions in Python that facilitated real-time data exchange for over 1,000 users daily findings led the team to address system bottlenecks that caused the application crashes during peak hours.
- Built responsive UIs with HTML, CSS, JavaScript, and React.js, ensuring mobile-friendly designs.
- Wrote complex SQL queries and managed databases (MySQL/PostgreSQL) for efficient data handling.
- Improved back-end performance through code optimization and caching with Redis.
- Implemented unit tests with a py test to ensure back-end functionality and reliability.
- Collaborated in Agile sprints, contributing to daily standups, code reviews, and planning.
- Managed version control with Git and contributed to deployment via Docker and AWS (EC2, S3).
- Troubleshoot and resolved bugs, enhancing application stability and user experience.

Spotlight Inc.

SAP Analyst Intern

Hyderabad, INDIA- 02/2021-10/2021

- Utilize OSS to interface with SAP's support mechanism as required
- Testing: Support testing phases of incidents/service requests by ensuring the team fixes defects/errors promptly and that defects are categorized/prioritized. Maintain documents for all phases of incidents/requests
- Engaged with over 50 internal and external stakeholders to gather insights on system changes, leading to a streamlined communication process that improved incident resolution times by an average of 40%.
- Utilize a solid understanding of supply chain business processes to anticipate short-term and future needs
- Leverage a deep understanding of how the business uses the IT tools and how these tools interact to influence the business to think in new ways by providing design direction, including alternative options for meeting business outcomes
- Work with business area leadership, IT Architects, and Enterprise IT architecture on cross-organizational issues. Act as interface between IT and Business Partners on or across large projects or programs.

EDUCATION

Lamar University

Master of Science in Management Information Systems | 2023-2025

GPA: 4.0/4.0

KL University

Bachelor of Technology in Electronics and Communication Engineering | 2019-2023

GPA: 9.1/10

PRACTICAL SKILLS

ICT Skills: SAP BASIS, SAP Security, AWS, Java, HTML5, C Language, Web Design, Front-end Developer, Microsoft Office, Power BI.

Languages Known: English, Telugu, Hindi

PROJECTS

Internship-Vijayawada, India

“E-commerce Web Application and Employee Management System”

July 2022

At LINEYSHA AND THE VAN SOFTWARE TECHNOLOGIES, I worked on two major projects. The first, an E-Commerce Web Application, involved developing RESTful APIs with Flask to handle customer orders, product information, and user authentication. I built a responsive front-end using React.js, ensuring a seamless shopping experience, and optimized the MySQL database for fast data retrieval. I integrated Redis for caching and improved performance and hosted the app on AWS EC2 with S3 for scalable storage. The second project, an Employee Management System, used Django to create secure back-end APIs for employee records, attendance tracking, and payroll processing. I implemented real-time attendance tracking and worked closely with the front-end team to ensure a user-friendly interface. Both projects were deployed on AWS EC2 and managed with Git, ensuring smooth development and deployment processes.

Spotlight Inc., Hyderabad, INDIA 2021

Feb

During my time at Spotlight Inc., I assisted in analyzing and improving supply chain business processes using SAP ECC, SAP MM, and SAP SD. I worked on optimizing order processing, inventory management, and procurement, identifying process gaps, and proposing solutions to streamline operations and reduce delays. By conducting business requirement analysis, I recommended SAP configurations to enhance procurement cycles and improve order fulfillment. I also collaborated with IT architects and business leaders to align SAP systems with business goals and utilized SAP BW to deliver actionable insights, supporting better decision-making for supply chain managers.
