

HARSH DESAI

Healthcare Project Delivery | Business Analyst II | Scrum Master (PSM II)

667-577-0208 | harshdesai3011@gmail.com | [Linkedin](#)

EXECUTIVE SUMMARY

Professional Scrum Master and Healthcare Business Analyst with deep expertise leading cross-functional teams to deliver enterprise healthcare IT solutions. Adept at facilitating stakeholder collaboration, gathering and documenting complex requirements, aligning people, process and technology and driving strategic improvements across Medicaid claims processing, prior authorization workflows, and member enrollment systems. Recognized for aligning people, process, and technology to increase operational efficiency, and ensure regulatory compliance.

Proven track record supporting the full SDLC within Medicaid Management Information Systems (MMIS) while executing with precision in time-sensitive, high-impact projects.

KEY STRENGTHS

- **Project Delivery:** Scrum Ceremonies • Cross-functional Collaboration • Stakeholder Engagement • Strategic Roadmapping • Execution Oversight • Strategic Communications
- **Healthcare IT & Medicaid Expertise:** Medicaid Management Information Systems (MMIS) • Claims Adjudication • Prior Authorization • Member Enrollment & Billing
- **Business Analysis & Requirements Gathering:** Functional Documentation • Systems Analysis • Gap Analysis • Requirements Analysis • Traceability Matrix
- **Testing & Quality Assurance:** UAT Coordination • Regression Testing • Functional Testing • End-User Training

TECHNICAL CERTIFICATIONS & TRAINING

Professional Scrum Master I (PSM I), Scrum.org

Professional Scrum Master II (PSM II), Scrum.org

UDEMY Training:

Business Analyst: *Project Management and Tools*

Become an Agile Business Analyst in Scrum

Agile Crash Course: *Agile Project Management, Agile Delivery*

User Stories for Agile Scrum + Business Analysis

Chat GPT for Project Managers: *From Basics to Advanced!*

Scrum Certification + Scrum Master + Agile Scrum Training

ChatGPT: *Project Management Mastery with ChatGPT*

EDUCATION:

Bachelor of Computer Engineering, Gujarat Technological University, Gujarat, India

PROFESSIONAL EXPERIENCE

GAINWELL TECHNOLOGIES

Oct 2020 – Present

PROFESSIONAL HEALTHCARE BUSINESS ANALYST

Client: State of Florida - Agency of Healthcare Administration (AHCA)

Led cross-functional healthcare IT projects supporting Florida Medicaid (FLMMIS), managing subsystem updates, client change requests, and cross-departmental coordination with state agencies. Acted as both Business Analyst and Ad-hoc team lead, ensuring seamless operations, stakeholder engagement, and subsystem clarity across the entire systems' team.

- **Project Workflow Excellence:** Spearheaded subsystem-focused change request projects, coordinating between Systems Engineers, Tech Leads, and Project Managers. Oversaw project lifecycles from documentation to approval and deployment.
- **Business Analysis:** Analyzed requirements, system logic and documentation to meet operational, functional, and required system functionalities. Provided supervision, assigning tasks to juniors and peers as well as approving the test results documents before the documentation is placed for client approval.
- **Requirements Management:** Conducted requirements gathering and elicitation, delivered impactful walkthroughs and client presentations, tracked task statuses and drafted detailed meeting summaries to keep the client informed and aligned.
- **Cross-Functional Collaboration & Engagement:** Facilitated meetings with development team, project management, and the client to review defects, discuss solutions and address concerns.
- **Testing & Quality Assurance:** Drafted Requirement Traceability Matrix and test documentation and verified that the client

requirements are incorporated into the system plan and conducted tests to ensure the system changes meet business needs.

Notable Contributions & Successful Task Completion

- **Subsystem SME & Internal Enablement:** Became the go-to expert for subsystem functionality, and authored a fully updated, screenshot-rich internal manual to onboard new team members and resolve cross-functional inquiries.
- **Agile Leadership & Issue Resolution:** Assumed team leadership in absence of the PM and the Lead — facilitating stand-ups, monitoring progress in Excel logs, and proactively removing blockers to keep project delivery intact.
- **Claims-PA Domain Expertise:** Applied strong working knowledge of Medicaid billing (inpatient, outpatient, physician claims), reimbursement methodologies, and authorization workflows to support accurate documentation, testing, and system design. Implemented a claims-prior authorization self-serve tool that reduced workload, and follow-up calls by over 35% while decreasing troubleshoot requests to the call center.
- **Continuous Improvement & Knowledge Sharing:** Provided team-level mentorship and led knowledge transfer to ensure continuity of service and system understanding.

DXC TECHNOLOGY

Oct 2019 – Sep 2020

PROFESSIONAL HEALTHCARE BUSINESS ANALYST

Role Execution: *Project Support & Business Analysis, Systems Updates, Requirements Gathering, Systems Testing & Documentation*

- **Business Analysis & Support:** Assisted with planning, designing, development handling multiple projects concurrently. Created and deployed documentation to meet operational, functional, and required system functionalities and actively attended meetings and discussions, offering input and value whenever required.
- **Strategic Documentation and Management:** Outlined standardized approaches for preparing and maintaining consistent documentation. Generated test documents for every test run on the system, large or small, and constructed spreadsheets to track outstanding defects. Created spreadsheets to help the team track changes for our subsystem.
- **Systems Testing:** Executed and troubleshoot existing and proposed system tests from test plans. Performed Regression Testing to check if the existing functionality of the product is impacted after code changes.

PYRAMID CONSULTING

Feb 2019 – Apr 2019

TECHNICAL BUSINESS ANALYST

Client: Accenture

Role Execution: *Business Analysis & Documentation, Strategic Planning, Requirements Gathering, Project Support and Execution*

- **Business Process Management:** Identified, developed, and implemented system enhancements, and modifications and acted as a liaison between the Project business units and the IT department.
- **Collaboration & Engagement:** Work effectively and individually with consultants, Technical and Non-Technical team members and stakeholders documenting the current state of systems, technical processes, performing gap analysis and helping to define and document the future state systems and processes.
- **Requirements Analysis:** Gathered business requirements and assisted the technical team to understand business needs, working with business users and SMEs to gather expectations of the new system and prioritized initiatives based on business needs and requirements.

EARLY CAREER SUCCESS

- BUSINESS SYSTEM ANALYST INTERN – *Kinsh Technologies* | Gujarat, India (Jan 2018 - Jun 2018)
