Detail-oriented and results-driven student with hands-on experience in financial data analysis, dashboard development, and business intelligence reporting. Proficient in tools like Power BI, Excel, and SAP to transform raw operational and financial data into actionable insights. Skilled in SQL and Python for data extraction and manipulation, with a strong foundation in financial reporting, budgeting support, and variance analysis. Proven ability to collaborate cross-functionally and support business decisions through clean, reliable data.

EDUCATION

Binghamton University, New York

GPA: 3.56

Bachelor of Science, Computer Engineering

Cum Laude Honors, May 2025

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL ([Basic](#) & [Intermediate](#) Certification)

Analytics Tools: Alteryx, SAP, Power BI

Data Manipulation & Cleaning: Excel & Python

PROJECT EXPERIENCE

Senior Design Project – Smart Micro- Particle Manipulation Chamber

Binghamton University (September 2024 – May 2025)

- Designed real-time data logging and analysis system using Python, FastAPI, and PostgreSQL.
- Collected, analyzed, and visualized experimental data to identify trends and performance metrics, enhancing system control strategies.
- Delivered insights on operational efficacy through data-driven reporting and statistical summaries for decision-making.

TECHNICAL EXPERIENCE

Data Analytics Intern – Splash Scripts

Coimbatore, India (May 2024 – Aug 2024)

- Developed automated financial dashboards and operational reports in Power BI, reducing manual reporting time by 40%.
- Cleaned and manipulated large financial and operational datasets using Excel functions (VLOOKUP, XLOOKUP, Pivot Tables, Forecasting).
- Extracted and consolidated financial data from SAP S/4HANA, integrating with Power BI for dynamic variance analysis and monthly performance reporting.
- Wrote optimized SQL queries to join financial and operational datasets for profitability and trend analysis.
- Collaborated with cross-functional teams to support budgeting, forecasting, and ad hoc financial analyses.

Data Analytics Intern – Pricol Ltd.

Coimbatore, India (May 2022 – Aug 2022)

- Analyzed production and financial data using SAP systems, supporting financial reporting and performance tracking for internal teams.
- Created Tableau dashboards to visualize production trends and cost metrics for management reviews.
- Cleaned, validated, and structured raw financial data in Excel to support accurate reporting and variance analysis
- Wrote basic SQL queries for financial and inventory data extraction.
