PROFESSIONAL SUMMARY

Experienced Full Stack Software Engineer with a background in developing high-performance web applications and REST APIs using Java, C#, .NET, Blazor, React, Angular, and AWS. Seeking a challenging role to leverage skills in software development life cycle, cloud architecture, microservices, and continuous integration.

TECHNICAL SKILLS

Languages: Java, C#, Python, C++, Javascript, Typescript, HTML, SQL

Technologies & Frameworks: Spring Boot, React Native, Angular, AngularJS, .NET Core, ASP.NET MVC, Blazor, Flask, Selenium, JUnit, Cucumber, Karma, Protractor, Django, Elasticsearch, Git, Docker, MySQL, MongoDB

Cloud & Tools: AWS, GCP, Grafana, Kibana, SonarQube, Postman, Fiddler

WORK EXPERIENCE

Software Developer Intern | *Van Metre, Virginia, USA*

Jun 2023 - Present

- Contributed to the development of an in-house ERP application using C# .NET and Blazor framework, replacing a third-party solution, leading to a 15% cost reduction on software expenses.
- Collaborated with a team of 4 developers to streamline operations and data analytics, impacting over 100 employees within the company.

Software Engineer | *NICE CXone, Pune, India*

Dec 2019 - Jul 2022

- Implemented REST API endpoints using Spring MVC controllers, Hibernate, and Spring Boot within a Microservice architecture, enhancing application concurrency by a factor of 10.
- Leveraged AWS cloud services (CloudWatch, EC2, Lambda, EBS, S3, and Batch) to automate log monitoring, code execution, load balancing, data storage, and batch processing.
- Designed and instituted the Backend and Frontend for key features such as Bulk Update, What-If forecasts, and inclusion of special days for a Contact Center SaaS Workforce Management (WFM) forecasting tool using Java Spring Boot and Angular, reducing customer data entry time from 30 minutes to 20 seconds.
- Fine-tuned ML algorithms including Exponential Time series and Box Jenkins ARIMA to accurately predict call volumes and average handling times over a period of 2 years.
- Engineered 100+ Scala-based test scripts, conducting rigorous performance testing on 200+ API endpoints.
- Developed simulations employing patented AI algorithms to optimize staffing for over 10,000 agents.
- Optimized microservices and webapps through rigorous Unit and Integration testing using JUnit, JSystem, Jasmine, and Karma; implemented automation scripts with Protractor, Cucumber, Bower, and Grunt, enhancing overall testing efficiency by 40%.
- Constructed a Grid view for forecasting data, customizing Angular ag-grid, enhancing user experience by 25%.

Software Developer | *Tripstack, Pune, India*

Jun 2018 - Dec 2019

- Implemented modules in C# .NET, facilitating flight search and booking services for a user base of over 10,000.
- Added New Distribution Capability (NDC) APIs which reduced search response latency by 90%.
- Revamped an AngularJS application, boosting developer throughput by 50%.

EDUCATION

University of Maryland Baltimore County

Baltimore, Maryland, USA

Master of Science, Computer Science GPA: 3.9/4

August 2022 - May 2024

Pune Institute of Computer Technology

Pune, Maharashtra, India

Bachelor of Engineering, Computer Engineering CGPA: 7.9/10

August 2014 - May 2018

PROJECTS

- Student's Kitchen**, Developed a mobile application using **React Native** for an online food delivery business.
- Smart BEAM**, Created an **Android** app for real-time photo and video sharing with over 500 downloads, managed a **Python Flask** server for client interface controlling over 100 display screens, and deployed a **Node.JS** script on **Raspberry Pi** for real-time data display on subscribed screens using **Publisher-Subscriber** model.
