Objective: Passionate and results-driven Software Engineer with expertise in Python, C++, Java, Flask, and Spring Boot, seeking a role to build scalable, high-performance applications. Strong background in data structures, algorithms, web development, and cloud computing with certifications in AWS, Kubernetes, and Terraform.

Education:

B.S. in Computer Science

University of Maryland Global Campus
GPA: 4.0/4.0

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Discrete Math, Linear Algebra, Calculus I-III

Certifications:

Cloud Architect	Certified Associate Solution Architect – AWS
Container Orchestration	Cloud Native Computing Foundations – Certified Kubernetes Administrator (CKA)
Infrastructure as Code	Hashicorp Cloud Engineer Certifications – Terraform Associate

Technical Skills:

Programming Languages::	Python, C++ Java, Bash, HTML, JavaScript
Cloud & DevOps	AWS, Oracle Infrastructure Cloud, Azure, Kubernetes, Docker, Terraform
Application Server	Oracle Weblogic 12c
Single Sign-On Server	Oracle Access Manager 12c
LDAP	Oracle Unified Directory 12c
Web Server	Oracle HTTP Server 12c
Web Development	Flask, Spring Boot, REST APIs, Frontend (JavaScript, HTML)
Databases	Oracle 12.X, Oracle 19.X, MySQL
Operating Systems:	Redhat Linux 7.X, 8.X, Mac OSX, Windows
Documentation:	MS Word, Excel, PowerPoint & Visio

Work Authorization:

US Citizen

Projects (Reverse Chronological Order):

Aarisha Inc: Cloud Engineer: Install OUD, OUDSM, OAM, ELK, Prometheus & Grafana (May 2023 to August 2024)

Involvement	System Architect, Kubernetes Administration, Cloud Infrastructure Administration
Tools/Technology	Oracle Cloud Infrastructure (OCI), AWS, Kubernetes on bare metal/VM, Terraform
	Infrastructure as Code
O S	Redhat Linux 7, Redhat Linux 8
Details	Created Kubernetes clusters with public endpoints and private worker nodes Created Bastion Host to access clusters Created a shared file system, added ingress/egress rules for the shared volumes, and mounted the filesystem to the worker nodes for PVC usage Cloned Oracle Fusion Middleware (FMW) git code repository Used Helm Charts to install Oracle Unified Directory stateful sets in replication mode across multiple worker nodes by overriding the helm charts Used Helm Charts to install OUDSM, Oracle Access Manager across multiple worker nodes by overriding the helm charts Created custom domain with DNS Server for this deployment Set up SSL certificates for the custom domain using certbot and acme-dns-certbot to request certificate from LetsEncrypt

Set-up External Access Using NGINX Ingress Controller for load balancer, Used MetalLB for VM installations and Load Balancer for cloud installation
Patch and Upgrade of applications running on kubernetes cluster
Upgrade of kubernetes versions

Aarisha Inc: Infrastructure Administrator: Oracle Fusion Middleware (June 2022 –August 2022)

Involvement System Architect, Fusion MiddleWare Administration
Tools/Technology Oracle Fusion Middleware Products e.g. Oracle Weblogic Server 12.X, OAM 12.X, OUD 12.x, OUDSM 12.X, LDAP CLIs, dsconfig
O S Redhat Linux 7.X
Details System analysis and upgrade/administration for Oracle FMW Suite of products. Installation, deployment, sizing, scaling, performance tuning and management of OAM, OUD, OHS and OUDSM with Weblogic 12.X servers on multiple hosts using Weblogic clusters, F5 load balancer. Established Management, Monitoring and Administration procedures for entire FMW suite of products. Applied application hardening and patches in regular interval.

Aarisha Inc: Software Engineer: Java Web Development (June 2021 –August 2021)

Involvement Software Engineer
Tools/Technology VMWare, Spring Boot Framework
O S Redhat Linux 6.X
Details Participated in reviews of design, functional specifications and code developed by other team members. Identified technical problems to address and made improvements. Developed new features and supporting existing application modification
Project management
Communication and coordination with members of the development team

ARK Solutions Inc: Software Engineer Intern: Python Web Apps with Flask (April 2020–August 2020)

Involvement Software Engineer
Tools/Technology VMWare, Python Flask Framework
O S Redhat Linux 6.X
Details Worked with a team of developers on Python applications for risk management. Used Python scripts to update content in the database and manipulate files. Participated in requirement gathering and analysis phases of the project in documenting the business requirements
Met weekly with faculty to communicate project status and challenges
Developed views and templates with Python and templating languages to create a user-friendly website interface
Developed applications using Python and Flask
