F-1 Visa | OPT Eligible | Available Immediately

Professional Summary

Junior Data Scientist with a Master's in Data Science and strong foundations in statistics, finance, and quantitative modeling. Skilled in Python, SQL, and data visualization tools like Tableau and Excel VBA. Experienced in supporting end-to-end analytics and research projects, transforming complex datasets into actionable insights and client-facing reports. Passionate about solving real-world problems through statistical modeling and cross-functional collaboration.

Core Skills

- **Data Analytics:** Statistical Analysis, Trend Identification, A/B Testing, Business Intelligence
 - **Programming Tools:** Python, SQL, R (Beginner), Excel, Tableau
 - **Data Science & ML:** Regression, Classification, Clustering, EDA
 - **Project Management:** Agile Exposure, Team Collaboration, Process Documentation
 - **Visualization Tools:** Tableau, Matplotlib, Seaborn, Excel Dashboards
 - **Soft Skills:** Problem-solving, Communication, Adaptability, Teamwork
-

Professional Experience

Data Science Intern

Concentrix (under mentorship of Sr. Cloud Engineer) — Houston, TX

(Remote/Hybrid)

June 2024 – May 2025

- Supported cross-functional data analysis and dashboard creation to track system deployment and customer satisfaction KPIs.
- Contributed to NLP and cloud-based analytics solutions using Python, helping streamline internal support processes.

Data Science Intern

Medha Traction Pvt. Ltd. — Hyderabad, India

Mar 2021 – Sep 2021

- Worked on traction motor analytics and gained exposure to electric locomotive systems and power data logging.

Fleet/Repair Engineer

Belcan India Pvt. Ltd. — Hyderabad, India

Jul 2022 – Aug 2023

- Analyzed 100+ engine-related technical reports for GE90 and GP7200 platforms, ensuring compliance and reliability.
 - Collaborated with internal teams to optimize documentation and decision support based on repair data patterns.
-

Academic Projects**Wikipedia Image Captioning using BLIP, CLIP & BERT**

- Created a multimodal captioning pipeline using vision-language models and cosine similarity evaluation.

Auction Data Optimization (Capstone Simulation)

- Simulated an auction bidding model using Python to identify optimal auction intervals and pricing brackets.
- Presented insights to stakeholders using Tableau, focusing on process improvement and customer retention.

ICAO Engine Emissions Visualization (Tableau)

- Created interactive dashboards highlighting the most polluting commercial aircraft engines using ICAO data.

Mental Health LLM Prediction (Meta-LLaMA 3.1)

- Designed and trained a lightweight LLM-based classifier with 90%+ accuracy for multi-class mental health detection.

Airfoil Aerodynamics with CNN

- Designed and tuned a convolutional neural network to predict aerodynamic coefficients.

Technical Skills

- **Languages:** Python, SQL, R (basic), MATLAB
- **Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- **Visualization Tools:** Tableau, Excel
- **Other:** GitHub, Jupyter, MS PowerPoint, Salesforce, Google Colab

Education

University of North Texas – Denton, TX

Master of Science in Data Science — May 2025

GPA: 3.75/4.0

Relevant Course: Machine Learning, Deep Learning, AI, Data Visualization, Big Data, NLP

Institute of Aeronautical Engineering – Telangana, India

Bachelor of Technology in Aeronautical Engineering — May 2022

Graduated with Distinction (77.9%)

Additional Info

- Work Authorization: F-1 Visa, OPT Eligible (Immediate Start)
- Desired Compensation: \$75,000 – \$85,000 annually (flexible depending on total package and role)
- Strong interest in data-backed strategy, project-based learning, and cross-functional analytics
- Open to relocation and rotational roles across Copart's business functions
